

Richard Thibault

Computer Science/Software Engineering (Game Designer)

970 Wallace Terr. | Sault Ste Marie, P6C1M4 | (705) 971-1079

richard_thibault9@hotmail.com

Professional Summary

Motivated Software Engineer, looking to put my detailed knowledge on Data Structures, and different algorithms and programming knowledge that could be helpful to more practice. From high school, I started initially programming, so I'm proficient in various programming languages including Java, C++, C#, JavaScript etc... Highly adaptable and can pick up new programming languages fairly quickly. Participated in multiple Global Game Jams that are held every single year, to stay sharp.

Skills:

- Documentation
- Unity Development • Level Design
- Mobile game development • AI Programming
- Quality Assurance Testing • UI Design
- Java
- C++
- Coding Skills
- JavaScript
- C#
- Adaptability
- Problem Solving Skills • Analytical Skills
- Object-Oriented Programming
- Blender (3D modeling software)

Work History

June 2023 - June 2025

Rusty Halo Productions - Sault Ste. Marie,
ON Junior Game Developer

Created a few game design documents, including rough sketches/paper prototypes. Contributed to marketing ideas within the game design document, including distribution/micro transactions. Utilized the Unity Engine to create the 2D prototypes that would become the games when I was given the art. Utilized C# to program logic, rules and AI.

Education

Korah Collegiate And Vocational School
Sault Ste. Marie, ON
High School Diploma

Algoma University Sault Ste. Marie, ON
Bachelor of Computer Science (Computer Games Technology)

Thesis Paper: Modeling Behaviors in an Underwater Environment With Different Levels of Pollution Using AI
