Full Stack/Software Developer

linkedin.com/in/nemo-wang/

Professional Summary

- Experienced full-stack developer and software engineer with a strong foundation and practical experience in web development with different cutting-edge tech stacks; Windows software; mobile applications, and the Internet of Things (IoT). With 5 – 15 years of experience.
- Graduate with a bachelor's degree in computer science and a diploma in business information technology.
- Proficient across frontend and back-end technologies, along with various SQL/NoSQL databases and development tools.
- Possesses exceptional problem-solving skills, adept at tackling complex technical challenges and delivering high-quality solutions.
- Fast learner, problem solver, team player, time management, with strong adaptability, patient & confident.
- A strong communicator and collaborator, capable of working independently and adapting quickly to new technologies, aiming to contribute significant value to the team.

Technical Skills:

Front-End: HTML4/5, DOM, BOM, CSS2/3, Sass, Less, Stylus, JavaScript, TypeScript, React, Vue, jQuery, AJAX, Bootstrap, Echarts, Axios, MockJS, WebAPI, Animate.css, Webpack, React Native, Taro, mpvue, WebApp, WebGL, Three.js, SSR/Nuxt.js, Responsive Design, Moment, Lodash

Back-End/Tools: Python, PHP, Node.js, C, Ruby/Rails, Django, Flask, Egg.js, OAuth2, Http[CommonJS, npm, nvm, Moment, Lodash, Axios, Webpack]

Database: MongoDB, MySQL, PostgreSQL, MariaDB, Couchbase

Software: C#, C++, Java, WinForms, ASP.NET, MVC model, OO system design

Other Tech Stacks: Windows, Linux Server, Mobile app, Git, Docker, Linux Server, VS Code, Visual Studio, Android Studio, Jira, Postman, RESTful API Design, Web Sockets, OAuth2, CI/CD, Unit Testing, MQTT, Raspberry Pi, Python for IoT, AWS/Blynk IoT, ASP.NET

Work Experience

Full Stack Developer

2023 - 2025

Phason Controls

Winnipeg, MB

- Led the development of core functionalities for an E-Catalog Upgrade Project, independently completed approximately 80% of both front-end and back-end code in a team.
- Led the design and implementation of the core architecture for an API Project, completed 70% of the front-end and back-end code within a team.
- Spearheaded creation of an API test automation framework, completed 100% of the base and sample code, enabling team members to efficiently utilize the provided template.
<https://github.com/NemoAng/TestAutomationPython.git>

- Independently Developed the company's flagship product (AFX3 Switchboard), completed 100% of the front-end and back-end code in just two weeks (significantly ahead of the four-month schedule) which other team members not able to take, crucial for future revenue growth.
<https://github.com/NemoAng/WebcodeDemo.git>
- Consistently resolved complex project bugs that proved challenging for other team members. Collaborated effectively within a distributed team environment, utilizing version control (Git) and project management tools to ensure project success.

IT Specialist

2022 – 2023

Auto List of Canada

Winnipeg, MB

- Provided comprehensive technical support to colleagues, diagnosing and resolving hardware, software, and network issues related to workstations, printers, and connectivity; ensured minimal operational disruption.
- Oversaw managed the setup, configuration, and maintenance of PC workstations and peripherals.

Software Engineer

2022

NSD Tech

Winnipeg, MB

- Finished a SmartForm project independently in one month (taking over at 30% completion), dynamically generating web pages from Excel for data retrieval/storage. Utilized ASP.NET Web Forms, Bootstrap 5, JavaScript, jQuery, Node.js, Webpack, and Azure Translator API.
- Developed a multi-select, searchable WinForm dropdown control within one week, resolving an issue previously unaddressed by an intermediate software developer for over a year. (Achieved despite initial unfamiliarity with VB.NET).
- Fixed and enhanced the Infragistics UltraComboEditor WinForm control (without source code access) within 5 days, enabling multi-select and search capabilities, surpassing the vendor's support solutions.

Software Engineer & MCU Verification Engineer

2018 - 2019

Chipways Technology

Shanghai

- Spearheaded design and develop Window software and embedded software for peripherals test of ARM Cortex 3 MCU, such as I2C, SPI, CAN, CAN-FD, UART etc.
- Responsible for engineering datasheet/peripheral driver lib, platform configuration files for MDK/IAR and so on.

Software Engineer & Firmware Engineer

2009 - 2017

Wattstopper/Legrand

Shanghai

- Responsible for designing and developing Windows software and embedded software for lighting control/energy-saving products based on Atmel Mega and STM32 series MCUs.
- Lead and spearheaded design and develop Windows configuration/control applications using C# and Visual Studio. Contributed to hardware design and created production guide documentation.

Education

Red River College Polytech

2020 - 2021

Business Information Technology Diploma

Heilongjiang University of Science & Technology

2002 - 2006

Bachelor of Communication Engineering/Computer and Electrics Science

Git Repos

- Password Manager(Android)

Dear Hiring Manager,

I am a professional full-stack developer with experience spanning software, web applications, mobile applications, firmware, and hardware. My diverse background allows me to approach projects holistically, from architecture and design to implementation and deployment.

In my view, years of experience are not the sole measure of capability. As a fast learner and strong problem-solver, I consistently deliver solutions that exceed expectations. Early in my career, while working as a full-stack developer, I produced software that was more reliable and efficient than that of peers with six to seven years of experience. My focus has always been on clean, maintainable code and effective problem-solving strategies.

I am confident in my ability to take on any coding challenge, regardless of the platform, framework, or programming language. Whether front-end, back-end, mobile, or database-driven applications, I can build robust systems from the ground up. My drive for perfection ensures high-quality results, and I am equally dedicated to helping teams grow and succeed.

Beyond development, I also bring value through strategic insight. I can contribute to discussions on product direction and even provide input on marketing approaches, ensuring that the technology aligns with business goals.

Most importantly, throughout my career, I am always the most valuable employee, have never let any of my previous employers down. I take pride in consistently delivering results and maintaining the highest professional standards.

If you are a startup, I'm sure I'm your best choice. Also, I have opportunity to implement my value. Thank you for considering my application. I look forward to the opportunity to contribute to your team.

Sincerely,
Nemo Wang
