Professional Summary

Personable and technically skilled IT professional with 6+ years of experience supporting clients, staff, and enterprise teams through a blend of frontline service and technical problem-solving. Proven ability to deliver Microsoft 365 and SharePoint solutions, while building trust through clear communication and reliable support. Recent roles in customer-facing environments have sharpened responsiveness, multitasking, and empathy—strengths now fueling a return to IT in a user support or cloud-focused capacity. Actively certified in Microsoft Azure (AZ-900) and pursuing A+ and AZ-104 to expand technical depth.

Skills & Strengths

- **Technical Support & Troubleshooting:** Skilled in resolving hardware, software, and account-related issues across Microsoft 365, SharePoint, and Windows environments.
- **Client & End-User Communication:** Adept at supporting customers and internal staff via phone, email, and SMS (Kenect), with a focus on clarity, professionalism, and empathy.
- **Microsoft 365 Ecosystem:** Proficient in SharePoint Online, Teams, OneDrive, Forms, Outlook, and Power Automate; experienced in document management and team collaboration tools.
- **Cloud & Systems Knowledge:** Microsoft Azure (AZ-900 Certified), Windows Server, Active Directory, PowerShell, and basic Linux command line; currently pursuing AZ-104 and CompTIA A+.
- **Customer Service & Operations:** Developed high-volume support and task coordination experience through frontline order fulfillment, return processing, and logistics communication.
- **Process & Workflow Optimization:** Focused on improving team efficiency and user experience through SOP documentation, practical problem-solving, and cross-team collaboration.

Professional Experience

GP Bikes Inc. – Online Customer Service Associate | Mar 2025 – Present

Deliver multi-channel support and e-commerce coordination for one of Ontario's largest motorcycle retailers, bridging customer service with technical order operations.

- **Customer Support:** Assist customers via phone, email (shared inbox), and SMS (Kenect), resolving product inquiries and order issues with clarity and care.
- **Vendor Coordination & Inventory Checks:** Verify stock, backorders, and superseded/discontinued items using B2B vendor portals to ensure accurate order fulfillment.
- **Order Processing:** Pick and fulfill online and manual orders from in-store inventory; collaborate with vendors and shipping/receiving to manage logistics.
- **Cross-Team Collaboration:** Coordinate with warehouse, purchasing, and showroom teams to maintain order flow and deliver smooth customer experiences.
- **Technical Tools:** Daily use of Powertrack (Putty-based), Adobe Magento, SimpleParts, and Kenect for inventory management, OEM parts, and communication workflows.

Long & McQuade – Material Handler | Feb 2024 – Jan 2025

Managed shipping and receiving operations for musical instruments and gear, ensuring accurate order handling across a 100+ store national network.

- **Order Fulfillment:** Picked, packed, and staged 30–40 retail orders per shift using detailed packing lists and inventory protocols.
- **Inventory Coordination:** Verified item quantities, weight distribution, and store-specific handling preferences to maintain shipping accuracy.
- **Shipping & Receiving:** Worked alongside logistics teams to ensure timely movement of incoming and outgoing stock across Canada-wide locations.

- **Process Accuracy:** Maintained consistency and quality control under minimal supervision, supporting fast-paced daily workflows.
- **Systems & Tools:** Gained hands-on experience with warehouse systems and structured task prioritization in a national distribution environment.

KPMG Canada – Senior Collaboration Analyst, Digital Workplace | Jun 2017 - Aug 2023

Drove digital transformation and collaboration initiatives for 40,000+ users across KPMG Canada. Specialized in SharePoint migrations, Microsoft 365 adoption, and end-user enablement through tailored solutions, training, and ongoing support.

- **Digital Transformation & Cloud Adoption:** Modernized legacy systems through SharePoint Online, Teams, and Power Automate, replacing manual processes with scalable digital solutions.
- **Migration Expertise:** Led multi-phase migrations from SharePoint 2007 to 2013 and then to SharePoint Online, ensuring metadata integrity, access control, and minimal disruption.
- **Microsoft 365 & SharePoint Solutions:** Built and maintained sites, document libraries, workflows, and team-based collaboration hubs tailored to departmental needs.
- **Data Compliance & Governance:** Ensured metadata structures, user permissions, and storage practices adhered to firm-wide confidentiality and compliance standards.
- **User Support & Cross-Team Collaboration:** Resolved technical issues related to indexing, access, and content structure while liaising with business units to align systems with operational needs.

Formal Education

Durham College – Computer Systems Technology (Advanced Diploma) | Sept 2016 - April 2019

Completed a three-year program focused on practical IT infrastructure, technical support, and system administration. Gained real-world experience with enterprise tools and client-facing service skills.

Key Technical Areas:

- **Networking & Security:** Cisco networking, subnetting, firewall configuration, basic cybersecurity
- **Systems Administration:** Windows Server 2012 R2, Active Directory, and Linux system administration
- **Hardware & Configuration:** PC hardware diagnostics, system building, and performance optimization
- **Programming & Scripting:** Advanced programming in C#, and scripting using PowerShell and Bash

Certifications & Professional Development

- **Microsoft Certified: Azure Fundamentals (AZ-900)** – Achieved Feb 2021
- **CompTIA A+ Certification** – In Progress
- **Microsoft Certified: Azure Administrator Associate (AZ-104)** – Planned (2025)

Technical Skills

- **Microsoft 365 Suite:** SharePoint Online, Teams, OneDrive, Forms, Power Automate
- **Operating Systems:** Windows Server (2012+), Windows 10/11, basic Linux CLI
- **Systems & Tools:** Active Directory, PowerShell, Kenect, Powertrack, Adobe Magento, SimpleParts
- **Networking:** TCP/IP, DNS, DHCP, Subnetting, Cisco fundamentals
- **Programming & Scripting:** C#, PowerShell, Bash
- **Cloud Platforms:** Microsoft Azure (AZ-900 Certified), currently preparing for AZ-104
- **IT Support & Service Management:** ServiceNow ticketing system, email troubleshooting, inventory/order processing, remote user support

Professional Recognitions

- Honoured with Durham College's Academic Award and placement on the Honour Roll for consistent excellence in the Computer Systems Technology program
- Publicly praised in a 5-star Google review at GP Bikes for professionalism and resolving a customer issue with care and efficiency
