PROFILE

Strategic, focused and business-oriented PM/Senior Business analyst IT resource with over twenty-nine years of progressive IT experience, extensive skills in areas of systems design, quality control, and financial systems. Varied technical experience using modern frameworks, proven methodologies, and best practice with recent specializations in Legacy.Net Migration. Highly proficient operating as a senior resource involving client engagements. Broad range of senior technical experiences understanding customer requirements and the content development/documentation environment of large enterprise clients.

CORE COMPETENCIES / TECHNICAL SKILLS

- Experience with telecommunications, oil & gas industry, government/public/financial sectors.
- Specializations in Legacy. Net Migration (using Fujitsu PROGRESSION), Application Management, IT Service & Strategy, Project Management
- Expert in Mainframe Technologies – COBOL, PL/1, DB2, IMS, Teradata DB, S2K DB, JCL, CA-Ideal, CA-Datcom, Easytrieve, Endeavor. RPG II, File-AID, SPUFI/SQL, FTP, VSAM, AS 400, Assembler
- Strong SQL skills (Microsoft SQL Server, Oracle PL/SQL, IBM DB2, MySQL)
- Architecture: IT Risk Assessments and Architecture Design and Integration
- Systems Analysis which includes Functional specification creation, Development & Testing, UAT
- Business Analysis which includes Business Case, Business Requirements creation.
- .Net & Web, Cobol.Net, VB.Net, ASP.Net, Visual Studio 2015, HTML, VBScript, JavaScript, Visual Studio Code, PHP, WordPress, Python, Basic, Oracle APEX
- Utilities: Reporting: Crystal Reports, Cognos, MS Project, MS Office, Visio, HP ALM, MS Word, MS Excel, MS project, SVN, Salesforce, Tableau, Jira, BMC Remedy, Unix, CogiCase, Azure DevOps

WORK EXPERIENCE

Nov 2022 – Present DGW Consulting, remote, New Brunswick

As a Senior IT Consultant/PM have moved into the freelancing arena and here are the current web projects in my portfolio.

Projects:

- Design/Build/Implement of the Grand Lodge of New Brunswick website - <https://discovermasonrynb.online>
- Design/Build/Implement of the of York Rite of New Brunswick website - <https://yorkritenb.ca>
- Build/Deployed of Oracle APEX Demo app to showcase ability: - <https://bit.ly/4gHnqVu-DGW-APEX-Demo>

Environment: NGINX/Apache Web Servers, MS Edge, Chrome, Visual Studio Code, PHP, MySQL, WordPress, Oracle APEX
Azure DevOps

May 2022 – Aug 2022 S.I. Systems, remote, New Brunswick

- As a Senior Applications Analyst designed, developed & tested new & enhanced PSPC systems using COBOL, JCL, Fusion, TSO CLIST, CICS & DB2 to support the legacy Federal PSPC Pay System application.

Environment: IBM mainframe MVS, JCL, COBOL Netron Fusion, TSO CLIST, CICS & DB2

Sep 2020 – Oct 2021 XploreNet Inc., remote, New Brunswick

- As a Virtual Technical Support Specialist provided advanced technical troubleshooting with customers calling to resolve concerns related to internet/network connectivity and email.
- Providing high quality customer service within XploreNet's service level and quality guidelines
- Liaise with internal departments to investigate and escalate technical issues including Channel Support and Network Operations

Environment: Windows Server, Internet Explorer, Google Chrome, Salesforce

May 2019 – July 2019 CGS Canada Ltd., Saint John, New Brunswick

- As a Consultant – Business Analyst, develops and documents a detailed statement of requirements for the proposed solution in the Technical Requirements Document for a SAAS Law Practice Management Software (LPMS) system.
- Possessed strong communication skills and capable to use a range of methods to conduct interviews, develop and present issues
- Understood and supported system documentation requirements for the LPMS.

May 2018 – Sept 2018 Fresche Solutions, remote, New Brunswick

As a Senior Developer Consultant at Fresche Solutions did support of HP 3000 systems

- This includes understanding new applications and the ability to access and provide level of effort for all roles within the project.
- Maintain training and knowledge of designated applications.
- Occasional, solution development of Stories for Customer Projects

Environment: Unix, MPE/iX shell, COBOL, TurboIMAGE/XL

June 2016 – Mar 2017 CGI Group , Moncton, New Brunswick

- As a Consultant - IT Technical Business Analyst supported the Oracle upgrade of the Medavie BCIS legacy system providing system admin support.
- Updated the Medavie production compile script to pick up the correct Oracle 12C binaries.
- Did a recompile of all 4,633 legacy production programs in each of the different integration environments up to and including acceptance

Environment: Unix, Cobol, Oracle, PL/SQL, Korn script, CogiCase, JIRA

Oct 2013- Mar 2016 CGI Group , Halifax, Nova Scotia

- As a Consultant – Technical Business Analyst, develops and documents a detailed statement of requirements for the proposed solution in the Technical Requirements Document for TUFFS insurance systems.

- Support User Acceptance Testing to ensure the system meets business requirements, did tests with XML
- Acted as a Project coordinator/liaison for multiple global teams, most recently the Fujitsu offshore team for CP Rail based in Pune, India.

Environment: Unix, COBOL, VB.Net, Tuxedo & Sybase Database, HP ALM , XML

June 2007 - Aug 2011 Irving Oil Limited, Saint John, New Brunswick

- As Senior Solutions Architect, facilitated solutions for Refinery business groups while acting liaison for Irving Oil's IT vendors.
- Managed and assisted in service level effectiveness, corporate identified infrastructure, and security projects.
- Provided leadership and direction in implementation of approved IT initiatives within the Refinery Business Unit.
- Created Business Requirements documenting Current State, Future State, Functional/ Non-functional requirements, reporting specifications and traceability.
- Created Business Cases including cost benefit analysis process documentation.
- Completed due diligence on IT Risk associated with new IT business projects.
- IT Lead for complete Irving Oil Refinery CribMaster ToolBox Vending Machine Rollout Project.

Environment: Windows Server, Oracle, PL/SQL, JD Edwards, MQSeries, Honeywell EDI, CribMaster, MS SQL Server

Jun 1995 – Jun 2007 Fujitsu Consulting, Saint John, New Brunswick

Clients: WCB (NB) , Irving Oil, NBTel, AT&T, Merrill Lynch, Washington DOL, Boeing contracts

- *Tapped to undertake Resource management at the Saint John office prior to its operational closure.*

- As a Senior APM Analyst, directly interfaced with Boeing's management performing analysis required to create estimates of effort and solutions. Documented analysis in Macroscopic format as used by Boeing.
- Implemented a Lockbox subsystem for Boeing Commercial account receivables.
- Provide support to completing SOX IT Audits and Controls.

Environment: HP3000, ECL and COBOL

- As a Senior Legacy Migration Analyst for the State of Washington Department of Licensing (DOL), converted HP3000 Transact and VPlus form specs to VB.Net and ASP.Net. Created various analysis documents and RFP required client deliverables. Using client provided test scripts, tested, verified, and delivered converted software to Functional Test Group. Created in depth training documentation and provided multiple hands-on training sessions to DOL HP 3000 IT systems support staff.

Environment: Windows Server, VB.Net, ASP.Net., SVN, , MS SQL Server

- As a Senior Legacy Migration Analyst for the State of Washington Department of Licensing (DOL), converted Unisys programs, maps, and Batch ECLs to Net Cobol and VBScripts. Using client provided test scripts, tested, verified, and delivered converted software to Functional Test Group. Created in depth training documentation and provided multiple hands-on training sessions to DOL Unisys IT systems support staff.

Environment: Windows Server, Net Cobol, and VBScripts, SVN, MS SQL Server

- As a Senior APM Analyst, directly interfaced with the Merrill Lynch's management performing analysis required to create estimates of effort and solutions. Documented analysis and findings in Fujitsu Consulting and Client supplied formats. Created design and testing specifications for enhancement requests. Responsible for creating client CMM and RUP deliverables and mainframe development. Did tests with XML. Also coached/mentored team members in IBM mainframe technology.

Environment: IBM mainframe MVS, JCL, COBOL & DB2, SPUFI/SQL, FTP, CICS, VSAM, Assembler, XML

As a Team Lead/Functional Analyst, Coded the current release of AT&T SNOW-R Service Now Routing (SNOW-R). SNOW-R is a family of applications that provides automated routing support for the AT&T Switched Network. Lead the knowledge transfer activities on the SNOW-R system insourcing and then outsourcing after Client's management decision was reversed and the system was moved back inhouse.

Environment: IBM mainframe MVS, JCL, COBOL & Teradata Database

- As a Systems Analyst/Team Lead at NBTel, supervised the construction of Account Receivable and various other conversion modules for the CSM 2000 project, a pre-merger Aliant joint venture for service provisioning and billing. Remotely managed the construction of the dozen + AR conversion modules which were constructed at System house remote development site in Montreal.

Environment: IBM mainframe MVS, JCL, COBOL & IMS & DB2, IMS DC, VSAM

- As a Systems Analyst/Team Lead at NBTel Mobility, analyzed functional requirements, and supervised the construction of NBTel Mobility's commissioning and reporting Dealer Settlement System (DSS). The DSS system calculated all of NBTel Mobility dealer's commissions for the entire province.
- Completed a SOFF (Service Offering) conversion to update the SOFF structure on the NBTel Client accounts.

Environment: IBM mainframe MVS, JCL, COBOL & DB2, IMS DC, VSAM

Jul 1994 – Jun 1995 CGI Group - CDFS- PWGSC Contract, Ottawa, Ontario

- As a Senior Functional Analyst, participated as a member of the analyst team of the Common Departmental Finance System (CDFS) project, a multi-layered architecture, state-driven, Client Server based governmental finance system being developed for Public Works and Government Services Canada.
- Analyzed and documented functional requirements and performed Quality Assurance testing for change requests and problem logs.
- Provided detailed cost estimates for large individual change request contracts.

Environment: WinDOS, CICS/COBOL, MVS, NETRON/CAP, & DB2, DMR P+ Methodology

Jul 1992 - Jun 1994 ISM Corp - NISA - Agriculture Canada Contract, Ottawa, Ontario

- As a Functional Analyst analyzed user requirements for CA Datacom database system. Prepared functional requirements, analysis, design, and program specification documents.
- Assisted programmers in writing CA Ideal programs and assisted end-users in identifying and understanding system requirements.
- Designed and built the Financial Interface (FI) Transfer subsystem, which transferred without error \$110 million on its initial production run, from government accounts to individual NISA accounts held at farmer's personal banks.

Environment: IBM mainframe MVS, JCL, CA-IDEAL & CA-Datacom

Mar 1992 - Jul 1992 CompuCollege School of Business, Halifax, Nova Scotia

- As a Computer Instructor taught two four-hour computer courses daily. Responsible for preparing lesson plans and record keeping.
- Courses taught included MS-DOS, Lotus 123, dBASE IV, and Bedford Accounting.

Oct 1991 – Dec 1991 Maritime Tel and Tel, Halifax, Nova Scotia

- As Programmer/Analyst modified and implemented COBOL programs and batch JCL jobs in half of the estimated time required by contract. Was assigned additional programming assignments for the remainder of the contract.

Environment: IBM mainframe MVS, JCL, COBOL & DB2, VSAM

Jul 1988 – Oct 1991 Maritime Life Assurance Company, Halifax, Nova Scotia

- As a member of the Application Support team responsible for the successful completion of the nightly batch flow including daily on-line systems availability as well as systems enhancements.
- Designed and implemented batch JCL jobs and programs (in PL/1, Ideal, S2K) using structured analysis while following the Systems Life Cycle Methodology.
- Participated in the development of Annuities, Group, Electronic Funds Transfer, and Archiving systems.

Environment: IBM mainframe MVS, JCL, COBOL , PL/1, Ca-Ideal, CA-Datacom, DB2, S2K DB, RPG II, Gener/OL, FTP, CICS, VSAM

SECURITY CLEARANCE

Enhanced Reliability Status Security Clearance, active

07/2016 - 07/2026

Secret Security Clearance, expired

08/1992 - 08/2007

EDUCATION | PROFESSIONAL DESIGNATIONS

University of New Brunswick 1983 - 1988.

Bachelor of Science in Computer Science Degree, Co-op Program. Specialization – Management Information Systems.

<u>Information Technology Certified Professional</u> (ITCP) CIPS -	April 17 2009
<u>COBIT Foundation Certificate</u> , ISACA,	January 2008
<u>ITIL® V3 Foundation Certificate</u> , APM Group EXIN	December 2007
<u>Information Systems Professional</u> (I.S.P.), CIPS	October 1994
<u>Fellow of Life Management Institute</u> (FLMI), LOMA –.	June 1990

PROFESSIONAL DEVELOPMENT

Basics of Lean Six Sigma: Green Belt, Alison Courses	2023
