EXPERIENCE

April 2023 – Present

Deutsche Bank – Jacksonville, FL – USA

Position: AVP, Data Integration and Project work stream Lead |Sr. Engineer

- Leading the data integration for the WM TDI department (Technology, Data and Innovation) from multiple sources to a main new platform and data warehouse
- Leading the project's work stream for all the enhancements, change requests and incidents raised, along with the solution approaches
- Getting involved in project budget discussions
- Participating in the mapping and testing of several files load and feed processes
- Leading, and driving daily and weekly scrum standup calls
- Preparing, organizing and driving the production release Governance calls
- Coordination, Support and communication with all stakeholders and vendors at all times

December 2021 – March 2023

Credit Suisse – Raleigh, NC – USA

Position: AVP, Sr. Operational Risk Manager and Business Intelligence Analyst

- Lead and managed the CCO (Chief Compliance Officer) division's reporting development and production on a global scale.
- Collected information, business requirements, metrics, set and followed the KPIs in a timely manner, to deliver the needed reports and analysis on schedule.
- Developed visualization and internal dashboard for reporting purposes
- Involved in reproducing the RCSA reporting (Risk Control Self-Assessment)
- Divisional coordinator, worked closely with FRCOs (Functional Risk and Control Oversight teams - VPs and Directors)
- Drove the Application Review Board periodic meetings
- Oversaw the divisional system applications inventory and their compliance with the set governance and controls
- Assisted in driving the incidents, internal issues and actions meetings, making sure the remediation process is following the proper timelines

June 2008 – November 2021

Bank Audi Group – Bank Audi LLC - Qatar

Position: Sr. Operations, BI and MIS Analyst

- Lead the entity's Data Protection project, collecting information, setting and following the KPIs in a timely manner, in order to comply with the QFC and Qatar's governance.
- Involved, participated and managed several information systems projects involving the database models and management systems creation life cycle, from the design, construction, modification, integration phases, to the data models testing and implementation phases.
- Data mining, querying and manipulation to analyze the results using DB management systems and BI tools.
- Identified business needs and opportunities for improvement, via detailed analysis and understanding of overall business, systems structure, strategy, flows and processes.
- Designed, maintained and developed in-house applications and Dashboards related to the Accounting and Finance, Operations, Trade Finance, Compliance and HR departments, after identifying and analyzing each department's gaps in their daily tasks along the daily support provided.
- Achieved process efficiency with dramatic reduction in the regular process timing, and therefore the entity's money saving.
- Provided analytic reporting and business intelligence services for the entire banking and managerial requirements
- Involved in the management and implementation of several core banking modules i.e. loan, AML, accounts reconciliation modules, SWIFT application and many updates on the existing modules.
- Coordinated with other IT professionals to identify the proper database management tools to be applied and implemented for better and efficient results.
- Handled and monitored the daily operational tasks following the QFCRA regulations

2006 – 2008

Bank Audi Group – Bank Audi SAL - Lebanon

Position: Project and Bus Intelligence Analyst

- Managed the Bank's reporting process through the different types of Management Information System to drive the Bank's strategic direction, helping it achieve its financial objectives and to meet relevant financial targets.
- Provided reporting to various departments and branches across the bank, developed and implemented performance analytics and significantly influenced decision making within several projects for the branches and the departments, as well as various analytical reports for top management review.
- Designed, developed and generated several managerial dashboards and reports using Cognos.
- Defined the overall approach and technical direction for BI tool-set and liaised with the IT department to find better and faster solutions for a better system performance.
- Kept IT strategy aligned with the changing business needs, monitoring performance of workflow analysis and engineering, for the organizational planning of most of the bank's departments to meet better and efficient results in a contemporary management environment.
- Developed, implemented and maintained procedures, policies, and standards to continuously improve organizational efficiency, following the KPIs for each milestone in a timely manner to meet the project.
- Conducted gap analysis and enabled the management to use advanced planning, re-engineering and business intelligence features.

2005 – 2006

Path Solutions SAL - Lebanon

Position: System Analyst and Developer

- Designed, planned, developed, tested and implemented modules and applications following the KPIs in a timely manner to meet the project and the client's needs, under Power Builder and Sybase DB.
- Evaluated and identified clients' needs, to establish operating procedural standards, recommended IT infrastructure requirements based on customer needs and deploy robust solutions.
- Developed systems by translating requirements into highly specified project briefs, liaised extensively with programmers & software developers for the same.
- Managed time schedules to meet growth needs on time and within budget with a strong focus on adhering to deadlines for critical systems such as accounting, trade finance and core banking modules.
- Performed handover test for end users, offered fundamental training for effective and optimum use of such application & systems installed.
- Resolved and assisted in any troubleshoot problems arising thereof as well as oversaw quality control and bugs fixing for several applications in the system.
