PROFILE

I am a passionate coder with four years of experience in web development and user needs analysis. I love all things tech related and enjoy coming up with creative solutions to challenging problems in both backend and frontend development.

KNOW-HOW SYNTHESIS

- ❖ Strong ability to adapt and learn
- ❖ Possess analytical
- ❖ Problem-solving
- ❖ Enjoy teamwork
- ❖ Communication skills
- ❖ Ability to work independently

WORK EXPERIENCE

Full-stack Magento developer Importations Thibault, Sherbrooke

Ongoing

- ❖ Maintain the B2B website of Importations Thibault company
- ❖ Develop custom modules, API development, code reviews and bug fixes
- ❖ Integrate third-party payment gateways services
- ❖ Optimize backend components for speed, scalability, and reliability

Technologies used: PHP8, Object-Oriented Programming (OOP), MVC, Magento 2 (Adobe Commerce), Laravel, ERP, REST API, GraphQL, Web services, Cron, GitHub, Design Pattern, Code refactoring, HTML5, CSS3, JavaScript, JQuery, Elasticsearch, Knockout.js, Redis, SQL, MySQL, GraphQL, JSON, XML, AJAX, PhpStorm, PHPUnit, Postman, Jira

Java Spring Boot / AngularJS developer Intern Hydro-Québec (IREQ), Varennes

May 2024 – Aug. 2024

- ❖ Provide a functional prototype for researchers
- ❖ Work within a multidisciplinary team : researchers, users, and IT personnel
- ❖ Improve an application for diagnosing failure mechanisms in the turbine-alternator group with **AngularJS** and **Java Spring Boot**
- ❖ Develop algorithms to structure the data to create a hierarchical graph for prognosticating alternator failure mechanisms

Technologies used: Java, Spring Boot, Spring MVC, Maven, Angular 16, Object-Oriented Programming, REST API, Swagger, HTML5, CSS3, JavaScript, JQuery, TypeScript, SQL, PostgreSQL, Oracle, Git, Bitbucket, JSON, AGILE, SCRUM, JWT, Unit tests, VS CODE, IntelliJ Ultimate, Confluence

Magento 1 & 2 developer Calliweb, France

Aug. 2022 – Jul. 2023

- ❖ Develop and maintain B2B and B2C websites
- ❖ Create custom modules, and Optimize code
- ❖ Implement and customize magento themes and plugins
- ❖ Upgrade project versions, Identify and fix existing issues
- ❖ Work independently and manage multiple projects
- ❖ Optimize the loading time and enhance end-user experiences
- ❖ Integrate third-party APIs (PIM, payment gateways, CRM) and services and develop backend APIs

Technologies used: PHP8, PHP7, PHP5, Object-Oriented Programming (OOP), Design pattern, MVC, MVVM, Git, GitHub, Magento 1 & 2, Magento EE, ERP, CRM, PIM, Web services, Code refactoring, REST API, GraphQL API, PWA, CRON, HTML5, CSS3, JavaScript, JQuery, Elasticsearch, Knockout.js, Varnish, Algolia, Stripe, Paypal, Sendinblue, SQL, MySQL, MariaDB, JSON, XML, SOAP, AJAX, AGILE, SCRUM, JWT, OAuth, PhpStorm, PHPUnit, Postman, Bash, Azure DevOps, Trello, Docker, Linux, Google Tag Manager, Google Analytics (GA4), Google PageSpeed Insights, Slack

Full-stack PHP Analyst-Programmer**Mar. 2021 – Jul. 2022****Esokia, Madagascar**

- ❖ Analyze user needs and the technical requirements of new features
- ❖ Build a [job-seeking website in Mauritius](#) with **CodeIgniter 3** and develop and execute unit tests
- ❖ Redesign a job-seeking website in Mauritius using **CodeIgniter 4**
- ❖ Develop and maintain a [sales and service platform](#) with **Symfony** for backend API management and **React.js** for frontend

Technologies used: PHP, Object-Oriented Programming (OOP), MVC, Code refactoring, CodeIgniter, ReactJS, Symfony, Twig, ORM, HTML5, CSS3, JavaScript, JQuery, REST API, Postman, SQL, MySQL, LAMP, JSON, AJAX, AGILE, SCRUM, Git, JWT, PhpStorm, PHPUnit, VS CODE, Linux

Magento 2 developer**Dec. 2020 – Mar. 2021****Picolino agency, Madagascar**

- ❖ Solve issues and enhance various aspects of the website based on client requests

Technologies used: PHP, Object-Oriented Programming, Git, Magento 2, HTML5, CSS3, JavaScript, JQuery, SQL, MySQL, LAMP, PhpStorm, Linux, Slack

Web developer**Nov. 2019 – Nov. 2020****Etech consulting, Madagascar**

- ❖ Develop a RESTful API for **Magento 2** and debug code
- ❖ Add new features and enhance an [aeronautical equipment sales website](#) using **PrestaShop**
- ❖ Develop a hotel booking web application using **Magento 2**

Technologies used: PHP, Object-Oriented Programming (OOP), SVN, Magento 2, PWA, PrestaShop, Java, Spring Boot, Spring MVC, Maven, Code refactoring, JUnit, OAuth2, JWT, HTML5, CSS3, JavaScript, JQuery, REST API, Knockout.js, Unit tests, TypeScript, SQL, MySQL, WAMP, JSON, AJAX, AGILE, SCRUM, JWT, Jira, PhpStorm, PHPUnit, Postman, Jenkins, VS Code, IntelliJ Ultimate

Magento 2 developer intern**Jul. 2019 – Nov. 2019****Etech consulting, Madagascar**

- ❖ Update the version of a multi-store platform from Magento 1 to Magento 2
- ❖ Develop a module that allows the administrator to approve or reject new account creation via email
- ❖ Solve issues on a multilingual and multi-store website using Magento 2

Technologies used: PHP, Object-Oriented Programming (OOP), SVN, Magento 1 & 2, HTML5, CSS3, JavaScript, JQuery, Knockout.js, SQL, MySQL, WAMP, AGILE, SCRUM, Jira, PhpStorm, Jenkins, Jira

Laravel developer intern**Nov. 2017 – Feb. 2018****CEFOR, Madagascar**

- ❖ Design and develop a web application for managing CEFOR's fixed assets using **Laravel**.

Technologies used: PHP, Object-Oriented Programming (OOP), MVC, Design pattern, Laravel, Blade, ORM, HTML5, CSS3, JavaScript, JQuery, Bootstrap, SQL, MySQL, WAMP, AGILE, SCRUM, Git, PhpStorm

EDUCATION

Master's in Software Engineering**Aug. 2023 – Dec. 2024**

Université de Sherbrooke, Québec

Master's degree in computer science**Mar. 2018 – Feb. 2020**

École Nationale d'Informatique de l'Université de Fianarantsoa, Madagascar

Bachelor's degree in computer science**Mar. 2015 – Feb. 2018**

École Nationale d'Informatique de Université de Fianarantsoa, Madagascar

ACADEMIC PROJECTS

Université de Sherbrooke

2023 – 2024

Academic projects :

- ❖ Design a web application to monitor and help the daily lives of elderly people with Alzheimer's disease living alone using **Django** (Python framework)

Technologies used: Python, Django, Object-Oriented Programming, MVC, Design pattern, Testing, Reliability and Scaling, Git, PyCharm, Trello

- ❖ Design a web and mobile application for booking and selling weight, connecting air travelers with users who wish to send or receive packages, using **Node.js** for the backend API, **AngularJS** for the frontend, and **Java** for mobile development

Technologies used: Node.js, Express.js, Angular 18, Angular Material, Java Android, Object-Oriented Programming (OOP), MVC, MVVM, AWS-SDK for facial recognition, Git, GitLab, HTML5, CSS3, JavaScript, TypeScript, REST API, JSON, XML, SOAP, RDF le standard du web sémantique, NoSQL, MongoDB, MongoDB Compass, AGILE, SCRUM, AWS, Unit tests, VS CODE, Android Studio, Postman, Trello

- ❖ Model and secure a historized database for managing B2B sales using PL/pgSQL

Technologies used: PostgreSQL, PL/pgSQL, DBeaver, Visual Paradigm, Git

- ❖ Design and implement an e-commerce website incorporating advertising (social marketing, affiliate marketing), SEO optimization, newsletters, analytics metrics, and A/B testing to ensure high search engine ranking using **WordPress**

Technologies used: PHP, WordPress, WooCommerce, Git, HTML5, CSS3, JavaScript, Paypal, Google Analytics (GA4), Google Tag Manager, Google Ads, Mailchimp, Google Search Console, Google PageSpeed Insights, Sitemap, Code optimisation (W3C), FileZilla, SEO, Accessibility

- ❖ Build a responsive web application for restaurant management using **Vue.js** for the frontend and **Node.js** for the API backend

Technologies used: Vue.js, Node.js, API REST, Object-Oriented Programming (OOP), MVC, JSON, NoSQL, MongoDB, TypeScript, HTML5, CSS3, JavaScript, MongoDB Compass, Agile, SCRUM, Trello, GIT, Postman, VS CODE

École Nationale d'Informatique (Université de Fianarantsoa)

2015 – 2020

University projects :

- ❖ Develop a web application and create an algorithm for the traveling salesman problem using JavaScript, HTML5 and CSS3
- ❖ Design a web application for managing book reservations at the library using **ASP.NET**

Technologies used: C#, ASP.NET, Blazor, Entity Framework, SQL Server, SQL, Git, AJAX, Eclipse IDE, VS CODE

- ❖ Design student grade management software using VB.net

Technologies used: VB.net, C#, SQL Servers, Visual Studio

LANGUAGE SKILLS

- ❖ Malagasy
- ❖ French
- ❖ English

MISCELLANEOUS

- ❖ Cooking
- ❖ Reading self help books
- ❖ Board games
- ❖ Jogging
