Sasieni II Tam

SUMMARY

Motivated third-year Computing Science student with a strong interest in software development, seeking opportunities to develop skills and knowledge in the field. I am hopeful to learn the realm of software development.. While currently having minimal expertise in the field, I am highly dedicated and motivated to learn and acquire new skills in the field. I bring enthusiasm, adaptability, and a willingness to engage in continuous learning to any role or project. I am eager to explore and grow within the field of software development.

SKILLS

- Experience with Python
- Experience with MongoDB
- Experience with SQL
- Experience with C
- Experience with Java
- Experience with Android SDK
- Have the ability to work under pressure
- Independent Worker
- Excellent Teamwork
- Ability to learn new things
- Strong communication skills

PROJECTS

C Programming Project - Ray Tracer Renderer

- Designed and managed dynamic data structures for scene objects using pointers and dynamic memory allocation.
- Created a Makefile to compile and test three stages of the project using defined preprocessor macros.

MongoDB | Python - Twitter CLI project

- Developed an interactive command-line social media simulation using MongoDB and Python to search, compose, and rank tweets and users in a simulated Twitter dataset.

Java, Android SDK, Firebase | Event Management Application

- Developed a full-featured Android application for browsing, managing, and administering events with role-based UI, real-time database integration, and geolocation-aware waitlisting.
- Implemented real-time Firestore integration, RecyclerView adapters, and lifecycle safe state management.

EDUCATION

University of Alberta — Bachelor of Science General program, Major in
Computing Science
September 2022 - Present
