

THEJASRI GANGARAJU MANOHAR

Greater Sudbury, ON | +1 705-921-5665 | Theju1090@gmail.com

Professional Summary

Data-driven professional with a Master's in Computational Science, skilled in **project coordination, data analysis, and machine learning**. Experienced in delivering predictive models, NLP solutions, and actionable insights while managing multiple IT projects with high stakeholder satisfaction. Certified in **Google Project Management, IBM Data Analytics, and IBM Machine Learning**.

Core Competencies

Data & Analytics: Data cleaning, EDA, statistical modeling, Tableau, Power BI, Matplotlib

Machine Learning & AI: Regression, classification, clustering, NLP, recommendation systems, model evaluation

Programming & Tools: Python, Pandas, NumPy, Jupyter, TensorFlow, Keras, PyTorch, Git/GitHub

Project Management: Agile workflows, requirement gathering, milestone tracking, stakeholder communication, documentation

Professional Strengths: Analytical problem solving, organization, attention to detail, clear communication

Certifications

- Google Project Management Professional Certificate | 2025
 - IBM Data Analyst Professional Certificate | 2025
 - IBM Machine Learning Professional Certificate | 2025
-

Professional Experience

Assistant Project Manager | Sheliza Technologies (Remote) | Nov 2018 – Jan 2023

- Coordinated 5+ IT and development projects simultaneously, achieving 95% on-time delivery.
- Maintained project documentation, requirement specifications, schedules, and milestone trackers to improve transparency.
- Facilitated communication between clients, vendors, and internal teams, reducing issue resolution time by 30%.
- Prepared dashboards, technical reports, and executive presentations for stakeholders.
- Identified risks and bottlenecks, proactively escalating and resolving issues.

IT Project Assistant | Trending Jobs, India | Nov 2011 – Oct 2018

- Managed structured project records, documentation, and change logs for audit readiness.
 - Organized and facilitated team meetings, tracked action items, and ensured timely follow-up.
 - Conducted research and data analysis to support project planning and decision-making.
 - Created executive-ready presentations and reports for leadership.
-

Projects

PhishDetect – ML Domain Classifier

- Built a supervised ML model to classify domains as legitimate or suspicious.
- GitHub: <https://github.com/Thejasri1090/PhishDetect-AI-powered-Domain-Security>

Collaborative Filtering Recommendation System

- Developed user-based and item-based recommendation models for personalized suggestions.
- GitHub: <https://github.com/Thejasri1090/Collaborative-Filtering-Recommender-Systems>

Airline Customer Sentiment Segmentation (NLP)

- Performed sentiment analysis to segment passengers for targeted marketing strategies.
- GitHub: <https://github.com/Thejasri1090/Sentiment-Driven-Passenger-Segmentation-of-Airlines>

System Keylogger Monitoring Tool

- Designed a lightweight system activity logging tool for monitoring purposes.
 - GitHub: <https://github.com/Thejasri1090/Keylogger-for-system-surveillance>
-

Education

Master of Science in Computational Science | Laurentian University, Sudbury, ON | June 2025 | CGPA: 8.40/10

Bachelor of Technology in Information Technology | Anna University, Chennai, India | April 2011
