EXPERIENCE

Software Developer

Courtesy Solutions Cleaning

August 2025 – Present

Calgary, AB

- Designed and developed a production website for a small business.
- Improved site usability, layout, and performance across desktop and mobile devices
- Deployed and maintained the website, including updates and bug fixes
- <https://courtesysolutionscleaning.com>

Intern

PlanerIT

June 2023 – December 2023

Houston, TX

- Managed and configured ServiceNow modules (Incident, Problem, Change, Request)
- Provided user support and training on the ServiceNow platform
- Collaborated with IT teams to ensure seamless deployment

Grocery Store Clerk

NoFrills

May 2022 – May 2023

Calgary, AB

- Provided high quality customer service by helping customers with product inquiries and resolving their issues
- Helped maintain store cleanliness and organized shelves to ensure a positive shopping experience

PROJECTS

Capstone Project - Social Networking App | *React Native, PostgreSQL, TypeScript*

- Led development of cross-platform mobile app for event discovery and community engagement within Calgary, collaborating with a UX designer
- Built using React Native with Supabase backend integration
- Optimized performance for Android and iOS, ensuring responsive UI and smooth navigation
- Developed key features such as user authentication, interest based match making, and interactive event listing

Expense Tracker App | *React Native, Supabase, TypeScript, Expo*

- Built a mobile expense tracking app with receipt scanning and financial advice
- Integrated an AI assistant to provide spending tips and advice
- Implemented OCR to extract transaction details from receipts

Azure IP Ranges Downloader | *Python, BeautifulSoup*

- Developed a Python script to automatically download the Microsoft Azure IP ranges every week and store them in a JSON file
- Utilized BeautifulSoup and regex to parse HTML and retrieve dynamic download link.
- Scheduled the script to run weekly.

Game Server Finder | *Python, PyDivert*

- Developed a Script to identify server and region a game client is connected to with the option to connect to different region without the use of a VPN
- Integrated IP Geo-location API to determine corresponding region
- Provided interface for user to input desired region
- Implemented functionality to block IP ranges for unwanted regions
