Apr 2016 – Apr 2018

- Answer inbound calls to help resolve customers' inquiries.
- **World Class Certified** and maintained an average Call Quality score **greater than 90%**.

Automate4U

Aug 2025-Present

Automate4U helps teams across North America eliminate manual work through building or integrating custom AI solutions, intelligent voice agents, chatbots, workflow automations, and custom integrations. Based in Miami and Toronto, we work with businesses across North America who need practical solutions that integrate with their existing CRMs, ERPs, and business tools.

Founder

- Developed and executed the foundational business model for Automate4u, overseeing the creation of all internal processes, strategic planning, and go-to-market business plans.
- Managed all financial operations, including budgeting, pricing strategy, and resource allocation to ensure long-term business viability.
- Developed and deployed a **custom Python program** for one of our clients to standardize social media output, eliminating **10 hours** of manual weekly labour and ensuring consistent brand presence.
- Directed the end-to-end development of the company's web infrastructure, utilizing a tech stack of **React, JS, and HTML** to build a scalable and professional online brand.

FreshFind

Jan 2023-Dec 2023

FreshFind offers professional services, an online marketplace, a store builder, and business growth tools for local vendors across the globe. The company's mission is to empower local, independent producers to make their products more accessible.

Senior Data Analyst

- Executed comprehensive cross-platform data analysis using **Google Analytics** and **internal KPIs** to increase visibility into customer behavior and optimize digital engagement.
- Designed and deployed **50+ comprehensive user surveys**, analyzing respondent data to identify emerging market trends and align product development with user needs.
- Prioritized and scoped feature requests from users to ensure that the most impactful features were worked on first.
- Optimized end-to-end logistics to decrease average delivery lead times by **20%** through strategic route planning and vendor negotiations.

Volunteer Experience

Furniture Bank

2024-2025

- Assembled and refurbished essential furniture pieces for Furniture Bank, ensuring high-quality home furnishings reached families and individuals in need.

Knight's Table (Brampton)

2019-2020

- Contributed to local food security initiatives by prepping large-scale community meals and maintaining a well-organized donation center.
- Engaged directly with community members to distribute food and essential goods, ensuring a positive and respectful experience for all visitors.
- Maintained warehouse workflow by processing incoming donations and organizing inventory for immediate community use

Canadian Blood Service

2018-2020

- Annual blood donor for 2 years.

Education

University of Toronto School of Continuing Studies

2022 - 2023

- Concepts and Skills Learned:
 - Employ statistical analysis to model, predict, and forecast trends.
 - Glean and communicate new business insights using enterprise-grade tools like Tableau.
 - Build VBA scripts in Excel to automate manual processes.

- Create Python-based scripts to automate the cleanup, restructuring, and rendering of large datasets.
- Interact with APIs by using Python requests and JSON parsing techniques.
- Generate in-depth graphs, charts, and tables by using a wide variety of data-driven programming languages and libraries.
- Use advanced SQL and NoSQL techniques to combine multiple datasets into comprehensive databases.
- Scrape information from webpages to collect data from a broad range of online sources.
- Applying machine learning algorithms for data analysis.
- Familiarity with neural networks and deep learning concepts.

Ezen Academy (South Korea)

Mar 2022 – Jul 2022

Computer Programming Fundamentals Bootcamp

- Concepts and Skills Learned:
 - Object Oriented Programming
 - Java
 - HTML/CSS
 - JavaScript
 - MySQL/SQL
 - Python
 - Basic algorithms

Seneca Polytechnic

Sep 2017 – Sep 2019

Computer Programming

- Concepts and Skills Learned:
 - C
 - C++

York University,

2010-2013

Psychology

- Concepts and Skills Learned:
 - **Interpersonal Dynamics & Conflict Resolution:** Studied the mechanics of human interaction and emotional intelligence, gaining skills in de-escalation and negotiation that are critical for leadership and client-facing roles.
