Personal Insight

A creative from Ontario, Canada. Often making new AI components for a system, to game instrumentals or media sounds for the next big brand. I have opened a newfound and enjoying interest in CyberSec! Worked on many startup companies with Media Music, UI & FX and much more AI related startups! A very curious and persistent person who always finds ways to complete tasks given.

Core Skills

- **QA Testing** – Functional, UI, and performance testing for pre-release builds
 - **AI Development** – Designing, building, and integrating AI-powered software solutions by coding algorithms, modeling and testing
 - **Bug Reporting & Documentation** – Systematic issue tracking, Stress Testing and feedback delivery
 - **API & Automation Support** – Discord Bot testing, AI-based sound triggers
 - **Critical Thinking & Troubleshooting**
 - **Collaborative Remote Workflow** (Trello, Discord, GitHub, Google Workspace)
-

Professional Experience

CyberSecurity & AI Elements (University of Helsinki, Finland)

Online | Dec 2024 – Nov 2025

- Learned, Tested & Developed Malware, Breaches, TCP, IP, Encryption Algorithms, Cryptographic Attacks, STRIDE Threat Model and DREAD risk assessment model
- Identified software issues, Botnets, DDos Guard and Data Theft tools.
- Investigated APT Actions, UDP Layers & DPI

Professional Summary

Detail-oriented AI Developer, QA Tester Experienced in testing pre-release builds, diagnosing bugs, and optimizing both user experience and audio fidelity. Combines a strong technical background with artistic precision to deliver reliable, high-quality results in remote team environments.

Education

University Of Helsinki - CyberSecurity ECTS Certificate . Nov 2025

University Of Helsinki - Elements of AI ECTS Course Diploma . Nov 2025

High School Diploma – Agincourt Collegiate Institute . Jun 2023

Milestones

Contributed to high-fidelity AI and QA workflows for multiple online projects

Tools & Platforms

Gemini | OpenAI | GitHub | Trello | | Python | Luau | Claude

QA & Beta Tester – GameReady Research (NVIDIA)

Remote | Jun 2022 – Jun 2024

- Tested GPU driver builds and provided detailed QA documentation.
- Identified software bugs and collaborated with developers for fixes.
- Conducted stress testing for performance and stability metrics.

Bot/API QA Analyst – Discord

Remote | 2021 – Present

- Integrated AI-driven automation tools for audio moderation and quality testing.
- Conducted backend QA on audio playback and REST API endpoints.
