-

Project Experience

Rezen Gaming | [Web App](#) | Startup Esports Platform Mar 2025 - Present

- Designed and developed a full-stack esports wagering platform where players compete and earn real rewards through skill-based challenges.
- Built core systems for match creation, team management, and wallet transactions using Next.js, TypeScript, Drizzle ORM, and AWS Lambda.
- Integrated Twitch, Xbox, and Steam APIs for live streaming and account linking, while building and managing gaming communities across multiple social platforms.
- Collaborated on UX/UI design, ensuring consistent branding and a seamless user experience across web and mobile devices.

Relay | [GitHub](#) | Ridesharing App for Parents Sept - Dec 2024

- Developed a React Native mobile application using Expo, ensuring a smooth cross platform experience.
- Engineered safety features including GPS live tracking, PIN verification, and AI-powered ride notifications for real-time updates and GPS.
- Utilized Git and GitHub for version control, maintaining a clean and collaborative development workflow.

West Coast Healthy Memory Society | [Web App](#) | Nonprofit web app Jan - April 2024

- Built a web platform for a nonprofit serving seniors with Alzheimer's, helping staff generate AI-powered cognitive training activities.
 - Implemented personalized content creation using OpenAI, Next.js, TypeScript, MySQL, and Drizzle ORM.
 - Designed a senior-friendly UI with accessibility in mind, featuring large text, clear navigation, and simplified interaction flows.
 - Collaborated directly with clients without a technical background, translating complex AI and database systems into easy-to-understand workflows.
-

Education

Diploma in Full Stack Web Development (FSWD) | BCIT May 2025

- Developed proficiency in both front-end and back-end development, enabling the creation of seamless and efficient user experiences.
