EDUCATION

University of Toronto

Bachelor of Science in Computer Science

Sep. 2020 – Aug. 2025

Toronto, ON

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, C/C++, Java, SQL

Frameworks: Angular, React, Node.js, Flask, i18n, .NET, Kentico

Developer Tools: Git, Docker, Azure Devops, JIRA, Postman, RabbitMQ, VS Code, Visual Studio, AWS, DigitalOcean

Libraries: three.js, pdf.js, RXJS, beautifulSoup, SDK/Stable Diffusion, Celery

EXPERIENCE

Software Developer Co-op

Ministry of Education

Jan. 2022 – Aug. 2022

Toronto, ON

- Collaborated with a team of eight software developers to develop an interactive online platform serving over 1 million users, utilizing Agile development and AngularJS for website development.
- Built a multi-file download feature using RxJS and .NET, streamlining the process of acquiring and saving multiple files, which improved download speed by about 50%.
- Implemented accessibility features for visually and audibly impaired users, enhancing inclusivity and equal access through the use of i18n and translation mapping.
- Developed multiple quality-of-life features for the website, including navigation bars, video players, PDF viewers, and more to enhance user experience.

AI Research Assistant

University of Toronto

May. 2024 – Sep. 2024

Toronto, ON

- Researched the impact of large language models (LLMs) like ChatGPT and other generative AI tools on computer science education.
- Collaborated with a team of eight researchers using literature mapping to organize and analyze existing studies, identified key trends and research gaps, and compared research findings.

PROJECTS

Zusa | *Python, PyFlask, Angular, HTML, CSS, TypeScript, MongoDB, DigitalOcean*

- Collaborated with a team of three developers to create art using Stable Dffusion AI, pdf.js, and three.js to turn pdfs into AI generated images and animations.
- Utilized Celery and rabbitMQ to improve pdf processing by over 100%.
- Deployed and maintained the website using Digital Ocean with Docker.

Limeade | *Angular, HTML, CSS, TypeScript, ExpressJS, MongoDB*

- Developed a social event app with tiered accounts, event management, chat, and advertising as a prototype for an event company startup.
- Built a backend with JavaScript, Express.js, and MongoDB with Mongoose as ODM that implements a Jaro-Winkler distance based search engine, which reduced search time by about 70%.
- Developed the web application using Angular with complex CSS styling, including flex, animations and transitions.

Taste Tinker | *Python, Beautiful Soup, React, HTML, CSS, JavaScript, MongoDB*

- Built a React web application with user authentication, profile management, and ingredient-based query features to generate personalized recipe suggestions.
- Used Python and Beautiful Soup to scrape data from the web for the application's search engine.

StockSQL | *C, Bash, Linux, SQL, PostgreSQL, Docker*

- Created a stock simulator using historical stock data where users could buy and sell stocks.
- Implimented various databases in multiple docker containers based on container architecture.
- Improved search speed by about 50% by designing a clear and consistent data schema along with efficient SQL queries.
