

---

**PROFESSIONAL PROFILE**

---

Senior Data Scientist and Software Engineer with 10+ years of experience building AI-driven solutions across telecom, e-commerce, and enterprise systems. Specialized in **machine learning, deep learning, and big data engineering** with a proven record of delivering scalable predictive models, real-time monitoring tools, and NLP systems that enhance business performance. Skilled in leading cross-functional teams and transforming complex datasets into actionable insights.

---

**KEY SKILLS**

---

- Machine Learning & Deep Learning (TensorFlow, PyTorch, Keras, Scikit-learn)
  - Natural Language Processing (NLP, RAG, LLM)
  - Computer Vision (Image Processing and Segmentation Techniques, CNN, RNN, LSTM, YOLO, Faster R-CNN)
  - Data Engineering & Big Data (PySpark, Hadoop, Kafka, Cassandra, PostgreSQL)
  - Cloud & APIs (AWS, Docker, RESTful APIs, Flask, Django)
  - Programming (Python, Java, C/C++, Native, JS, SQL, MATLAB)
  - Data Visualization (Tableau, Seaborn, Matplotlib, Plotly)
  - Leadership & Collaboration (team mentoring, cross-functional projects)
- 

**EMPLOYMENT EXPERIENCE**

---

**Web Developer**

Oct 2025 – Present

WBTi (World Breastfeeding Trends Initiative) Canada

St. John's, NL, Canada

- Developing and maintaining the WBTi Canada website to enhance accessibility and functionality.
- Implementing responsive UI components and optimizing site performance for improved user engagement.
- Collaborating with the WBTi Canada team to support national awareness and data-driven advocacy efforts.

**Volunteer, TechNL Innovation Week 2025**

26–28 Oct 2025

TechNL

St. John's, NL, Canada

- Assisted in organizing and supporting Innovation Week 2025 events.

**Senior Data Scientist**

2020 – 2024

Turkish Telecommunications A. Ş

Ankara, Türkiye

- Designed and deployed predictive AI models integrated into Turk Telekom's network operations, now used by 15+ engineers for real-time monitoring.
- Reduced manual data handling by 30% through automated PySpark pipelines for critical telecom datasets.
- Built an NLP-driven customer review analysis system that improved telecom service benchmarking by 11% across 11 service domains.
- Developed deep learning models for object recognition in telecom base stations, achieving a 25% increase in accuracy compared to prior methods.
- Mentored junior data scientists and led multi-disciplinary teams across 10+ AI/ML initiatives.

**Senior Software Engineer**

2019–2020

Freelance / Remote

Kayseri, Türkiye

- Designed and deployed a Python Flask Web Service API for a private company, ensuring scalability and secure client data handling.
- Built a complete E-Commerce System from requirements gathering to deployment, including payment gateway integration and product catalog management.
- Partnered with a regional government department to create a machine learning-based Fingerprint Recognition System for secure identification.

**Senior Software Engineer**

2017-2019

Inno Soft Yazılım Ar-Ge ve Reklam Tic. Ltd. (IT Services and IT Consulting)

Kayseri, Türkiye

- Developed a Deep Neural Network Furniture Image Search API for MOBITEK (Turkish Ministry of Science, Industry and Technology with European Union (EU) funding project), training on 50K+ images to improve classification accuracy.

- Applied OpenCV and Python to automate image preprocessing, boosting training efficiency for vision-based ML pipelines.
- Collaborated with clients remotely to define requirements, deliver prototypes, and integrate AI/ML models into existing business workflows.
- Created an NLP pipeline to analyze customer reviews, applying text classification and semantic analysis with NLTK and Scikit-learn.

#### **Graduate Research Assistant**

Erciyes University

2015 – 2017

Kayseri, Turkiye

- Master's thesis: Developed CNN-based biometric recognition system for hand vein patterns, achieving strong classification accuracy.
- Designed and implemented deep learning solutions for image recognition and pattern classifications.
- Built data mining models for a TUBITAK Car-to-Car Communication research project.

#### **Univeristy Lecturer (Teaching Assistant)**

UniKL Business School

2013 - 2014

Kuala Lumpur, Malaysia

- Assisted in teaching graduate courses in Computer Science and Information Technology.
- Supervised computer lab sessions, guiding students through programming and applied projects.
- Supported faculty with grading, mentoring, and curriculum development.

#### **Software Engineer**

Ibiza Allied Resources Sdn Bhd

2010 – 2012

Kuala Lumpur, Malaysia

- Provided end-user and remote technical support for servers, enterprise apps, and telecommunication systems.
- Installed and maintained firewalls, security appliances, and switches to improve network reliability.
- Conducted server maintenance, updates, and patching to minimize downtime.
- Designed and maintained databases (SQL/Oracle); contributed to test-driven development.
- Developed REST/SOAP web services and reusable API components for enterprise solutions.
- Participated in middleware server administration (Apache Tomcat, JBoss).

#### **E-Commerce Administrator**

Caravan Global Business Sdn Bhd

2007 – 2009

Kuala Lumpur, Malaysia

- Managed the product catalog for the company's online store and corporate website.
- Coordinated with manufacturers and vendors to update digital assets.
- Conducted quality checks on catalog content and coordinated with the warehouse to resolve discrepancies.
- Supported campaigns and promotions by preparing product listings and online content.
- Assisted in the testing and deployment of new consumer devices according to roadmap.
- Collaborated with marketing and operations teams on e-commerce strategies.

---

#### **EDUCATION AND PROFESSIONAL WEBSITES**

---

Master of Science, Computer Engineering

Erciyes University

2018

Kayseri, Turkiye

Master of Science, Information Science & Technology

UKM

2013

Selangor, Malaysia

BSc, Computer & Information Science

Chang'an University

1999

Xi'an, China
