Professional Summary

Analytics and Business Consultant with a proven record in digital transformation and enterprise data initiatives for Retail and CPG clients across global markets. Skilled in business intelligence, advanced analytics, and PIM/MDM solutions, leveraging machine learning for assortment planning and inventory optimization to improve accuracy, reduce costs, and drive multimillion-dollar growth. Experienced in omnichannel integration to enhance customer experience and profitability, with a strong history of building client partnerships and expanding accounts through measurable outcomes.

Experience

Senior Consultant – Consumer, Retail & Logistics

Infosys Consulting, Ottawa, Canada | Feb 2022 – Present

- Oversaw full lifecycle delivery of an enterprise analytics and BI platform for a European brewery supply chain, delivering consumer, brand, sales, and P&L insights. Directed a cross-functional team to build a single source of truth for the supply chain finance function, resolving reconciliation and hierarchical reporting discrepancies and **reducing month-end data processing time by 35%**
- Led Oracle MFCS transformation at a global convenience retailer across merchandising and replenishment, **cutting reconciliation time by 40%, improving stock accuracy by 25%**, and accelerating reporting cycles from monthly to weekly.
- Led omnichannel transformation for a luxury retail chain in the Middle East, integrating stores with digital platforms to deliver seamless customer experiences, **driving 2.5x YOY growth, ~2M new users, and ~1M active users**.
- Implemented enterprise-wide **PIM/MDM solutions** across leading North American CPG, European home improvement retail, and global athletic apparel brands, leveraging platforms such as Stibo STEP and Salsify.
- Contributed to firm and practice growth through RFPs, POVs, white papers, and thought leadership; currently leading the **Data Management COE** – defining operating model, governance standards, and best practices for enterprise data initiatives. Also driving initiatives within the **Artificial Intelligence COE**, and serving as client partner to strengthen relationships and deliver strategic value
- Applied AI/ML in retail transformation for demand forecasting, product data enrichment, and anomaly detection, improving accuracy, decision-making speed, and customer personalization.

Lead Consultant – Customer Value Management

ITC Infotech, Bangalore, India | Jan 2020 – Jan 2022

- Led Personalization for a South African food and fashion retailer, driving growth and retention through cross-sell/upsell strategies. Applied machine learning to customer segmentation, market basket analysis, product recommendations, and churn prediction models. Delivered a **3.6% lift in seasonal sales and improved campaign ROI by 15–20%**.
- Led Salesforce deployment for a **global trade marketing and distribution transformation** across Asia and Europe for a multinational tobacco manufacturer and retailer. Utilized Anaplan integration tools and models to ensure seamless data exchange with Salesforce and Azure, enabling accurate, real-time planning and analysis.
- Managed end-to-end delivery of a Business Intelligence platform for a multinational tobacco giant. Lead a team of data engineers and BI developers, oversaw resource allocation, budget tracking, cut-over, and UAT activities to ensure on-time, within-budget delivery. The platform enabled visibility into trade marketing activities—product promotions, POS displays, shelf optimization, consumer insights, and logistics—driving **account expansion and \$2.5M in new revenue**.

Analytics Consultant 3 – Marketing

Wells Fargo, Bangalore, India | Dec 2016 – Jan 2020

- Designed and implemented a **Marketing Data Platform** by consolidating legacy systems across consumer banking for reporting and analytics
- Rolled out a **Marketing Analytics platform** with self-serve BI and comprehensive metrics (revenue, uplift, NPS, engagement, acquisition, digital).
- Led development of 365-Degree Customer Experience and ROI Apps in Tableau, delivering actionable insights to marketing teams.
- Built marketing measurement models to evaluate campaign effectiveness using KS/PSI metrics, **unlocking \$40M in market opportunity**.
- Devised segmentation strategies to maximize CLTV, **reduce churn by 30%, increase revenue \$3M**, and optimize acquisition spend.
- Mentored 8 interns on consumer banking and analytics skills.
- Contributed to Data Management COE, implementing best practices for data migration and governance.

Senior Analyst – Space, Range & Merchandising

Tesco, Bangalore, India | Aug 2014 – Nov 2016

- Built advanced assortment planning models to forecast demand and optimize assortments across brand, store, space, and price levels, improving retail space profitability, identification of competing products and enhanced consumer insights.
- Implemented inventory optimization strategies to balance seasonal and staple products, reducing obsolete inventory and maximizing efficiency.
- Developed space and range recommendation models for UK & ROI stores, increasing sales without cannibalization.
- Received **Individual Excellence Award** for Macro Space reviews and store format renewals in Central Europe and Turkey, **driving 30–40% sales growth and lowering costs.**
- Designed and maintained an analytics data warehouse as a single source of truth for merchandising reporting.
- Automated Tableau BI dashboards 124 and designed an analytics data warehouse as a single source of truth, **saving 500+ FTE hours** by streamlining space and range reporting

Software Engineer

Wipro, Bangalore, India | Aug 2010 – Mar 2013

- Developed ERP application using Jave Spring framework for government clients.
- Developed a pluggable authentication and authorization-enabled reporting framework for Java Enterprise applications, integrating Jaspersoft BI for Central Government organizations.
- Conducted research and development within the Big Data Center of Excellence, applying Apache Lucene and Java programming to design and implement methods for mining and analyzing web data. Focused on advancing scalable information retrieval techniques and contributing to enterprise knowledge discovery initiatives.
