## Objective

Dedicated public servant that recently graduated with a Computer Science degree eager to apply strong programming, problem solving, and analytical skills in a dynamic tech environment. Seeking an entry level role where I can contribute to innovative projects and grow my expertise in the field.

## Technical & Academic Skills

**Programming Languages:** Java, JavaScript, Python, C++, R

**Frameworks & Tools:** React, Next.js, REST APIs, SQL, Git

**Core Strengths:** Software development, QA testing, problem solving, team leadership, Agile collaboration

## Work Experience

### UPEI Library Sep 2024 - Apr 2025

*Team Lead for Evergreen App UPEI Library (Capstone project)*

- Led a team of 6 developers, together, we built a full-stack web application for the UPEI Library
- Worked in Agile sprints to manage tasks, milestones, and overall project progress
- Designed and developed responsive front-end features using Next.js, React, and TypeScript
- Collaborated with the team to architect RESTful APIs, allowing consistent data flow between front-end and back-end
- Created and executed test plans as the primary QA tester, performing unit and integration tests and logging issues for follow-up
- Led weekly agile meetings with clients, which included requirement gathering and progress presentation
- Provided timely updates on ongoing issues to the client and coordinated with the team to apply necessary improvements
- Authored technical documentation, testing reports, and onboarding materials to support maintainability and proper change tracking
- Delivered the project on schedule through strong communication and problem solving

### Agriculture and Agri-Food Canada May 2022 - Oct 2024

*Summer Research Student at Agriculture Agri-Food Canada PEI*

- Developed Python and R program to clean, validate, and transform large datasets, ensuring accuracy and compliance

- Tested and validated all scripts and workflows, performing unit checks and verifying outputs against requirement
- Reviewed program logic and data flows for errors, inconsistencies, and completeness, supporting audit ready results
- Documented the program's testing steps, results, and fixes in a clear and organized manner, following process standards
- Tracked and resolved data issues, supporting corrective actions and maintaining workflow quality
- Collaborated with team members to provide review findings and implement improvements, maintaining project quality standards
- Coordinated meetings to ensure appropriate changes were made and project was heading in the right direction
- Performed final check to ensure successful release of final product and that expectations were met

### **University of Prince Edward Island Sep 2024 - Dec 2024**

*Student Marker Charlottetown, PEI*

- Marked students for CS 2620 (Comparative Programming Languages)
- Figuring out the logic behind a program in multiple ways in order to correctly mark students
- Gained knowledge in many (Prolog, LISP, Scheme, PHP, C, C++) programming languages

## **Education**

---

### **University of Prince Edward Island, Charlottetown, PEI.**

*Bachelor of Science, Computer Science*

- Minor: Biology
- Dean's List 2021-2022, 2023-2024
- GPA: 3.78
