SUMMARY

Data & Analytics Manager with 15+ years building production-grade data solutions across SQL Server and Oracle ecosystems. Expert in address hygiene, large-scale deduplication, ETL, marketing data appends, and fraud-support workflows. Track record of leading cross-functional projects, standardizing processes, and accelerating delivery with robust QA. Adept with T-SQL/PL-SQL, SSIS, and SAS; trusted partner to business teams for accurate, timely insights.

CORE SKILLS

- Data Engineering & ETL: SQL Server (2000/2005/2008+), SSIS/Integration Services, Oracle (PL/SQL), data migration, data modeling, performance tuning
- Data Quality & Governance: merge/purge, address cleansing, de-dup at multi-million record scale, documentation/controls
- Analytics & Reporting: T-SQL, PL/SQL, SAS, KPI/report automation, Crystal Reports - Leadership & Delivery: project planning, stakeholder management, mentoring, production support
- Platforms/Tools: SQL Server Management Studio, Oracle utilities, Visio, Visual Studio, FoxPro, MS Office
- Domains: e-commerce parcel analytics, marketing data appends, fraud-support process

EXPERIENCE

Canada Post Corporation — Data & Analytics (Manager)
Manager • Mar 2017 – Feb 2025 • Mississauga, ON

- Led design and operation of address quality pipelines and multi-million-record cleansing routines supporting Address Complete.
- Built and maintained production ETL for My Money Loan Data Append and annual refreshes of third-party datasets.
- Delivered recurring eCommerce parcel count reporting and contributed to fraud-support workflows.
- Engineered update processes for Address Complete artifacts with full runbooks and documentation.

Programmer/Data Analyst (Contract) • Nov 2013 – Mar 2017

- Implemented EM database updates and CMA matching; standardized de-dup logic.
- Built automation for Premover weekly extracts and PO Box handling.
- Created invalid address fixing routines and scaled 60M+ address cleaning.
- Supported fraud investigations and produced eParcel analytics.

Cornerstone Group of Companies — List Processing & Response Mgmt

Programmer/Data Analyst • Jun 2003 – Nov 2012

- Managed merge-purge production and QA sign-off; standardized workflows for data clients.
- Led Data Transition & Merging project consolidating SQL Server clients into MDS database.
- Migrated FoxPro clients to SQL Server with schemas, stored procedures, and reports.

Data Analyst / Print Administrator • May 2001 – Jun 2003

- Led migration Oracle 7 → SQL Server 2000 for Acknowledgement Project; improved efficiency by 30%.

Print Administrator • Dec 1999 – May 2001

- Customized acknowledgement procedures for 25+ clients; trained operators.

Early Technical Experience (Ukraine)

Software Engineer / Junior Software Engineer • Sep 1991 – Jul 1998

- Authored specifications and implemented Assembler/Pascal algorithms for pipeline search devices; built data collection tools.

SELECTED PROJECTS & IMPACT

- Enterprise Address Hygiene: repeatable pipelines for cleansing and conversions, improving deliverability and analytics quality.
- Marketing Data Appends: Productionized Equifax, Environics, Epsilon, IHS POLK, EthnicTech refreshes at scale.
- Fraud Support Analytics: Integrated verified sources to improve risk review throughput.
- Legacy Modernization: Migrated FoxPro/Oracle workloads to SQL Server with standardized QA routines.

EDUCATION

B.Sc., Software Engineering (Systems Engineering & Automation) — Polytechnic University, Vinnitsa, Ukraine

ADDITIONAL INFORMATION

- Languages/DB: T-SQL, PL/SQL; SQL Server, Oracle
- Analytics: SAS (intermediate); Crystal Reports
- Documentation & Runbooks: reproducibility, SOPs, audit trails
