Education

- MBA from UNB, Canada | CGPA 3.9
- Bachelor of Engineering from MDU, India | CGPA 4.0

Licenses and certifications

- Google Certified Cloud Professional Architect.
- MuleSoft Certified Solutions Architect
- PMP Certified Practitioner in Project Management.
- Salesforce Certified Administrator
- CISM Certified Manager
- MuleSoft Certified API Designer
- MuleSoft Certified Integration Associate
- Oracle Certified Java Web Services Expert
- Oracle Certified Java Web Component Expert.
- Sun Certified Java Programmer

Appreciation for Product

Fast Payments - 2016 (ISO 20022)

Appreciations from Clients

- Desjardins, Canada
- Manitoba Insurance, Canada
- TIAA-CREF, USA
- Deutsche Bahn, Germany
- ACH, USA
- FedEx, USA
- Deutsche Bank, USA
- Toll Logistics, Australia

Awards

- Received Desjardins Impact Awards March 2023
- Team GEM Award from Logistics Client in May 2016.
- Performer of Month from Airlines Client in Feb 2015.
- Certificate of Excellence from German Railways in 2012.
- Best Performer for Quality Work from eCommerce client - Dec 2007
- Successfully won intra-college cricket championship in 2005 and awarded as "Player of the Series".
- Silver Medal in inter-school Badminton championship 1995.

Background

- Amit Arora is a seasoned technology leader with over 22 years of experience delivering secure, scalable solutions across hybrid and multi-cloud environments, specializing in MuleSoft, Salesforce, Google Cloud, AWS, and Microsoft Azure. He consistently aligns architectures with PCI DSS, GDPR, and SOC-2 compliance, blending strategic program leadership with hands-on execution to drive modular, business-aligned outcomes. His expertise extends to ISO-20022 payments integration, Terraform, Docker, Kubernetes, Spring Boot, RESTful APIs, Microservice, enterprise-grade architectures, and a trusted advisor for organizations seeking to balance compliance, and operational resilience.
- Proficient in liaising with multiple stakeholders & senior leadership to optimize processes, facilitate sound decision-making, streamline operations & deliver business value to clients.
- Strong capabilities to translate business needs into effective projects to improve operational processes, reduce costs, and increase customer satisfaction.
- Proven experience in managing complex and concurrent projects from start to finish LinkedIn with over 40+ team members, including offshore resources.
- Organized, detail-oriented with proactive and hardworking nature.
- Domains: Travel Transport & Logistics, Insurance, Banking & Health Care

Professional Experience

KPMG LLP, Canada - Senior Director / Senior Technical Manager (May 2022 – May 2025)

Duties and Accomplishments

- Managed projects on key strategic business & technology issues with large-scale transformation programs in Cloud areas for different clients like insurance, etc.
- Managed solutions architecture strategies and contributed heavily to the product development lifecycle of both cloud projects and customer-facing solutions.
- Led cross-functional teams in delivering AI-enabled digital transformation across enterprise environments, with operational scalability, governance, and AI practices.
- Managed different architects for finalizing solutions on various projects on MuleSoft, Salesforce, Google Cloud & Spring Boot.
- Hired quality talent for various cloud architects, customer success, sales, marketing, functions analytics and drove onboarding plan with various delivery teams, and partners.
- Coordinated steerco management, cross-functional teams and helped businesses to prioritize requirements and life cycle stages according to technical complexities.
- Led clients in Canada, India, USA, & implemented expansion/growth strategy.
- Help customers in the region be successful with cloud, microservices & build partnership with Consulting, success stories, case studies, system integration & niche partners.

Dyeleaf Ltd, India – Managing Director (Apr 2019 – May 2022)

Duties and Accomplishments

- Involved in signing MoU, creating Statements of Work (SoW) and RFP documentation.
- Led cross-functional teams on various cloud-based application development and implementation including release management, performance, and operations strategy
- Orchestrated organization-wide security initiatives, including training sessions, awareness drives, and targeted communications to strengthen security culture.
- Partnered with enterprise compliance and security teams to ensure platform alignment with key regulatory standards: PCI DSS, GDPR, and SOC 2.
- Guided technical direction for cloud architecture, migration, and security standards
- Cultivating long-term client relationships and ensuring satisfaction across accounts
- Recruiting, mentoring, and retaining top talent to build a high-performing consulting team

Cognizant, USA - Solutions Architect (March 2017 – April 2019)

Duties and Accomplishments

- Managed software architecture strategies and contributed heavily to the product development lifecycle of both cloud projects and customer-facing solutions.
- Managed a complex project from start to finish, ensuring timely completion and exceeding client expectations.

Skills

Management: *Leadership, Strategic Planning, Operations Management, Project Management, Customer Engagement, Risk Management, HR Management and Negotiations*

Clouds: *MuleSoft, Salesforce, Google Cloud, AWS, Azure*

Architecture: *ArchiMate, Sparx EA, Lucid Chart, Draw.io, PlantUML, Xmind*

CRM: *Salesforce*

IAC: *Terraform, Cloud Formation*

Web Services: *SOAP, RESTFUL*

CI/CD: *Jenkins, Cruise Control, Maven, Artifactory, GitHub*

Artificial Intelligence : *Einstein AI, Palantir AIP, LangChain, LangGraph*

Containerization *Kubernetes, Docker*

Languages: *Java, JavaScript, jQuery, Servlets, JSP, JSTL, Python, Angular, Apex, Aura, LWC*

Log Monitoring: *Splunk, ELK*

Frameworks: *Spring Boot, Struts, Hibernate*

Web Technologies: *HTML5, CSS3,*

IAM: *Azure AD, Okta, Secret Manager, CyberArk, SSO, MFA, Open LDAP, OAuth2, JWT, SAML*

Volunteer Experience

Blood Donation Camp Organizer

Indian Red Cross Society IRCS

(National Headquarters, New Delhi India)

- German

- Designed solutions on various clouds as per the requirements for business processes.
- Led the development of all cloud-based services for banking and insurance vendors.
- Managed deployment with cross-functional teams in development, staging and testing environments.
- Coordinated and helped business and functional teams to prioritize user requirements and stories according to technical complexities.

Deloitte LLP, USA - Integration Architect (October 2016 – March 2017)

Duties and Accomplishments

- Responsible for product management on fast payment – handled cross functions teams and delivered designing solutions using MuleSoft APIs for business processes.
- Designed solutions as per ISO 20022 standards as per product requirements.
- Managed design of system architecture including defining technical design and governance rules and handling cross functional teams for MuleSoft Cloud projects.
- Resolved technical issues through debugging, research, and investigation.
- Identified various data sources and transformation required as per client requirements.

HCL America Inc, USA - Technical Lead (July 2014 – October 2016)

Duties and Accomplishments

- Managed complex project with continuous integration and deployment throughout all SDLC phases for the implementation and development of middleware services, transformation, and routing flows with existing systems and standards of compliance.
- Led compliance assessments on designed MuleSoft architecture. Managed architectural engagements for varying size enterprise architectures and executed limited POC.
- Responsible for understanding requirements with stakeholders, defining scope, mentoring, supervising, and leading a team of developers both onshore and offshore.
- Interpreted business and technical requirements into application design and technical artifacts documents.

Coforge Ltd, India - Integration Architect (January 2012 – March 2014)

Duties and Accomplishments

- Managed projects through careful collaboration with key stakeholders
- Delivered project for German Railways migrating legacy applications to Spring Boot.
- Designed and deployed scalable microservices using Spring Boot, enabling modular architecture and seamless integration across cloud and enterprise platforms.
- Led the end-to-end lifecycle of RESTful APIs, including design, documentation, security enforcement, and version control for distributed systems.
- Architected dynamic front-end solutions using AngularJS, integrating with backend services to deliver responsive, cross-platform user experiences.
- Involved in designing, developing, coding, debugging, and reviewing applications.
- Resolved technical issues through debugging, research, and investigation.
- Managed cross functional teams to ensure that issues were handled simultaneously.
- Provided technical estimates for development efforts and solutions to requirements.

TELUS International - System Analyst (August 2008 – November 2011)

Duties and Accomplishments

- Responsible for meeting with stakeholders regularly to design and understand the project scope and led a team of developers both onshore and offshore as per artifacts.
- Designed and developed web services using Spring, Struts, Hibernate, JSP, JavaScript, and jQuery, aligned with system design and integration requirements.
- Participated in deliveries as per sprint plans throughout all phases within SDLC.
- Improved the overall delivery process by introducing a feasible technology stack.
- Worked closely with Solutions and DevOps Architects on design and development.

Abacus Desk IT Solutions, India - Manager (January 2003 – August 2008)

Duties and Accomplishments

- Managed cross-functional teams, project deliveries and cybersecurity compliance.
- Met with clients to discuss system requirements, specifications, costs, and timelines.
- Recruited and supervised computer analysts, engineers, programmers, and other personnel and oversaw their professional development and training.
- Managed project SDLC stages by leading a team of developers, penetration testers, architects, and designers.
