

Marty Hurl

chilihurl@gmail.com | (604) 727-3277 | Vancouver, BC

SUMMARY

Experienced Full Stack Developer with over a decade of expertise in coding, planning, and architecting scalable web platforms and databases. Strong proficiency in modern JavaScript frameworks, database modeling, and API development with emphasis on React, JavaScript (ES6+), GraphQL, MongoDB/Mongoose, and payment integration solutions.

Proven ability to lead complex technical projects, optimize system architectures, and collaborate across multidisciplinary teams to deliver robust, user-centered applications. Possesses complementary knowledge of system hardware, infrastructure, and cloud technologies, enabling well-rounded solution design and deployment.

WORK EXPERIENCE

ToursByLocals.com

March 2014 – July 2025

Remote / Vancouver, BC

- ToursByLocals.com is an online marketplace connecting travellers with local, independent tour guides around the world offering private and customizable tours tailored to individual interests.

Full Stack Developer: New stack and architecture | 2020 – 2025

- Led a comprehensive platform rewrite migrating from SQL to MongoDB/Mongoose NoSQL architecture.
- Rebuilt the web application using React, modern JavaScript, and a custom component library/design system.
- Developed GraphQL and RESTful APIs for consumer-facing and internal tools with optimized data fetching and caching.
- Integrated Adyen payment gateways for customer payments and semi-automated guide payouts, ensuring high security and compliance in financial processing.
- Established automated unit testing, continuous deployment workflows, and code review standards.
- Managed migration of infrastructure from on-premises servers to cloud hosting platforms.
- Collaborated closely with product, UX, and UI teams, and contributed to cross-functional decision making.
- Mentored junior developers, sharing best practices in code quality, database design, and system architecture.

Levelling Up, Modern Frontend & Backend, Cloud Exploration | 2019 – 2020

- Adapted rapidly to new technologies including React, ES6+, Angular, Vue, Next.js, and GraphQL.
- Explored cloud infrastructure with Amazon AWS and Google Cloud, applying learnings to support modern scalable solutions.
- Contributed to modernization strategies advocating for scalable and maintainable systems.

Full Stack Developer: Legacy system | 2016 – 2020

- Maintained a high-traffic e-commerce platform/marketplace built on Java, Apple WebObjects, HTML, CSS, and JavaScript.
- Collaborated directly with CTO in a two-person team managing backend and frontend development and infrastructure troubleshooting.
- Managed SQL database integrations and contributed to server administration, including hardware upgrades and use of Apple Remote Desktop for remote management.
- Led mobile-first responsive redesign of the customer website and transitioned source control to Git for improved development workflows.
- Developed end-to-end features including custom shopping cart and multiple payment processor integrations

handling millions in transactions.

- Trusted with confidential systems and financial data.

IT Support and Website Design | 2015 – 2016

- Managed office network hardware and IT infrastructure, providing installation, maintenance, and troubleshooting for improved operational efficiency.
- Delivered technical support to internal staff, diagnosing software and hardware issues.
- Designed and enhanced internal systems and customer-facing website interfaces through user research, UX optimization, and documentation.

Customer Support | 2014 – 2015

- Provided effective and timely support to external users of the platform, contributing to high customer satisfaction.

Cliffjumper Enterprises

January 2013 – December 2013

Delivery Driver

North and West Vancouver, BC

- Independently managed early morning delivery routes for newspapers, real estate brochures, and local magazines ensuring accurate distribution.

EDUCATION

Northampton College

September 2001 - June 2003

BTEC National Diploma in Information Technology

Northampton, United Kingdom

- Comprehensive training in hardware, software, networking and coding.
- Key contributor to college's transition from wired LAN networks to full Wi-Fi coverage.

SKILLS & INTERESTS

- **Technical Skills:** React, JavaScript (ES6+), Java, MongoDB, Mongoose, GraphQL, REST APIs, AWS, Google Cloud, Adyen and PayPal payment gateways and payouts, Git, Apple WebObjects, HTML, CSS
- **Soft Skills:** Reliable, trustworthy, adaptable, strong communication, collaboration, logical thinking, problem solving, quick learner, dedicated, loyal.
- **Interests:** Soccer, Swimming, Animals, Traveling, Music, Concerts.
