

Yutian Cai

+1-613-265-9253 | katrinaccai@gmail.com

Experienced Software Developer with expertise in Java, Angular, RESTful APIs, and cloud technologies (AWS), adept at building scalable web applications and collaborating in Agile environments. Strong background in database optimization, system integration, and modern software development practices.

EDUCATION

Algonquin College - Ottawa - Sep.2022 - Aug.2024, Computer Programming

- Dean's Honors List: GPA 4.0/4.0
- Completed a twelve-month (including four month part-time) co-op term with CRA as an IT Developer
- Created an Appointment Scheduler to save, delete, change, and display appointments by using Java
- Created a dynamic Employee Management Website using PHP and SQL to perform CRUD operations with HTML forms as user input
- Created a Customer Relationship Management Database System to save and update customer information

Shanghai International Studies University - Shanghai, Sep.2014 - Aug.2018, Business English

- Scholarship: National Scholarship for Encouragement (Top 3%); Zhang Naixin Scholarship for Excellent Student (Top 5%); SISU Scholarship for Excellent Student

WORK EXPERIENCE

Canada Revenue Agency, Ottawa, Sep.2023 - Mar.2025, IT Developer

- Developed and maintained a web application for tracking taxpayer visits, managing seminar registrations, and providing workload management and analytics tools using Java, Angular, and RESTful web services, improving operational efficiency.
- Designed and implemented a responsive front-end interface for retrieving and displaying taxpayer information using Angular and CSS, ensuring a seamless user experience across multiple devices.
- Optimized SQL queries, achieving a 20% improvement in query performance, which enhanced system efficiency and increased user satisfaction. Conducted thorough testing by preparing detailed test plans and cases, identifying and resolving over 30 issues, ensuring system reliability and accuracy.
- Acquired AWS cloud development experience, collaborating with colleagues to build a Cloud Native framework for the department, writing initial code to support future cloud migration of software applications. Participated in the Monarch cloud development project, and was responsible for the front-end UI/UX design using Angular, ensuring responsive and accessible interfaces, as well as back-end integration and data alignment between systems to enable smooth functionality and data accuracy.
- Collaborated with cross-functional teams, including business analysts, database administrators, and senior developers, to analyze business requirements and deliver robust software solutions aligned with user needs. Actively participated in team discussions, shared knowledge, and provided technical support, fostering a cooperative and productive work environment.
- Gained experience in Agile development methodologies, participating in sprint planning, code reviews, and daily stand-up meetings to ensure project milestones were met efficiently.
- Developed and integrated RESTful APIs to support data exchange between different modules, enhancing system interoperability and maintainability.

Trip.com Online Travel Agency, Shanghai, Dec.2019 - Jul.2022, Product Manager

- Conceptualized and deployed enhanced product features and optimized implementation for use in application development. Led the Reducing Customer Service Trigger Rate Project, reduced the trigger rate by 5%, and increased the ordering rate by 0.1%, which gained annual revenue of about 10 million RMB.
- Coordinated weekly product design meetings and decisions with technology departments and communicated effectively with team members to deliver product features and design updates.
- Collaborated closely with technology team members in such tasks as troubleshooting and debugging.
- Collected customer requirements, directed testing, and conducted continuous evaluations to make proactive adjustments to update application features.

TECHNICAL SKILLS

- Programming Languages: Java, TypeScript, Python, SQL, Bash script
- Java: Junit Test, Swing, Object-Oriented Analysis and Design, Documentation, Data Structures
- Web Programming: HTML, CSS, PHP, JavaScript, React, Node.js
- Database Management: Oracle, MySQL, SQL Server, MS Access, PostgreSQL, MongoDB
- Operating Systems: Windows, Linux (Ubuntu)
- Others: Business Intelligence (BI), VMWare, Eclipse, Git, GitHub, Visual Studio, UMLet, ERD, Apache

VOLUNTEER EXPERIENCE

Shelter Movers Ottawa, Ottawa, Nov.2024 – Now

- Volunteer as a mover at Shelter Movers Ottawa, assisting with monthly moving tasks to support people, primarily women and children, transitioning to safer living environments. Contributed to creating a compassionate and efficient moving experience.

Algonquin College, Ottawa, Jan.2023 - Aug.2024, International Peer Mentorship, International Education Center

- Act as a positive role model, using knowledge and experience to facilitate access to services for new international students.
- Develop and maintain relationships with mentees and provide aid to help them, focusing on a smooth transition, integration, engaging with college community, and a sense of belonging.
- Give monthly free tutorials for mentees and answer their questions about their labs and assignments.
