KEY COMPETENCIES

- Computer Science graduate with 2+ years of full-cycle experience in Full-Stack and native iOS development, capable of building complex applications from ground up.
- Works closely with stakeholders to turn operational needs into well-designed technical solutions and provide clear, helpful end-user support.
- Bilingual: Fluent in English and Mandarin Chinese.

CORE TECHNICAL SKILLS

- Programming Language: JavaScript, TypeScript, Python, Objective-C/Swift, C/C++
- Frontend Develop: ReactJS, HTML5, CSS3, iOS Native
- Backend Develop: Node.js, Express.js, Django
- Databases: MySQL, Firestore (NoSQL)
- DevOps: Docker, CI/CD, Google Cloud Run
- Technical Support: Diagnosing client technical issues and providing solutions, Network Configuration (TCP/IP), Windows/MacOS Administration, Web server Administration
- Customer Service: Professional and patient client communication experience
- Cross-Functional Collaboration: Proven ability to work with product, design, and backend teams

CAREER HIGHLIGHTS

Full-Stack Developer (Personal Project) | [NeednDo.com](https://needndo.com)

Richmond, BC

Aug, 2025 – PRESENT

- Project Goal: To build a community-driven platform that connects individuals offering skills and services with neighbours seeking trusted support for various tasks (e.g. tutoring, repairs, cleaning).
- Designed and Implemented responsive frontend interface using **React**.
- Architected and Developed API with **Node.js** for authentication, social features, and live chat, and implemented a hybrid **MySQL** (for relational data) & **Firestore** (for real-time data) database to optimize both performance and scalability.

iOS Application Developer & Technical Support

Yu Wei Technology LTD, Hangzhou, China

JUL 2021 - JUL 2023

- Served as the sole iOS Developer for the company's entire suite of applications, owning the full development lifecycle from technical design and implementation to performance tuning.
- Collaborated closely with product managers and non-technical staff to translate business requirements into functional technical specifications.
- Diagnosed and resolved complex software bugs and integration issues reported by clients, acting as Tier 2/3 support.
- Provided pre-sales technical consultation to key clients, explaining technical concepts in accessible language to support decision-making.

EDUCATION

Vancouver Island University

Bachelor of Science (Computer Science), Nanaimo, BC

2017-2020, 2023-2025
