 - Statistical Modeling
-

EXPERTISE

- Data governance
 - Data privacy
 - Data stewardship
 - Metadata frameworks
 - Workflow documentation
 - Project planning
 - Root cause analysis
 - Programming
 - Data management
-

WORK EXPERIENCE

DATA GOVERNANCE ANALYST

2022-2025

FCT | Hybrid, Oakville, Ontario |

FCT is a leading provider of title insurance and real estate technology services in Canada. I worked within the Enterprise Data Governance team to support the development of data management and improve data quality across the organization.

- Collaborated with data stewards, IT, and business stakeholders to define data rules, set quality thresholds, and resolve governance issues.
- Contributed to the implementation of an enterprise data management tool by gathering business requirements, supporting user acceptance testing (UAT), and ensuring alignment with data governance standards.
- Responded to urgent client requests involving nuanced data issues, balancing speed and accuracy while maintaining high service standards.

DATA STEWARD

2021-2022

Bayer | Hybrid, Mississauga, Ontario |

Bayer is a global life sciences company focused on health care and agriculture. In this role, I supported the Canadian Commercial teams by ensuring data accuracy and alignment with global standards.

- Maintained and updated product and supply chain master data in SAP to support operations, planning, and reporting.
- Reviewed data change requests for accuracy and compliance with governance rules before approval.
- Collaborated with global teams to ensure local data was aligned with global templates and processes.

ASSOCIATE DATA MANAGEMENT ANALYST

02/2021 to 07/2021

McKesson Canada | Remote |

McKesson Canada is a leading pharmaceutical distribution and health care services company. In this role, I supported the data management team by ensuring the integrity of product and customer master data.

- Processed and maintained master data records, ensuring alignment with business rules and compliance standards.
- Verified and updated product and customer information to support operations, pricing, and inventory systems.
- Responded to internal stakeholder requests, resolving data issues accurately and in a timely manner.

DATA SCIENCE INTERN

05/2019 to 08/2019

GE Healthcare | Buc, France |

GE Healthcare is a global medical technology and digital solutions innovator. As a data science intern, I supported the analytics team by contributing to exploratory analysis and data-driven reporting initiatives. I immersed myself in a French language working environment, during the summer break between my second and third year of my undergraduate degree.

- Analyzed healthcare operations data using Python and Excel to identify trends and performance gaps.
- Built and visualized predictive models to support internal decision-making and process improvement.
- Collaborated with cross-functional teams to define data requirements and interpret analytical results.
