EXPERIENCE AND DEMONSTRATED SKILLS

White Glove IT, Victoria

Jan 2025 – Sept 2025

IT Systems & Network Specialist (Contract)

Provided full-spectrum IT support for several hotels, managing 100+ workstations. Worked across system administration, network administration, troubleshooting, and automation to ensure reliable IT operations and efficient on-boarding for hotel staff.

- Administered Windows servers and Active Directory, managed Group Policy for user accounts and printer/file services, and maintained network infrastructure (firewalls, VPNs, Wi-Fi) and resolved outages and equipment failures.
- Transformed operational needs into Python and PowerShell scripts by leveraging AI coding tools to accelerate development; provided design direction and ensured quality through line-by-line review and testing before integrating into domain startup/login processes to minimize manual workstation visits.
- Assisted staff with all tickets, including but not limited to, Password resets, Software & Hardware issues, Outlook setting optimization, MFA setup; collaborating with the IT Solutions Architect to plan projects, document procedures and uphold security best practices.

Camosun College, Victoria

May 2024 - Sept 2024

IT Security Co-op

Contributed to security operations, participated in meetings, and monitored threats. Supported network layout and explored security tools and best practices

- Participated in meetings on security operations with local teams and industry leaders, gaining insights into cybersecurity practices and collaboration
- Used security dashboards (Microsoft Defender, CrowdStrike Falcon, Cisco Umbrella) to monitor threats, secure endpoints and network traffic, and test malware in sandboxes
- Worked with the network team to manage physical network layout, including access points and cables, ensuring secure configuration and protection from interference
- Conducted independent studies on Kali Linux, focusing on penetration testing tools like Metasploit and Nessus, explored Microsoft's SC-900 course, and researched encrypted disk images for secure data storage

e2 Electrical Engineering, Victoria

Jan 2023 - Sept 2023

Office Administrator

Provided financial, administrative and clerical support to the organization

- Ensured all vendor and utility accounts were paid and operating efficiently
- Drafted, created, and shipped engineering document schedules for all active projects
- Set up computers, installed required software, and prepared workstations for employees

Vessel Meats, Dartmouth

Aug 2019 - Dec 2021

Customer Service / Cook / Administration

Assisted a small business owner in most aspects of operating their butcher shop

- Created value added foods made from locally sourced meats and produce
- Aided & educated customers on products that would best suit their needs, while increasing sales
- Managed payroll, and benefits for employees, as well as training new employees in various tasks
