PROFESSIONAL SUMMARY

Senior Business Analyst with 9+ years' experience in requirements elicitation, business transformation, and IT solution implementation, including over 5 years in healthcare (CIS/EHR/EMR). Proven record supporting software development teams, stakeholder engagement, Agile practices, and delivery in multi-entity environments.

CORE COMPETENCIES

- IT Systems Management & Operations
- Team Leadership & Vendor Coordination
- Requirements Elicitation & Analysis
- Business Transformation & IT Implementation
- Agile User Stories, Testing, Traceability
- Clinical & Healthcare Systems (CIS/EHR/EMR)
- Stakeholder Engagement & Communication
- Workflow Mapping, Policy, and SOP Development
- Visual Process Modeling and Architecture Diagrams
- ERP & SaaS Integration (ServiceNow, HR, Finance)

TECHNICAL SKILLS

- Requirements management tools (JIRA, Azure Test Plans, Trello)
- Agile/Scrum methodology: user stories, sprint planning, backlog tracking
- Business process modeling and workflow diagramming (Visio, MIRO, MURAL)
- Test case creation, execution, and traceability documentation
- Enterprise Resource Planning (ERP) systems (HR, Finance modules)
- Cloud SaaS platforms (ServiceNow, MS 365 Suite)
- Data analysis tools (Excel, SPSS)
- Technical documentation (requirements, SOPs, policy manuals)
- RFP/procurement software (Loopio, RFPIO, QorusDocs)
- SQL basics and data visualization
- Clinical information systems (CIS, EHR/EMR)
- Microsoft Office Suite (Word, PowerPoint, Outlook, SharePoint, OneDrive)
- Experience with Postman, Cypress (API testing/automation)
- Workflow design for integration points
- Dashboard development and KPI monitoring

CURRENT EXPERIENCE

Course Instructor Memorial University of Newfoundland, Canada

Sep 2024- Present

- Currently, managing and mentoring 24 researchers across 5 capstone project teams for software engineering projects, overseeing planning, scope, risk, process improvement, and delivery with real-world clients.
- Managing multiple guide teams through all phases: requirements definition, design, agile/waterfall implementation, peer review, and reporting.
- Leading six plus weekly project meetings, develop schedules, monitor task allocation, and resolve resource or communication issues.
- Implemented collaborative workflows and regular integration reviews using Gitlab and other remote tools; managed cross-team issues in hybrid teaching/operational environment.
- Facilitated interdisciplinary coordination with faculty and external stakeholders, ensuring alignment with institutional innovation objectives—mirroring non-standard IT deployments in academic settings.

ServiceNow Consultant & Business Change Lead CORE Technologies/SoftGenie

Feb 2024- Feb 2025

- Led ServiceNow cloud SaaS deployment and business transformation for 800+ users.
- Supported Agile development and testing, authored user stories and requirements docs, and delivered integration workshops.
- Produced architecture diagrams, process models, and SOPs for new solutions.
- Engaged business owners (Directors, VPs, CIO, CFO) and technical SMEs to prioritize activities and resolve cross-departmental issues.

Clinical Business Analyst / Digital Health Specialist Memorial University of Newfoundland/Eastern Health

Jan 2022- Jan 2024

- Drove requirements analysis and IT solution delivery for CIS/EHR implementations across four hospitals and 500+ staff.
- Authored test cases, traceability docs, and supported Agile practices for development.
- Developed workflow guides, compliance manuals, and process models to improve system adoption and outcomes.
- Facilitated sessions with clinical directors, CCIO, CIO, and regulatory leaders for integration and business process optimization.

Lead Business Analyst / Policy Analyst Health Service Executive (HSE) Ireland / University of Limerick

March 2016- Oct 2021

- Managed requirements analysis, workflow mapping, and EHR/ERP integration for national digital health projects engaging 400+ clinicians and administrators.
- Led business process modeling and produced architecture diagrams adopted nationally.

- Developed standards, policies, and operational procedures through stakeholder workshops, executive presentations, and document reviews.
- Coordinated multi-entity project teams to address competing priorities, oversee change management, and resolve issues related to implementation, training, and compliance.

Research Assistant University of Limerick, Ireland

July 2020 - March 2021

- Led multi-disciplinary teams in comparative analysis and agile delivery of national COVID-19 contact-tracing solutions for Ireland's health system (interfacing with IT, research, and policy stakeholders).
- Synthesized technical research and user requirements into change specifications and actionable recommendations adopted by authorities.

EDUCATION

PhD	2021	Software Engineering	University of Limerick, LERO, Ireland
MS	2014	IT, Software Engineering and Management	University of Goteborg, Sweden
BSc	2008	Computer Engineering	COMSATS Islamabad, Pakistan

SELECTED ACHIEVEMENTS

- Delivered digital health frameworks and change management strategies that improved hospital workflow efficiency and staff adoption rates.
- Successfully reduced emergency department wait times through optimized CIS deployment.
- Increased ServiceNow user adoption and engagement by 40%, boosting organizational process efficiency.

ADDITIONAL EXPERIENCE

- Experience producing visual models and architecture diagrams for system and business capability mapping (multiple projects: HSE Ireland, Eastern Health, ServiceNow).
- Developed SOPs, workflow standards, and policy manuals for healthcare and IT environments.
- Supported ERP integrations for HR and Finance in both healthcare and public sector contexts.
