**Developer Tools:** Git, GitCI, GitHub, VS Code, vim, neovim, OpenSSH, Gitea

**Libraries:** pandas, NumPy, Matplotlib, CrowCpp, libcurl, cJSON, libUSB

**Operating Systems:** Linux, OpenBSD, Windows, MacOS

## PROJECTS

---

**/tg/station13** | *DM, JavaScript, Inferno, Bash, Rust, Git* | [Link](#)

Feb 2021 – Present

- Became maintainer in May 2022.
- Refactored multiple outdated and inefficient parts of the code base.
- Fixed numerous bugs with the aim of lowering the issue tracker to a manageable amount.
- Enacted code review on numerous pull requests, both as a contributor and as a maintainer.

**XXD** | *C* | [Link](#)

Feb 2025

- A hex dumping utility included in GNU utils, recreated from scratch.
- Implemented in pure C, with only the std library.

**Metro Schedule Parser** | *C++, Python, HTML, RESTful API* | [Link](#)

June 2023

- Using Metro's online schedule API, created a website that allows users to compile their weekly schedule into a calendar-file format.
- Uses Python to access Metro's API and compile the data into a calendar format.
- Serves the calendar file using a RESTful API, built with C++.

**Minimal AUR Helper** | *Bash, git* | [Link](#)

May 2023

- Using Bash, automated the process of downloading and installing packages from the Arch User Repository.
- Added optional arguments for better control over the process.

**ISBN Lookup** | *C, curl, Makefile, cJSON* | [Link](#)

Jan 2024

- Using C, created a CLI tool that allows users to download information about books using their ISBN number.

**Many others...** | [Link](#)

- Various other low level C projects, lots of manually memory managed programs. Both novel and ports of programs in my project list.
- Quick to learn new languages, tools, and frameworks, to ensure my project can be completed.

## EXPERIENCE

---

**Meat / Seafood Clerk**

September 2023 – Present

*Real Canadian Superstore*

*Oshawa, Ontario*

- Preparing meat, chicken, fish, frozen, and ready to cook items for customers.
- Often in charge of organizing and unpacking the received orders, cleaning up, and meat cutting.
- Responsible for ordering product from vendors, ensuring that products we require are always in stock.
- Placed in charge of the seafood department, to ensure that everything is stocked and properly run, entirely on my own.

**Meat / Seafood Clerk**

August 2018 – October 2023

*Metro*

*Whitby, Ontario*

## EDUCATION

---

**Ontario Tech University**

Oshawa, ON

*Bachelor of Science. Computer Science*

*Sept. 2021 – December 2025*
