

Ezichi A. Chimezie

(240)-761-5908 | Bowie, MD | ezichi210903@gmail.com | [in/ezichi21](https://in.ezichi21.com) | [Professional Portfolio](#)

EDUCATION

Howard University

May 2027

Bachelor of Science (BSc), Computer Science, GPA: 4.0

Prince George's Community College

Jan 2023- Dec 2024

Associate of Science (A.S) Computer Science, GPA: 4.0

SKILLS

Software Languages: Java, Python, Visual Basic, SQL, HTML, CSS, JavaScript, MATLAB

Tools/Frameworks: Next.js, React Native, ASP.NET, Spring Boot, GitHub

Databases: MySQL, PostgreSQL (Beginner)

Cloud & DevOps: Azure App Service, AWS CCP, Docker(beginner), Kubernetes (Basic)

Testing & Patterns: JUnit, PyTest, OOP Design Patterns (MVC, Singleton, Observer)

AI & ML: Prompt Engineering (Beginner), Generative AI Foundations (Vision Models & LLMs)

Certifications: CompTIA Security plus, AWS CCP, IC3 GS6 Master, AZ-900, AI-900, Java Developer

TECHNICAL PROJECTS

SolePurpose – E-commerce mobile app (*In Progress*) – Independent

Nov 2024 - Present

- Designing and developing a React Native mobile app for aggregating women's shoes from various retailers and debugging/optimizing it with VS Code and Expo CLI for cross-platform performance.
- Integrating product aggregation logic with external APIs (or mock services) to retrieve shoe listings.
- Building interactive screens using Expo and JavaScript and implementing React Navigation for seamless screen transitions and intuitive user flow. Linked, detailed explanation and overview of project: [SolePurpose](#)

Interactive Professional Portfolio | Next.js, Vercel Deployment – Independent

Dec 2024

- Built a personal portfolio using Next.js, TypeScript, and CSS Modules, ensuring responsiveness across desktop and mobile.
- Implemented reusable components and optimized performance using SSR and SSG capabilities.
- Portfolio link: <https://ezichichimezie.vercel.app/>

Hotel Booking Web App | ASP.NET, Azure Deployment – Independent

Jul 2024 – Aug 2024

- Developed a hotel booking web application simulating real reservation workflows, including availability checks and confirmations.
- Implemented backend logic using ASP.NET and Visual Basic, following MVC design principles.
- Built a responsive UI using HTML, CSS, and JavaScript and deployed via Azure App Service, enabling cloud hosting and scalability. Live Demo: [The Coral Cove](#)

PROFESSIONAL EXPERIENCE

Software Engineering Intern

Sep 2025 – Dec 2025

EndsideOut, Inc.

- Developing and optimizing a full-stack Learning Management System (LMS) using React.js, Node.js, and MySQL for courses, enrollments, and content.
- Building and consuming RESTful APIs for user authentication, course management, and activity tracking.
- Maintaining the organization's WordPress site, managing plugins, optimizing performance, and updating UI with PHP, HTML/CSS, and JavaScript.
- Improving performance by optimizing MySQL queries and implementing efficient data-fetching strategies.
- Collaborating in Agile sprints with GitHub for version control, code reviews, and deployments.

Computer Science Tutor

Sep 2024 – Jul 2025

Prince George's Community College

- Tutored students in Programming Logic and Design (Python and Java), Object Oriented Programming (Python and Java), Data Structures (Java), Mobile App Development, and Visual Basics.
- Supported 13 students in problem-solving, algorithm design, and maintaining grades of B or above.

Mathematics (Math) Tutor

Mar 2024 – Jul 2025

Prince George's Community College

- Tutored 17 students across Calculus I–III, Precalculus, Algebra, and foundational math courses.
- Delivered one-on-one and group sessions and developed structured lesson plans.

ACADEMIC AND LEADERSHIP ACTIVITIES

Girl's Who Code, PGCC Chapter – President

Nov 2023 – Dec 2024

- Led a team of 9 students to organize workshops, coding sessions and outreach events for Computer Science majors at PGCC.

PGCC Engineering Club – Treasurer

Mar 2024 – Dec 2024
