LET'S CONNECT

I'm Thanos, a Web Designer with experience across several creative agencies, creating custom digital solutions since 2021. I work on bespoke websites, e-commerce platforms, and visual content, always focusing on clean, responsive, user-centered design.

I specialize in WordPress and Elementor, and I'm confident working with the Adobe Creative Suite, HTML, CSS, ACF, third-party integrations, WooCommerce, site migrations, and full project lifecycles—from concept to launch.

Recently relocated to Victoria, BC, I'm looking to join a creative team where I can contribute, grow, and continue producing high-quality digital experiences. You could skim a long résumé—or you can explore my portfolio and see what I can actually do.
