Summary

Detail-oriented Software QA with 3+ years of experience in manual and automated testing across web and API-based applications, specializing in healthcare IT. Strong background in functional, regression, API, and database testing with exposure to data privacy, security, and compliance. Proven experience working with business stakeholders, supporting User Acceptance Testing (UAT), and delivering high-quality solutions in Agile environments.

Technical Skills

- **Testing:** Functional, Regression, Performance, API, Database, Cross-Browser, UI, Exploratory, Connectivity, UAT Support.
- **Tools:** Postman, ReadyAPI, JMeter, Eclipse, Selenium, TestNG, Cypress, Docker.
- **CI/CD & Tools:** Jenkins, Git, Jira.
- **Languages & Technologies:** Java, Python, JavaScript, SQL.
- **Methodologies:** Agile, Scrum, SDLC, STLC.
- **Operating System:** Windows, Linux, macOS.
- **Other:** Documentation, Test Planning, Defect Tracking, Process Improvement.

Professional Experiences

Software QA Analyst

HIPAAAT- Remote | May 2022 – Present

- Plan, design, and execute manual and automated test cases for healthcare web and API-based applications, covering functional, regression, performance, and connectivity testing.
- Develop and maintain Selenium + TestNG automation frameworks, **integrated with** Jenkins CI/CD pipelines, improving regression efficiency and release confidence.
- Create and maintain test plans, test cases, defect reports, and traceability matrices, ensuring audit readiness and QA process transparency.
- Perform performance testing using JMeter for web services and applications to identify system bottlenecks and validate stability.
- Execute end-to-end API testing using Postman and ReadyAPI, validating **FHIR and HL7** message exchanges for interoperability.
- Conduct backend and database testing using SQL to verify patient data accuracy and consent rules.
- Actively support User Acceptance Testing (UAT) by working together with business owners, executing test scripts, logging defects, and tracking resolution through **Jira**.

- Collaborate with Agile teams, working closely with developers, BAs, and product owners to clarify requirements and acceptance criteria.

Content Mediator

Majorel, Waterloo | *Aug 2020 – Sep 2021*

- Reviewed and validated digital content ensuring accuracy, consistency and compliance.
- Collaborated with internal and external IT resources to resolve issues
- Maintained productivity while meeting deadlines and demonstrating attention to detail.

ICT Teacher

Central Public School and College, Chittagong, Bangladesh | *Jan 2019– Sep 2019*

- Designed coursework, reinforcing analytical thinking and technical fundamentals.
- Graded and evaluated student papers, assignments, and other coursework.

Projects

Privacy eSuite (PeS): Healthcare Consent & Privacy Management Platform

- Tested provincial and enterprise healthcare client builds (Ontario Health, TELUS Health, Sunnybrook).
- Validated privacy policies, consent directives, and PHI access rules through functional, regression, and database testing.
- Used SQL and API validation (FHIR/HL7) to ensure data integrity and compliance across systems.

MyDMR: Cloud-Based Care Management Platform

- Executed functional and regression testing across client-specific healthcare workflows.
- Verified data exchange accuracy using database queries and API responses prior to production releases.
- Supported release readiness and defect resolution in collaboration with cross-functional teams.

Education

Graduate Certificate – Software Quality Assurance and Test Engineering

Conestoga College, Waterloo, ON | *Sep 2021 – Aug 2022*

M.Sc. – Computer Science & Engineering

University of Chittagong, Bangladesh | *Aug 2017 – Aug 2019*

B.Sc. – Computer Science & Engineering

University of Chittagong, Bangladesh | *Jan 2013 – Aug 2017*
