

ADEMOLA MUSTAPHA

Hamilton, ON, Canada

+1 (437) 8705372, Amust04@gmail.com

Profile Summary

A seasoned business professional adept at designing and delivering solutions that helps in managing end-to-end business risks. With a keen eye for detail, I specialize in fortifying operations, utilizing technology to optimize processes, and expertly mitigating associated risks. Aspiring to drive growth, I bring a strategic IT approach to elevate businesses as a key member.

Education

- Master of Science - Logistics and Supply Chain Management Jan 2021 – May 2022
Sheffield Hallam University, Sheffield, United Kingdom
- Bachelor of Agriculture – Crop Protection Sept 2012 – Apr 2018
Federal University of Agriculture Abeokuta

Professional Certifications

- Project Management - British Project Management Academy
- IT Essentials - Cisco Networking Academy® program
- Introduction of Quality Management course - Rahn Wesley Institute of Management
- Certified cybersecurity awareness and training practitioner- INFOSEC
- Palo Alto Networks XSOAR Security Automation Engineer

Professional Memberships

- Member – ISACA | UK North Chapter

Core competencies

- Effective communication techniques
- Leadership
- Client relationship management
- Operations management
- IT Risk management
- DevSecOps Management leveraging Azure, GCP, Synk, New Relic
- Software Development & Infrastructure Management Using Terraform & Python
- Security Analysis leveraging KQL & SPL Language
- In-depth skill and experience in leveraging Microsoft 365

Work Experience

Security Engineer | Tesco Technology – Welwyn Garden City, UK.

September 2023 – Date

- Design and delivery of security automation use cases for various stakeholders within Tesco.
- Maintain an up-to-date record of all suppliers that access, store, process and provide critical services to Tesco, including the supplier assurance risk register.
- Provide high quality risk reports, with guidance and recommendations, to enable senior business owners to make the most appropriate risk decisions relating to the use of the supplier.
- Work closely with the relevant business owners, legal and procurement to ensure third party risks are considered and managed at appropriate points of the supplier lifecycle.
- Ensure prevention and detection capability is fit for both on-premises and public cloud environments.
- Configured scripts utilising the xSOAR platform to automate security operations.
- Collaborated with the Detection Engineering and Security Operations teams to design and deploy custom detections using Splunk Enterprise Security (SIEM) to identify anomalous activity across 250,000+ endpoints and 400,000+ identities.
- Reviewed and optimized SPL and KQL queries to enhance detection accuracy, reduce false positives, and ensure consistent detection logic across hybrid cloud environments.
- Developed automated detection and response playbooks using Cortex SOAR, integrating with existing SIEM alerts to accelerate Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR) for identity- and privilege-related incidents.
- Created and maintained custom SOAR integrations and scripts to enrich alert context with data from Active Directory, Azure AD, and endpoint telemetry systems.
- Partnered with IAM and endpoint teams to improve visibility into privileged account activity, integrating SIEM alerts with identity management and access control systems.
- Contributed to continuous improvement of detection pipelines, aligning detection coverage with MITRE ATT&CK and internal PAM risk models.
- Assisted in onboarding new applications and endpoints into the detection ecosystem, ensuring complete visibility of privileged accounts, secrets, and credentials.

Engineering Lead, | Amala Cloud Solutions Ltd - Sheffield, UK May 2022 – August 2023

- Designed, developed and deployed software web applications using python framework.
- Configured and maintained CI/CD pipelines for application deployment
- Conducted and lead various development ceremonies, including sprint planning, retrospective and release exercise.
- Led the security and governance of multi-cloud environments across Microsoft Azure and Google Cloud Platform (GCP), ensuring alignment with industry best practices and organizational compliance frameworks.
- Deployed and managed infrastructure as code (IaC) using Terraform to automate provisioning, configuration, and compliance of cloud infrastructure including virtual networks, databases, and application environments.
- Configured and maintained network security controls (firewalls, routing, VPNs, service endpoints) to protect workloads and ensure consistent network segmentation across Azure and GCP.

- Performed regular vulnerability assessments and cloud configuration audits, remediating misconfigurations and improving overall security posture.
- Provided technical leadership to engineering teams, conducting knowledge transfer sessions and ensuring secure-by-design principles were integrated into application delivery pipelines.
- Collaborated with development and DevOps teams to implement security baselines for containers, compute instances, and managed databases
- Designed and maintained automated monitoring dashboards and alert workflows integrating with ticketing/orchestration tools.
- Designed and implemented identity and access management (IAM) policies across cloud workloads, integrating with Azure Active Directory (Entra ID) and GCP IAM for secure authentication and least-privilege access control.

Director, Risk Management & Service Delivery | Prioclen Consulting Ltd - Abuja, NG
Jan 2019- Dec 2020

- Developed and implemented the company's strategic plan in alignment with the overall mission and objectives.
- Identified, developed, and implemented new digital tools/platform that optimise business operations for both the business and its clients.
- Responsible for technology-focused project execution and management, from architecture design to delivery.
- Create, execute, and review organisational process and procedures for business consulting operations.
- Monitor, supervise and deliver technology service offerings for clients.
- Develop and lead the implementation of comprehensive risk management strategies for clients.
- Conduct risk assessments and identify potential risks across various business operations.
- Designed and implemented risk mitigation plans, ensuring compliance with industry regulations.
- Ensured high client satisfaction through effective communication and project delivery.
- Managed enterprise user identity lifecycle and access governance through Microsoft Entra ID (Azure AD), including configuration of conditional access, MFA, and SSO integrations.
- Configured and managed Microsoft Intune (MDM) for endpoint enrolment, compliance enforcement, and remote device management across hybrid environments.
- Developed and implemented device compliance and configuration policies ensuring secure access to corporate resources based on device health and identity.
- Participated in the design of PAM frameworks leveraging Entra ID, Intune, and conditional access.
- Led workshops with internal IT, security, and compliance teams to define security use cases, role models, and configuration baselines.
- Developed operational runbooks, configuration documentation, and standard operating procedures (SOPs) for IAM and endpoint security management.
- Delivered technical training and knowledge transfer sessions for IT and security teams on IAM and endpoint security configurations.
- Designed and enforced Data Loss Prevention (DLP) and data classification policies using Microsoft Purview and Intune to prevent unauthorized data access or exfiltration.

Knowledge Areas & Hobbies

Knowledge areas

- Information Technology
- System architecture & design
- Financial market
- Global supply chain trends
- Cybersecurity Essentials
- Data Privacy/Protection
- Real Estate
- Renewable energy and sustainability strategies

Hobbies:

- Reading and Researching: In my leisure time, I surf the internet to learn about recent and old trends, business markets and history.
- Travelling: I have visited several European countries and I am keen to visit new places both local and abroad.
