| Waterloo, ON, N2J 3M5 | [LinkedIn](#) | [GitHub](#) | (226) 883-2131 | Aarora9525@conestogac.on.ca |

TECHNICAL SKILLS

Programming Languages: C, C++, C#, JavaScript, Python, Assembly (basic understanding - coursework exposure)
Software Development: HTML, CSS, ASP.NET Core, React.js, Next.js, Flask, Fast API
Databases: SQL (MySQL, Microsoft SQL Server, PostgreSQL), NoSQL (MongoDB)
Software Testing: Unit (Jest, NUnit, MS Test), Automated (Selenium), API (Postman), Load (JMeter), SonarQube, Performance
DevOps: Git (Version Control), Docker, GitHub Actions (CI/CD), AWS(EC2, S3)
AI Development: LLM Integration, Computer Vision, RAG, LangChain, LangGraph, MCP, Fine Tuning, Deep Agents
IT Infrastructure: Computer Hardware Knowledge, Computer Networking, Virtualization, Linux Distros/Windows OS, Knowledge Of Kernel and OS Architecture, Troubleshooting, System Setup & Maintenance
Parallel Computing: Parallel Design, POSIX threads, Boost (C++), thread pools, OpenMP, Microsoft MPI
Others: API Dev & Integration, Object-oriented programming, System Design, JIRA, Collaboration, Agile, SDLC

EDUCATION

Bachelor of Computer Science (Honours)

Conestoga College, Waterloo, ON

Jan 2023 - Aug 2026 (Expected)

Current GPA: 3.53/4

PROFESSIONAL EXPERIENCE

Full-Stack & Infrastructure Engineer, SMART CENTRE, Cambridge, Ontario

May 2025 – Dec 2025

- Developed and deployed two internal websites using ReactJS for the front-end, and Flask for the back-end. These applications served as AI wrappers using Retrieval-Augmented Generation to deliver accurate answers from a collection of internal documents.
- Hosted LLM models on physical servers, ensuring optimal GPU utilization, and built a customized user interface that enabled employees to interact with the models. Features included image generation, video generation, multi-model response, and web search.
- Managed and optimized lab-wide IT infrastructure by troubleshooting network issues, coordinating hardware across multiple research projects, and configuring Linux/Windows servers with virtualization to support computational research needs.
- Diagnosed and resolved server and device issues, ensuring seamless operations in the lab. Developed many Power Automate Workflows to streamline IT processes. Led server admin tasks and monitored the server to ensure performance and reliability.

Creator & Technical Lead, TalentHeads, Venture Lab for Tech (CEC), Waterloo, Ontario

Sept 2025 – Present

- Building an all-in-one AI-powered hiring platform focused on technical roles - featuring an intelligent ATS, AI-driven pre-interview assessments (rubric-based), and interview module with an integrated AI assistant for HR and technical interviewers.
- My vision is to leverage Artificial Intelligence to make hiring workflows automated with human in the loop from initial screening to final interviews making entire workflow faster, fairer, more efficient, and scalable.
- Architecting and developing the platform end-to-end across frontend (Next.js, Tailwind), backend (FastAPI, PostgreSQL, Redis, Neo4j), and AI systems (LangChain, LangGraph, OpenCV, MediaPipe, GraphRAG using open source LLMs via Ollama and Groq).

Executive Lead, Google Developer Group - on Campus, Waterloo, ON

Sept 2025 – Present

- Collaborated with the executive team to organize large-scale educational workshops and events for a community of 1000+ members, leading weekly meetings to plan, coordinate, and promote hands-on learning in emerging technologies.
- Conducted technical workshops and sessions focused on Data Science, Software Development, and Agentic AI systems - demonstrating how data-driven models can integrate with autonomous AI workflows to build intelligent, adaptive systems.

Web Developer, Seneca Hackathon IT Team, Toronto, Ontario

Jan 2025 – Mar 2025

- Developed front-end using React.js + Next.js with Tailwind CSS, collaborating with back-end developers and utilizing an SQL DB using Supabase to timely and efficiently deliver the full-stack website for [Seneca's 2025 Food Hackathon](#).
- Worked in an agile environment, attending sprint meetings, conducting code reviews, and giving feedback to ensure scalability, maintainability, and robustness of the website, ensuring it aligns with hackathon goals.

Web Chat Advisor, Webhelp India Pvt. Ltd., Gurugram, India

Oct 2022 - Nov 2022

- Delivered web chat customer support on business software, resolving over 150 queries daily, managing 5 concurrent chat sessions.

ACADEMIC PROJECTS

NoteSync, Collaborative Note-Taking Desktop Application

Nov 2023 – Dec 2023

- Worked as part of a 5-member team to develop a collaborative application where multiple users can interact on a shared canvas using drawing board stylus pens, text, and images. Implemented a server using C# and WebSocket to enable packet-based communication, managing multiple user sessions while maintaining synchronization and updates for all users.
- Conducted unit testing (NUnit), automated testing (TestComplete), load testing (Apache JMeter), & usability testing.
- Skills: C#, WebSocket, WPF.NET, Network Programming, Load Testing, Automated Testing.

Smart Home Automation Web Application

Sept 2024 – Dec 2024

- Led a team of 5 students and collaborated with over 30 people in my class to build an Enterprise Home Automation Web Application using ASP.NET in an Agile/Scrum environment using Project Management Tools like Azure DevOps and MS Teams.
- Our team of five members implemented business layer functionality and a REST API for Portal application of the project to enable communication with other services of application like database system (SQLite) and web user interface.
- Wrote technical documents and used tools like MS Teams for communication, posting project documents, Azure DevOps for sprint planning, managing sprint backlog, used Git for Version Control, Used Docker to containerize the application.
- Skills: ASP.NET, C#, OOP (object-oriented programming), Azure DevOps, APIs, Docker, Writing Technical Documentation, Agile.
