

PETER HAZLEWOOD, Application Developer

Stoney Creek, L8J 0E5, Canada, (905) 616-4397, peterhazlewood@hotmail.com, <https://www.linkedin.com/in/peter-hazlewood-7234a41a/>

Summary

Dynamic Senior Application Developer with over 9 years of experience in designing and maintaining high-quality software solutions. Proficient in Delphi, C#, and ASP.NET, with a solid track record of optimizing databases and enhancing user engagement through innovative applications. Successfully engineered an iOS app for a rewards program and implemented a batch order tracking system, demonstrating strong analytical and problem-solving skills. Ready to leverage technical expertise and a commitment to excellence to drive success in upcoming projects.

Work Experience

03/2016 – 02/2025

Software Developer/Support, Sporting Life Group

Vaughn, Canada

- Developed and maintained E-commerce applications: Utilized Delphi and C# within a GIT-based environment (Source Tree) to create high-quality Order Management Systems, ensuring scalable and maintainable code optimized for performance.
- Optimized databases and reporting: Conducted MSSQL optimizations and generated comprehensive custom reports to assist data-driven decisions.
- Managed application deployment and distribution: Oversaw installation and distribution of custom applications, ensuring seamless integration and adherence to secure deployment practices.
- Engineered iOS applications: Created and launched an iOS app for a rewards program, enhancing customer engagement and loyalty.
- Administered SFCC/SFSC systems: Delivered comprehensive support for Salesforce Commerce Cloud and Salesforce Service Cloud, promoting operational excellence through proactive system management.

06/2015 – 01/2016

Software Developer, Inspyder Software Inc.

Burlington, Canada

- Built robust desktop and web applications: Employed C# to develop both desktop and ASP.net web applications with a Maria DB backend, ensuring efficient performance and stringent unit testing adherence.
- Enhanced system functionality: Developed new reports and integrated time-saving features to resolve existing issues and streamline data analysis processes.
- Implemented face recognition technology: Applied OpenCV to develop and deploy face recognition capabilities for user profile headshots.
- Designed dynamic web templates: Created and developed dynamic web templates that provided diverse, custom options for client websites.
- Delivered exceptional customer support: Resolved technical issues via email and phone, ensuring high levels of customer satisfaction and effective cross-functional communication.

01/2015 – 06/2015

Integration Specialist, PINpoint Information Systems

Burlington, Canada

- Configured software to enforce operational standards: Ensured compliance and efficiency within plant environments through precise software configuration.
- Managed installation and upgrades: Supervised the installation and upgrading of PINpoint software to optimize system performance and reliability.
- Documented software features: Created detailed documentation of software revisions to facilitate clear communication and understanding of updates.
- Consulted with clients: Engaged with clients to discuss and configure site-side software and servers, providing tailored solutions and supporting seamless integration.

06/2002 – 11/2013

Programmer Analyst, Machine Automation Inc.

Oakville, Canada

- Implemented a batch order tracking system: Developed a custom system using Delphi and SQL Server that interfaced with a Foxboro Control System, ensuring

scalable and secure operations.

- Developed a custom web server: Designed and implemented a web server for report generation and assignment management, streamlining data access and system integration.
- Managed project development and maintenance: Created and maintained various projects using Delphi, ASP, Visual Basic 6, and JavaScript with SQL Server, Access DB, and OSI PI backends to ensure robust performance.
- Redesigned a graphical application: Upgraded a flagship application for visualizing Process Automation Alarms and Events, incorporating TCP/IP server/client tools and promoting enhanced code quality.
- Designed data retrieval tools and utilities: Developed utilities for data translation incorporating RS232, LPR, OPC, and file access to improve data accessibility and accuracy.
- Parsed and translated data: Utilized Regular Expressions to efficiently parse and translate data, ensuring data integrity and usability.

10/1999 – 01/2002

Programmer Analyst, Encoda Systems

Toronto, Canada

- Developed and maintained projects: Employed Microsoft Active Server Pages (ASP), Visual Basic 5/6, and JavaScript with SQL Server and Access DB to deliver stable software solutions.
- Configured DCOM/ADO/RDO for remote automation: Set up communication protocols to ensure seamless data access and system interoperability.
- Created and executed test scripts: Developed rigorous test scripts to validate project functionality and reliability, reinforcing strong unit testing best practices.
- Administered and configured servers: Managed NT4/2000 server administration for both internal and client deployments, ensuring optimized performance and system stability.

Education

09/1995 – 05/1999

**Ryerson University
B.Sc., Computer Science**

Toronto, Canada

- Programming/Database/OS
- GPA: 3.5

Skills

C#	SQL
Python	C++
C	Java
JavaScript	PHP
Delphi	VB6
JQuery	Windows Batch Files
PowerShell	Linux Shell Scripting
REST APIs	Visual Studio
SOAP UI	Git
Microsoft SQL Server	ASP.net
Maria DB	OpenCV
ASP	Access DB
OSI PI	TCP/IP
RS232	LPR
