EDUCATION

University of Waterloo

Bachelor of Math in Information Technology Management

Waterloo, ON

Sept. 2020 – Dec 2025

EXPERIENCE

IT Infrastructure Support & Systems Intern

Jan. 2025 – May 2025

Agropur

Woodstock, ON, Canada

- Upgraded **IDFs** and **MDF** by managing switch installs, removals, cabling, and UPS backups.
- Reduced ticket backlog by **30%** in 3 months by resolving 100+ **Jira** tickets by troubleshooting hardware, access rights, network drops, and **Active Directory** issues.
- Led a site-wide **printer** upgrade project(**20+ devices**), coordinating vendors, testing, and end-user training.
- Acted as the **primary Tier-4 support for 3 plants**, supporting systems directly tied to operational continuity.

IT Systems Administrator

May 2024 – Aug 2024

Independent Electricity System Operator (IESO)

Mississauga, ON, Canada

- Supported **1,000+ Windows and Linux servers** across physical and virtual infrastructure.
- Reducing manual maintenance by **60%**, by automating server cleanup with **PowerShell and Task Scheduler**.
- Audited 1000+ servers in Cherwell CMDB to correct OS errors for Linux/Windows, ensuring **95%** data accuracy.
- Improved security posture **20%** by automating **Windows patches** and documenting 100+ servers for NERC/non-NERC compliance.

IT Service Desk Analyst

Sep 2023 – Dec 2023

Gore Mutual Insurance

Cambridge, ON, Canada

- Delivered Tier I/II support for **Windows, macOS, VPNs, Microsoft 365, IAM and remote users**.
- Troubleshoot **200+ tickets/month** while maintaining SLA compliance and strong customer satisfaction.
- Cut on-boarding time by 30% by setting up 50+ users, inventory of 400+ assets, and removed obsolete equipment.

IT Support Specialist

Sep 2022 – Dec 2022

Regional Municipality of York

Newmarket, ON, Canada

- Deployed and supported **400+ endpoints** using SCCM, Active Directory, and Group Policy.
- Resolved **700+** hardware/software tickets in CMDB by providing deskside and remote support for Regional staff.

PROJECTS

NASA Space Apps Challenge - AI Weather & Event Impact Dashboard | Python, Flask, React Oct 2025

- Co-developed a full-stack data-driven dashboard using NASA Earth datasets to predict weather impact on events.
- Designed frontend dashboards and collaborated cross-functionally under hackathon time constraints.
- Built backend data pipelines in Python and APIs to ingest, transform, and visualize largescale geospatial datasets.

AI Voice Assistant | GPT-3, IBM Watson, HTML, CSS, JavaScript, Flask

Oct 2025

- Developed a AI voice assistant with 95% accuracy using **GPT-3** and **IBM Watson STT/TTS APIs**.
- Designed a **Flask**-based backend for API calls and used HTML, CSS, and JavaScript for seamless user interaction.

Casablanca Weather Data - ETL Automation (IBM/RedHat)

Aug 2025

- Automated **ETL** workflows using **Bash, curl, and cron**, doubling analytics efficiency (+100%).
- Implemented secure backup automation with **Linux** scripting and encryption, cutting manual errors by 90%.

Market Expansion Project (University of Waterloo) | PMP Credit, Agile, Jira, PMBOK

Dec 2024

- Led a 4-member **Agile** team to deliver a market expansion plan 2 weeks early (+25% efficiency).
- Applied market analysis and risk control to cut scope changes by 30% and deliver an exec-ready roadmap.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML, R

Security & ITSM: ITIL v4 Foundation, Patch Management, IAM, Incident Management, ServiceNow, Cherwell

Systems & Platforms: Windows, Linux (RHEL), macOS, Windows Server

Networking: TCP/IP, VLANs, Switching, Wi-Fi, VPNs

Security: Patch Management, Endpoint Security, Access Control, Incident Response

Tools and Libraries: PowerShell, Bash, SCCM, Microsoft 365, Entra ID (Azure AD), Intune, pandas, NumPy
