EXPERIENCE

Rogers Communications Canada Inc. / Ericsson Canada Inc.

Service Specialist, Wireless Voice Ops & Technical Expert
May 2022 - Oct 2025 | Brampton, ON / Mississauga, ON

- Transferred from Rogers Communications to Ericsson Canada in May 2025, continuing to operate and maintain Ericsson Voice Core IMS infrastructure.
- Operated and maintained Ericsson Voice Core IMS infrastructure, supporting VoLTE, VoWiFi, and 5G services. Managed VNF nodes like MTAS, CSCF, AAA, and SBC, and subscriber systems like HSS, HLR, and CUDB. Handled Cisco BroadWorks (BTAS) for telephony services, SBC for policy control, and 5G nodes like CCSM, CCDF, and PCF. Also maintained MSC and MGW from the legacy circuit-switched domain, and AFG for IMS media control for Rogers' network, serving approximately 11.7 million mobile subscribers.
- Utilized advanced diagnostic tools, including Iris NetScout, SAP BO, Dynatrace, and Splunk, to monitor and analyze Key Performance Indicators (KPIs) for performance and stability.
- Executed server software upgrades and system configurations, ensuring adherence to service level agreements (SLAs). Troubleshooted logged faults, identified root causes, and worked to minimize service disruptions.
- Collaborated with node vendors for troubleshooting, standby support, and root cause analysis (RCA), and conducted end-to-end node performance and service impact analyses before and after network modifications or changes.
- Executed national corrective activities, contributed to the development and optimization of system standards documented in Method of Procedure (MOP) guidelines, and performed lab testing to validate and refine proposed engineering solutions.
- Played a key role in migrating IMS components (CSCF, CUDB, HSS, VoWiFi (AAA), Cisco BTAS) to the Dynatrace Monitoring Platform to enhance system monitoring and performance tracking.
- Developed specialized monitoring scripts (Python/Shell) for the Wireless Voice Ops team and Rogers Network Operations Center (NOC) to facilitate proactive network monitoring of IMS nodes.
- Monitored and resolved alerts and trouble tickets related to the production network, provided technical support, managed tickets, and delivered 24/7 on-demand on-call support.

Ontario Ministry of Transportation

IT Systems Assistant (Labour and Transportation I&IT Cluster)
June 2020 - September 2020 | St. Catharines, ON

- Assisted in system integration analysis and user acceptance testing (UAT), ensuring smooth implementation and compliance with technical specifications.
- Conducted AODA-compliant accessibility audits for the Canada-Ontario Job Grant (COJG) and Employment Ontario websites, using WAVE, aXe, and SortSite. Identified accessibility issues and provided detailed remediation recommendations.
- Evaluated alternative technical solutions based on data analysis, recommending optimal strategies for system improvements.

EDUCATION

WILFRID LAURIER UNIVERSITY

Honours Bachelor of Science (BSc.) Computer Science
April 2022 | Waterloo, ON
GPA: 3.70 / 4.00

BRAEMAR COLLEGE

Ontario Secondary School Diploma (OSSD)
June 2018 | Toronto, ON

HONORS & AWARDS

Faculty of Science: Dean's Honour Roll 2020-21

Wilfrid Laurier University | Nov 2021 | Waterloo, ON

In-Course Scholarship

Wilfrid Laurier University | Oct 2021 | Waterloo, ON

COURSEWORK

Data Mining | Big Data | Algorithm Design and Analysis
Software Engineering | Artificial Intelligence | Database |
Image Processing & Recognition | Computer Networks

TOOLS

Splunk | VMware Workstation & Cloud Director
Microsoft Office Suite | SAP BusinessObject | NetScout
Iris Tektronix & Session Analyzer | Dynatrace | Wireshark | Remedy IT Service
Management - BMC Helix ITSM | Jira

SKILLS

BACK END DEVELOPMENT |

- Python • Shell Scripting

FRONT END DEVELOPMENT |

- HTML • CSS • SQL

SOFT SKILLS |

- Strong Collaboration & Vendor Management
- Quick Self-Learner & Adaptable in Fast-Paced Environments
- Results-Driven Problem Solver
- Effective Communication & Stakeholder Engagement
