

John LaPointe

Edmonton, Alberta

E-mail: john@dominet.ca

Summary: I have more than 20 years of experience working as a Web Developer in both front-end and back-end roles, creating full websites from design files as well as taking over the development and updates for already existing ones. My expertise is in advanced WordPress theme development, HTML / CSS responsive template coding, JavaScript/jQuery, and PHP/MySQL applications and integrations.

Experience: **Full-Time Web Developer**
Saint Bernadine Mission Communications
Vancouver, British Columbia
Oct 2021 – Oct 2025

- Fully developed a new WordPress website for the De Dutch chain of restaurants that can be seen at <https://dedutch.com>. I did all the front-end and back-end work in creating the theme and all its components based on Figma designs and requirements. The theme was built in Bootstrap 5 and incorporated advanced custom fields with flexible content fields for a custom backend editing system. Performed optimization and SEO tasks for 2 months after making their new site live including Local SEO.
- Completed a full WordPress website refresh for the Vancouver Maritime Museum (<https://vanmaritime.com>). My tasks included the full front-end development based on Figma designs, the full back-end development of a new WordPress website using the Bootscore theme as a starting point, developing an advanced custom content editor using the Flexible Content fields in Advanced Custom fields, and taking care of the full launch and SEO redirects.
- Worked on and maintained more than a dozen WordPress website projects as lead developer. Websites developed and/or updated included <https://nicolawealth.com> (Nicola Wealth Accounting Firm), <https://dhgroup.ca> (D & H Group Accountants), <https://carverssteakhouse.ca> (Carver's Steakhouse), <https://dairycentre.landfood.ubc.ca> (UBC Dairy), <https://fbic.landfood.ubc.ca> (UBC Food and Beverage Innovation Centre), <https://bcfirstrespondersmentalhealth.com> (BC First Responders' Mental Health), <https://spinex.co> (SpineX Medical Bioelectric Solutions), and <https://www.wheelhousebrewing.com> (Wheelhouse Brewing Company).

Contract/Full-Time Web Developer
Various Clients
May 2019 – Present

- Oct 2021 – Present
 - Complete redevelopment of <https://www.checkrtrust.com> from Figma designs using Elementor, completed August 2025. I used their Elementor hosting staging site to develop their new website starting with a base Elementor theme and using their Figma designs, Elementor widgets, and custom code to make their new website look nearly identical to their designs. Old blog posts were carried over to the new website, but besides that, all the content was new.

- Was hired for an intense one month contract to do some heavy lifting for some final updates on the redevelopment of the Miller Thomson website, <https://www.millerthomson.com>, during the month of October 2024. My tasks included performing a lot of complex customizations related to Advanced Custom Fields (ACF) as well as a PDF generator to show CVs for every lawyer on the website which got updated every time the lawyer ACF fields were saved.
 - Worked on both part-time and full-time contracts as a WordPress Developer for the Toptal Organization including WordPress consultant/developer for websites like <https://www.bioreference.com>, <https://kalehealth.com>, and <https://ripusa.com>. Toptal profile: <https://www.toptal.com/resume/john-lapointe>
 - Developed a website with a searchable clergy database (<https://www.artizo.org>) and an online course curriculum (<https://curriculum.artizo.org>) for an Anglican organization based in Vancouver. Tasks included developing custom profile pages to give clergy the ability to manage their own profiles and connecting the clergy database, curriculum, and job board with the same user login.
- Dec 2019 – Oct 2021
 - Long-term contract work for the Mark Anthony Group in Vancouver to redevelop and maintain most of their product brand websites including: White Claw (<https://www.whiteclaw.com>) which currently has 7 international websites in 4 different languages; Glendalough Distillery (<https://us.glendaloughdistillery.com>); Cayman Jack (<https://www.caymanjack.com>); Mike's Hard (<https://mikeshard.com>); Mike's Hard Seltzer (<https://www.mikeshardseltzer.com>); and Freed Earth Tea (<https://www.freedearthtea.com>).
 - Tasks involved mainly front-end development, converting new designs to Bootstrap templates and integrating them into the Hugo templating system. Websites also connected to APIs for searching and browsing for products on an embedded Google Map and store list.
 - Developed two WordPress websites for their company brand Bearface Whisky: a Canadian-facing website, <https://www.bearfacewhisky.com>, and a US-facing website, <https://us.bearfacewhisky.com>. Tasks included developing a new Bootstrap WordPress theme from design files, building a custom multi-lingual setup, and a cocktail recipe manager.
 - Worked on several WordPress projects for Toptal (<https://www.toptal.com>) as a freelance hourly developer, including developing searchable directories, making final changes to websites and launching them, and Full WordPress website development projects.
- Sep 2020 – Feb 2021
 - Developed Bootstrap 4 WordPress themes for a huge event website, <https://festivalofauthors.ca> and its parent website, Harbourfront Centre (<https://harbourfront.live>).
 - Integrated the Tessitura Network CRM with the WordPress website using the Tessitura API to create new registrants, logins, and seat/ticket purchasing.
 - Created my own password reset system with custom tokens, and a PHP session system for maintaining login credentials with Tessitura and saving records of user event sign ups as WordPress meta info.
- May 2019 – Jul 2020
 - Worked for a month on a project integrating the GotoWebinar API with Gravity Forms and landing pages.

- Developed member registry for Interior Designers of British Columbia, <https://www.idibc.org/public-resources/rid-registry>. Work involved programming a form used to import members from a CSV file, member pages where members can login in and update their own profile information, and a search page for searching for members by category, name, and other criteria.
- Took over the final development tasks for the new Tsawwassen First Nations website and launched it at <http://tsawwassenfirstnation.com>, as well as the First Nation Gathering Wisdom event website at <http://gathering-wisdom.ca>.
- Developed resources manager, FAQ manager, photo galleries, video galleries, and online courses with quizzes and audio files for <https://www.thechidon.com>

Onsite WordPress Developer

Maximizer CRM, Vancouver, British Columbia

February 2019 – June 2019

- Worked on a full-time contract to redevelop and simplify the 1,000+ page WordPress website, Maximizer.com, for Vancouver-based Maximizer CRM.
- Tasks involved creating a new Bootstrap 4 theme based on a new design, setting up the site to use the WP Bakery visual editor and redoing all the pages to work with it, reorganizing the content and assets, removing the obsolete Blade templating engine from the core, and recreating all their sale/lead pages using Gravity Forms, various APIs, and custom functions.

Contract Web Developer

Various Clients

October 2003 – January 2019

- Jan 2018 – Apr 2019
 - Performed ad hoc weekly updates related to new site launches and marketing campaigns for <https://www.symplicity.com>
 - Developed new responsive website prototypes for a local lending startup such as <http://capitalassistance.ca>, <http://capitalsupport.ca>, <http://merchantmomentum.ca>.
 - Developed paid-membership websites using WordPress, Zurb Foundation, and MemberPress for sites such as <http://30daysto.fit> and <https://www.thediscourse.ca>. For the latter, I had to heavily customize the functionality of the plugin (using PHP within the plugin and WordPress workflows) to allow sign up and payment on the same page and to also allow variable payment amounts with variable payment frequencies for a custom membership (something MemberPress support said was impossible).
 - Developed advanced API-based prize order form using WooCommerce for NSA Canada (<https://nsacanada.ca>) that created one big order form with two different pricing schemes and a credit system. The page also applied coupon codes and allowed the prize order form to be modified by receiving an order ID, populating the form with the WooCommerce order info, and re-saving the order. The shopping cart calculations for quantities, totals, taxes, applying credits, and other options were done using jQuery with the final form submission using Ajax.

Lead Developer

Rogers Communications, Inc., British Columbia
August 2017 – December 2017

- Worked onsite as the lead developer for four months developing new websites for the Rogers Communications' Cityfone line of websites including <https://www.cityfone.net> and <https://www.simplyconnect.ca>.
- Duties involved frontend development using Bootstrap 4 for converting design files to responsive templates and employing jQuery at an advanced level; and also backend development using PHP, AJAX, and an Oracle database, and the Expression Engine CMS.
- Created a very advanced one page app that allows visitors to select phone plans and up to two different devices, while fetching pricing deals and bonus offers from the database. The result can be seen at https://www.cityfone.net/solution_builder.

Contract Web Developer
Vancouver, British Columbia
October 2003 – July 2017

- Sep 2016 - Oct 2017
 - Developed both the promotional website for the Toronto Bentway Project (<http://www.thebentway.ca>) and an advanced responsive news oriented blog website for Discourse Media (<http://discoursemedia.org>). My responsibilities included the initial work of setting up the sites in a Zurb Foundation WordPress theme, around half of the frontend development work and 80% of the backend work. The other portions of work (some backend stuff, half the frontend, and the graphic design) were performed by the project manager whom I teamed up with to make bring these websites into existence.
 - Developed new responsive websites <http://arthritisbcandme.info> and <https://crestwell.com> using Zurb Foundation and WordPress.
 - Developed a CakePHP application for managing customers for Moore Signs at <http://cmoorecss.com>, the new website for SaaS North -- Canada's Leading SaaS Conference -- <http://saasnorth.com>, WordPress websites like <https://ladderheroes.com> for Digital Hot Sauce, websites like <http://newravencapital.com> (a local investment company) for Raize Digial, and rebranding of Chartered Professionals in Human Resources websites like <http://cphrbc.ca> and <http://www.hrvoice.org>.
- Mar 2015 - Sep 2016
 - Complete responsive website development from PSD to Zurb Foundation to WordPress theme including the following sites for Hale Marketing: Aquacoustic, <http://www.aquacoustic.com> (Foundation only so far) Keatec Energy, <http://www.keatecenergy.com> St. John's Richmond, <http://www.stjohnsrichmond.ca> Delta-Q Technologies, <http://www.delta-q.com> Riot Micro, <http://riotmicro.com> (Production included the development of numerous custom post types and template files with advanced custom PHP programming)
 - Responsive website development for Victory Creative Group (<http://wearevictory.co>) on the website EQ Virtual (<https://eqvirtual.com>) that

promotes an app for connecting with doctors online. Developed using Zurb Foundation.

- Landing page/marketing campaign for Herbs for Anxiety: home page/MailChimp sign up page (<http://www.herbsforanxiety.org>); sales/product purchase page (<http://www.herbsforanxiety.org/take-back-control-with-herbs-for-anxiety>); thank you/download page (private link)
- Converted non-responsive WordPress website (<http://www.wildmind.org>) with more than a thousand pages and hundreds of images to a responsive WordPress site. Had to work out many responsiveness issues by creating hundreds of CSS overrides in child theme for pre-existing content and developed some custom code such as for navigating from page to page with arrows, up and down through all levels of the hierarchy.
- Frontend and Backend development on the Delta-Q Technologies (<http://delta-q.com>) website with the objective of converting their Bonfire / Codeigniter website to a WordPress site. First, I converted their template to a WordPress theme, then developed the custom post types and PHP functions necessary to keep all their current behaviors and content working, including all jQuery modules and form processing code. Finally, I updated the header according to a new design, and developed a new home page.
Note: this work has since been moved to <http://www.delta-q.com/deltaq> to make way for their new responsive website.
- Nov 2014 - Feb 2015
 - Frontend and Backend development for the Strive Living Society website, (<http://www.striveliving.ca>)
 - JavaScript calculator for a gun/ammo company: <http://sites.dominet.ca/extremereloadingnv.com/calculator.html>
 - Developed responsive WordPress theme and custom post types for <http://ronputzi.com>
- Sep - Oct 2014
 - Worked as in-house WordPress frontend and backend developer at FCV Technologies (<http://fcvinteractive.com>) on a contract to quickly develop a website for Kandy Outdoor Flooring (<http://kandyoutdoorflooring.com>). Duties included developing custom post types and functions for special page and element displays, moving their e-commerce elements over to the new site, as well as heavily modifying CSS and theme files to produce a custom theme based on a simple starter theme called Reload.
- Oct 2013 - Sep 2014
 - Worked on several projects for Hale Marketing and Synchroniz Design Group in Vancouver as well as for international clients. WordPress sites (<http://www.halemarketing.com>, <http://www.artizo.org>), Flash and animated gif ads for Sierra Online (http://apps.dominet.ca/examples/sierra_300x250-03.html), JavaScript eJuice Calculator (<http://www.ecigexpress.com/cookbook/ejuice-calculator-4>), and various other projects.
- Oct 2011 - Sep 2013
 - Worked on several large projects for Hale Marketing client, Teradici Corporation (<http://www.teradici.com>). Projects included developing a partner portal using the Parature API, a complex form and deal management system using PHP/MySQL and the Salesforce API, and various other add-ons for the site including a cost savings calculator (<http://www.teradici.com/zero-client-calculator>).

- Developed Drupal theme and website for Helping Point Canada, <http://helpingpoint.org>
- Jul 2010 - Sep 2011
 - Worked as in-house Web Developer for Sharkbite Art + Design (<http://www.sharkbite.ca>). Focused mainly on WordPress theme development including <http://www.whalesvancouver.com>, <http://www.zoesatnorthbeach.com>, and <http://shineautowash.ca>
- Oct 2003 - Jun 2010
 - Worked as a sub-contractor for several companies including Hale Marketing (www.halemarketing.com), Synchroniz (<http://www.synchroniz.com>), and Solocube (<http://www.solocube.com>) producing dozens of websites and PHP/MySQL applications.
 - Developed websites using XHTML and/or the Website Baker CMS including <http://www.teradici.com>, <http://www.privaris.com>, <http://www.stjohnsvancouver.com>, <http://www.lamarquefilm.com>, and <http://www.waxitinc.com>.
 - Also, developed e-mail campaign emails, file management systems, and a PHP/MySQL Web Application for internally managing projects, cases, and staff at a collection agency in Richmond.

Full Time Web Developer
McMillan, 541 Sussex Dr., Ottawa, Ontario
October 1999 – April 2003

- Developed corporate Web sites: www.MOSAID.com, www.Pathlore.com, www.IntraNetSolutions.com, www.HOPEhelps.com, etc. Starting with a graphic design, I would plan the template and then develop it by slicing up the image and programming the HTML and JavaScript to achieve the desired look and effects.
- Created animated GIF banners for clients like BBDO (Best Western).

Technical experience summary:

- Front-end Development expertise using HTML, XHTML, CSS, PHP, JavaScript, Ajax, jQuery, and Hugo.
- Google Web Designer for animating content and ad banners.
- PSD and Figma design conversion to fully functional websites.
- WordPress expertise including complete theme development, API integrations, custom PHP functions, plugin development, and advanced skills in customization with popular plugins like Gravity Forms, Elementor, and Advanced Custom Fields.
- Responsive frameworks including Foundation and Bootstrap.
- CMS Frameworks including WordPress, Drupal, and Webflow.
- Database Design and Entry including MySQL, MS SQL, Oracle, MS Access
- Custom PHP/MySQL Web Applications.
- Integration of API systems (ie., Salesforce, Parature, Tessitura) into websites
- E-commerce sites using standalone PHP or WooCommerce
- CSS animations
- Optimizations and fixes for SEO (Search Engine Optimization), page speed, and security

- Photo Editing/Graphic Design: Adobe Photoshop, Adobe Illustrator
- Video Editing: Adobe Premiere and Cyberlink PowerDirector
