Project Coordinator | Construction Professional | P.Eng. (Ontario)

*Dedicated and detail-oriented Professional Engineer (P.Eng.) with extensive experience in construction project coordination, structural design, estimating, and fabrication management. Skilled in leading multidisciplinary teams to deliver high-quality results on time and on budget. **Highlights of Qualifications include:***

- Licensed Professional Engineer in Ontario (P.Eng.) with a Bachelor's in civil engineering and a Construction Estimating Certificate.-Strong knowledge of Canadian construction standards, building codes, and permitting procedures.
- Proven ability to interpret drawings, specifications, and tender documents, ensuring technical accuracy and compliance.
- Experienced in structural design, shop drawing preparation, fabrication coordination, and construction administration.
- Strong communication and leadership skills with the ability to manage multiple projects simultaneously.
- Proficient in AutoCAD, MS Project, ETABS, SAFE, Salesforce, and cost estimating tools.
- Detailed understanding of all construction scopes of work.

Core Competencies

- **Project Coordination & Management:** Scope definition, scheduling, cost tracking, submittals, RFI coordination, and quality control.
- **Design & Engineering:** Structural framing design, fabrication detailing, reviewing shop drawings, supporting field teams with engineering solutions.
- **Construction Administration:** Coordinating with owners, architects, engineers, contractors, and subcontractors to execute construction phases efficiently.
- **Contract & Budget Management:** Monitor and adjust project costs, review contracts, manage procurement, and coordinate change orders.
- **Team Leadership & Communication:** Liaise with internal teams and external stakeholders to ensure smooth information flow and timely decision-making.
- **Software & Tools:** AutoCAD, MS Project, ETABS, SAFE, Salesforce, MS Office Suite.

Education

Certificate, Construction Estimation, George Brown College, Toronto 2021

Bachelor of Engineering – Civil, Aleppo University, Aleppo 2014

Professional Experience

Project Coordinator / Technical Lead Honey Glass & Windows, Ottawa 2022 -2025

- Coordinated projects from tender to project closeout, ensuring compliance with design, safety, and schedule requirements.
- Managed daily crew scheduling, assigned tasks to team members, and conducted end-of-day progress follow-ups to ensure milestones were met.
- Led communication and coordination with engineering teams, general contractors, drafters, and suppliers to align technical requirements and construction progress.

- Prepared and reviewed shop drawings, fabrication details, glass and frame sizes, and coordinated stamping with structural engineers for load and safety compliance.
- Oversaw procurement and material ordering, including inventory tracking, delivery coordination, and ensuring availability of all critical components.
- Prepared fabrication drawings and work packages, organized team meetings, and tracked multiple active projects simultaneously.
- Conducted inventory management for frames, glass panels, hardware, and accessories to support fabrication and site installation.
- Handled project documentation, including submittals, RFIs, change orders, and invoicing/billing.
- Supported the site team by providing clear technical instructions, verifying installation details, and ensuring quality and safety standards were met.

Estimator/Project Coordinator, Rooflifters, Toronto

2021 - 2022

- Analyze specifications, construction, and architectural drawings and make project notes.
- Preparing Quantity take-off including material takeoffs and labor estimates.
- Prepare Budgets using Master Format and manage multiple priorities and deadlines.
- Creates budget proposals for customers with limited information.
- Prepare preconstruction schedules for our scope.
- Prepare CAD drawing with the engineer's team for new steels require for the project.
- Co-ordinate construction projects and prepare construction documents
- Attending the meeting with owners, architects, and engineers.
- Communicate with clients, suppliers, subcontractors.
- Communicate with the team and upload and coordinate all the projects using team and Salesforce
- Follow-up with on-site problems with all the team.
- Track & manage daily/weekly/monthly reports, for the crew and equipment on site
- Manage project-related paperwork in an organized and legible manner
- visiting potential projects and then helping coordinate and manage them.

Drafter, Innovax, Toronto

2018- 2021

- Drafted layout AutoCAD drawings for fire alarm systems
- Managed and organized computer-based drawing layers for several projects
- Created documentation packages and drawing sets
- Estimated the cost of construction and materials

Structural Design Engineer, Firas Consulting, UAE

2015 - 2017

- Analyzed structural foundation for architectural drawings for private residences using soil test reports and locations, architectural floor plan, AutoCAD drawings and beams analysis
- Leveraged SAFE software and AutoCAD to analyze multi-storied building structures
- Calculated estimates for required resources
- Addressed client concerns and questions around the structural design
