17 Browns Court, University Avenue, Charlottetown, PE

Objective

Third-year Computer Science student seeking a remote web development role focused on building and maintaining practical, database-backed web applications.

Highlights of Qualification

- Dean's Honours List recipient with a 4.15/4.30 cumulative GPA, reflecting consistent academic excellence
- Experience building full-stack web applications with client-server interaction and persistent data storage
- Strong understanding of server-side logic and data flow between frontend interfaces and databases
- Ability to design, implement, and maintain structured web functionality with attention to correctness and usability
- Comfortable working independently on technical tasks and following through from implementation to testing

Education

[Bachelor of Science, Major in Computer Science](#)

September 2023 - Present

University of Prince Edward Island (UPEI), Charlottetown, PE

- Cumulative GPA: 4.15/4.30
- Dean's Honours List: 2023-2024, 2024-2025

Skills

- Frontend: HTML, CSS, JavaScript
- Backend: Node.js
- Databases: SQL
- Web Concepts: REST-style APIs, CRUD operations, server-side logic, form handling, data persistence
- Tools: Git, basic command-line usage

Relevant Coursework

- Web Development : structured content, databases, user-facing systems
- Management Information Systems : business systems, internal workflows
- Data Structures & Algorithms : structured problem-solving and data handling
- Programming Practices : maintainable and organized code design
- Machine Learning & Data Mining : structured data analysis and interpretation

Experience

Student Assistant

September 2024 - Present

Registrar's Office - Student Experience Hub, UPEI, Charlottetown

- Supported internal systems by managing records and responding to requests accurately
- Worked independently while coordinating with staff across departments
- Maintained attention to detail when handling structured and sensitive information

Student Assistant

September 2021 - May 2023

High School Math and Science Department, Dhaka, Bangladesh

- Graded assignments for math and science courses, providing feedback that helped students understand concepts better and improve their grades.
- Assisted students by answering questions and clarifying concepts, which boosted their confidence and engagement in class.

Projects

Book Exchange Web Application

- Developed a full-stack web application that allows users to list, browse, and exchange books
- Built server-side functionality using Node.js to handle user requests and database interactions
- Designed relational database tables and implemented CRUD operations for persistent data storage
- Created user-facing pages with structured layouts and form-based interactions

Sales Data Analysis and Reporting Project

- Cleaned and organized structured data to improve consistency and usability
- Presented information through clear tables and visual summaries suitable for web-style reporting

Leadership Experience

Co-President, Event Coordinator

September 2019 - May 2023

High School English Club, Model United Nations Club

- Coordinated events and group activities involving planning, documentation, and communication
- Supported structured discussions and collaborative work
