WORK EXPERIENCE

Good Spirit School Division

Yorkton, SK

Software Developer

Sep 2024 - Present

- Designed, built, and deployed a scalable online student registration platform serving 27 schools, supporting concurrent submissions, secure authentication, and administrative review workflows, reducing enrollment-related administrative workload by 40%
- Engineered and deployed software solutions that automated repetitive workflows, reducing process time from ~2 hours to under 20 minutes and significantly lowering manual effort.
- Partnered with infrastructure and systems teams to develop tooling and deployment workflows that improved division-wide device rollout efficiency by 50%, reducing setup errors and post-deployment issues.

Good Spirit School Division

Yorkton, SK

Network Technician Intern

Sep 2022 - Sep 2023

- Implemented targeted upgrades and troubleshooting protocols in collaboration with technical teams, resulting in a 20% increase in network performance metrics across the division.
- Collaborated with Database Administrators to improve cross-system student data integration pipelines, reducing reconciliation time by 40% and enabling seamless year-over-year school data rollovers.
- Improved diagnostic and support processes, increasing issue resolution speed by ~40% in diverse educational environments.

PROJECT EXPERIENCE

Good Spirit School Division

Online Student Registration System (Full-Stack)

- Developed a production-grade, full-stack online student registration system using React and Laravel, deployed division-wide and actively used by 27 schools, improving accuracy and eliminated manual form processing.
- Implemented role-based access control, server-side validation, Azure AD authentication, and RESTful APIs to ensure secure data handling and reduce invalid submissions.
- Website: [GSSD Registration Form](#)

Freelance

School Attendance System (NFC-Based)

- Designed and built an NFC-based attendance system integrating hardware scans with a Python (Flask) backend to enable real-time attendance tracking.
- Created an administrative dashboard providing attendance analytics, reporting, and user management, demonstrating end-to-end system design from hardware integration to data visualization.
