

Anton Slipchenko

Cybersecurity Analyst

tonyslp101@gmail.com

www.linkedin.com/in/tony-slipchenko/

PROFESSIONAL SUMMARY:

Cybersecurity Analyst with over 4 years of experience in MSSP and SOC operations, specializing in threat detection, triage, and incident response across hybrid and multi-cloud infrastructures. Proficient in enterprise SIEM, SOAR, and EDR platforms, with hands-on expertise in Splunk, Microsoft Sentinel, CrowdStrike Falcon, SentinelOne, and Microsoft Defender. Skilled at correlating security events and pivoting across endpoint, network, and cloud telemetry to identify root causes and reduce false positives. Experienced in leveraging OSINT and automation to streamline investigations, improve enrichment workflows, and strengthen threat intelligence. Recognized for clear communication, structured documentation, and effective collaboration with IR, DE, and client teams.

CORE COMPETENCIES:

- Tier 2 SOC Monitoring & Escalation
- Incident Triage & Threat Investigation
- SIEM: Splunk, Microsoft Sentinel
- SOAR: Torq, Cortex XSOAR
- EDR: CrowdStrike, SentinelOne, Defender
- OSINT & IOC Enrichment
- Cloud Security: Azure, AWS, GCP
- MITRE ATT&CK Use Case Mapping
- Playbook & SOP Documentation
- ServiceNow Case Management
- PowerShell, Regex, JSON Analysis

PROFESSIONAL EXPERIENCE:

Cybersecurity Analyst II

Deepwatch Inc. - Remote (Global Clients)

May 2021 - September 2025

- Investigate and triage a high volume of security alerts annually across global client environments using Splunk ES and Microsoft Sentinel, with escalations managed in ServiceNow.
- Develop custom correlation searches in Splunk to enhance the detection of brute force attacks, credential misuse, and endpoint anomalies.
- Maintain a structured daily documentation system for investigations, enabling transparency and smoother IR handoff.
- Correlate data across EDR platforms (CrowdStrike, SentinelOne, Defender) and pivot into network and cloud logs for threat validation.
- Build and maintain SOAR playbooks in Torq and Cortex XSOAR, automating IOC enrichment and context tagging to reduce MTTR by 30%.
- Escalated enriched cases to client IR teams, achieving a 74% true positive rate with multiple validated pentests and simulated attack scenarios.
- Authored and maintained triage procedures, enrichment SOPs, and MITRE-aligned playbooks to standardize SOC processes.

- Collaborate with IR and client teams to ensure accurate threat resolution and effective containment strategies.

Key Metrics:

- Handled a consistently high volume of SIEM/SOAR alerts in a multi-tenant MSSP environment, maintaining investigation quality under pressure.
- Escalated threats with a 74% true positive validation rate, including confirmed red team and pentest activities across multiple client environments.
- Maintained a 15.7% escalation precision rate, reflecting above-average analytical accuracy and effective alert tuning.
- Contributed to overall SOC maturity by developing correlation rules, playbooks, and enrichment SOPs used across teams

EDUCATION:

- **Western Governors University** Bachelor of Science - Cybersecurity and Information Assurance (*in progress*)
- **CyberBit** - Live Range Simulation Platform
- **Syntax Technologies** - Cybersecurity Analyst Hands-On Training Program

CERTIFICATIONS:

Current:

- CompTIA A+
- CompTIA Security+
- CompTIA CySA+

Planned (2025-2026):

- CCFA - CrowdStrike Certified Falcon Admin
- SC-200 - Microsoft Security Operations Analyst
- CISA - Certified Information Systems Auditor
