

Gursimran Singh

👤 Profile

Skilled **SCCM and Microsoft 365 Engineer** with 3.5 years of experience in **application packaging, patch management, OS deployment, and automation**. Proficient in **PowerShell, Python, and SQL** for scripting and reporting to improve operational efficiency. Experienced in managing **SCCM, Intune, and CMG** for hybrid device management, troubleshooting client-side issues, and ensuring compliant deployments. Strong collaborator with cross-functional teams using **Jira, Confluence, and Power BI** to enhance transparency and delivery.

📁 Employment History

Technology Analyst – SCCM Packaging & Microsoft 365 Automation at Infosys Limited, Thiruvananthapuram

Jul 2020 — Dec 2021

- Designed, packaged, and deployed enterprise applications using **SCCM, Intune Win32, and MSI frameworks**, ensuring compliance with IT policies and security baselines.
- Led the automation of **SCCM deployment and validation workflows** using **PowerShell** and **Python**, reducing repetitive manual tasks and accelerating release cycles.
- Built and optimized **SQL queries** to extract operational metrics on package success rates, patch compliance, and system readiness.
- Created and deployed **task sequences** for operating system rollouts, applying custom PowerShell pre-check and remediation scripts to handle client-side errors.
- Provided **Level 3 support** for deployment failures, PXE boot issues, and SCCM client communication errors, driving root-cause analysis and long-term remediation.
- Partnered with infrastructure teams to manage **Alternate Content Providers (ACP)** and optimize content distribution efficiency.
- Supported **hybrid device management** initiatives through **Intune and SCCM integration**, ensuring consistent configuration and compliance across environments.
- Developed **Excel and Power BI dashboards** for patch status, migration tracking, and compliance visualization, improving stakeholder insight.
- Documented packaging processes, task sequence logic, and automation frameworks in **Confluence**, supporting knowledge transfer and audit readiness.
- Mentored junior analysts on **PowerShell scripting, SCCM troubleshooting, and application packaging** to strengthen team capability and delivery speed.

Microsoft Planner

Systems Engineer – Microsoft 365 & SCCM Infrastructure at Infosys Limited, Thiruvananthapuram

Aug 2018 — Jun 2020

- Administered and maintained **Microsoft SCCM infrastructure**, overseeing distribution points, site roles, and boundary groups to ensure stable package and update delivery across the enterprise.
- Designed, deployed, and troubleshooted **SCCM applications, packages, and task sequences** for Windows OS deployment and patch management.
- Created and automated **PowerShell scripts** for packaging, deployment, and post-install validation, improving operational efficiency and reducing manual workload.
- Supported **monthly patch cycles** by deploying and validating cumulative updates, resolving compliance gaps, and addressing endpoint update failures.
- Investigated and resolved **PXE boot and client communication issues**, ensuring successful task sequence execution and endpoint health.
- Configured and maintained **Cloud Management Gateway (CMG)** to enable remote device management and optimize bandwidth usage.
- Integrated **Microsoft Intune** with SCCM for hybrid device management, aligning with modern workplace and mobility strategies.
- Developed **custom reporting and dashboards** in Power BI and SQL for patch compliance, package success rate, and device health visibility.
- Authored **technical documentation and SOPs** for SCCM deployments, packaging standards, and incident remediation workflows.
- Collaborated with cross-functional IT teams to align SCCM operations with corporate governance, ensuring secure and compliant deployments.
