PROFESSIONAL SUMMARY

Data Engineer with 8+ years of experience designing and building large-scale data pipelines and cloud-based architectures. Proven expertise in Spark (Py-Spark), Hadoop, Apache NiFi, Databricks, AWS S3, and Snowflake. Strong background in data transformation, ETL, and performance optimization. Skilled at delivering business insights for financial services, healthcare, and banking industries.

TECHNICAL SKILLS

Big Data & ETL:	Hadoop, Spark (Py-Spark), Apache NiFi, Hive, Sqoop, ETL
Cloud & Databases:	AWS (S3, Glue), Databricks, Snowflake, Azure Data Factory, Netezza, Oracle, Impala
Programming:	Python, Shell Script, SQL
Concepts:	Data Lake, Data Warehouse, Data Pipeline Automation
Tools:	Jira, Bitbucket, Git, Toad
Platforms:	Windows, Unix/Linux

PROFESSIONAL EXPERIENCE

Senior Software Developer | Tech Mahindra – Client: Mastercard International

Aug 2022 – Present | Vancouver, BC

- Developed end-to-end Rebate processing pipelines using Apache NiFi and Spark, replacing manual workflows and reducing processing time from **3 months to within 10 days**.
- Tuned NiFi workflows (back pressure, thresholds, resource configs) ensuring proper queue utilization and prevent production cluster overload.
- Performed performance tuning on a Py-Spark job processing 10TB of data, reducing runtime from ~20 hours to 10 hours (**50%improvement**) by mitigating extreme data skew through partial salting.
- Tuned NiFi workflows (back pressure, thresholds, resource configs) ensuring proper queue utilization and prevent production cluster overload.
- Integrated processed data into Hive and PostgreSQL, improving downstream reporting efficiency **by 20%**.

Data Engineer | Accenture / Legato Health Technologies

Aug 2019 – Oct 2022 | India

- Ingested enterprise data from Mainframe into Hadoop using Sqoop, Py-Spark.
- Developed end-to-end ETL pipelines on Databricks to ingest, clean, and transform 20TB of daily sales and customer data from multiple sources.
- Automated validation scripts in Shell, cutting manual QA time by 40%.
- Optimized Hive and Spark SQL queries for large-scale transformations, reducing job runtime by 30%.

Big Data Developer | Epsilon

Jan 2017 – May 2019 | India

- Built enterprise marketing platform integrating 12+ data sources into Hadoop.
- Developed Spark & Hive ETL pipelines to populate analytics marts, enabling real-time campaign analytics.
- Partnered with analytics teams to deliver customer insights, supporting new product launches and campaign success metrics.

ETL Developer | Epsilon

Aug 2016 – Dec 2016 | India

- Designed Hive staging and base layer tables for campaign datasets.
- Automated ETL jobs with Unix shell scripts, reducing manual intervention by 50%.
- Improved Oracle load performance with SQL Loader optimization, cutting batch processing time by 20%.

EDUCATION

Degree	Institution	Board/University	Year
B.Tech in Computer Science & Engineering	Nalanda College of Engineering, Bihar, India	Aryabhatta Knowledge University	2015

AWARDS & RECOGNITION

- Awarded PINNACLE Award at Accenture for continuous upskilling and client impact.
