

Sougal Bouh Ali, M.Eng.

sougal.bouhali@outlook.com | 613-222-3299

Software Engineer with a global mindset and 10+ years of experience delivering secure solutions.

Higher Education

Carleton University, Ottawa, Canada

- **Master of Engineering (M.Eng.):** Technology Innovation Management [09/2017 – 06/2019]
- **Bachelor of Engineering (B.Eng.):** Software Engineering [09/2012 – 06/2016]

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C/C++, C#, SQL, Bash

Frameworks: Node.js, NestJS, React, Django, Flask, J2EE, .NET

Cloud & DevOps: AWS, Docker, Terraform, Jenkins, Git, Azure DevOps

Testing & QA: Jest, Mocha, JUnit, Selenium, IBM RFT/RPT, CI/CD pipelines

Professional Experience

IT Project Manager [Remote] | World Bank Consultant, Djibouti, Djibouti [01/2020 – 11/2025]

- Lead Consultant on World Bank's PAMAP program for Djibouti's public sector digital transformation.
- Advised on technology selection for Djibouti's e-Government infrastructure, managing and delivering 2 large-scale IT projects (i.e. interoperability and digital identity systems) with international partners.
- Coordinated cross-functional teams using agile practices to ensure end-to-end delivery of cloud-based implementations by prioritizing, developing risk frameworks and training plans for national rollout.

Programmer/Analyst [Hybrid] | Government of Canada, Gatineau, Canada [07/2017 – 12/2019]

- Led features (APIs) development (using Kotlin, Java, React, TypeScript, SQL Server etc.) for the school's e-Learning platform (used by 10,000+ DAU), and supported R&D of next-gen digital learning tools (AI).
- Implemented CI/CD pipelines (with Jenkins, K8s etc.) to automate testing and deployment of courses, integrating security/privacy compliance checks into the delivery workflow for continuous governance.
- Mentored junior engineers and streamlined agile workflows, resulting in improved code consistency.

Innovation Researcher [Remote] | Carleton University, Ottawa, Canada [09/2017–12/2017]

- Collaborated with analysts and engineers to guide client in deploying digital transformation strategies and designing engines that convert innovation into measurable system-level results, closing R&D gaps.

Programmer/Analyst | Government of Canada, Ottawa, Canada [04/2017 – 07/2017]

- Assessed clients' complex business requirements, enterprise architecture, and adjacent limitations to identify and recommend a scalable and modern solution for improving access to government records.
- Implemented CEAA's registry on a secure digital service platform (using .NET, C#) hosted on canada.ca

Programmer/Analyst | Government of Canada, Gatineau, Canada [06/2014 – 04/2017]

- Built microservices (Go) and integrated test automation pipelines into modern ALM (CI/CD) processes.

Geospatial Developer [Remote] | Carleton University, Ottawa, Canada [09/2013 – 09/2016]

- Architected geospatial databases in PostgreSQL/PostGIS that ingest 40+ GBs of SAR imagery per week.
- Built geospatial tools and APIs in Python, C++ (GDAL/OGR) to automate data processing and analysis.

Technical Support II | IBM Consultant, Gatineau, Canada [04/2014 – 06/2014]

IPTV Network Specialist | Bell Canada, Ottawa, Canada [12/2011 – 09/2012]

Technical Support | University of Ottawa, Ottawa, Canada [09/2010 – 09/2011]

Bilingual (EEE)
