 - o Python; Requests and BeautifulSoup to request data from Spoontacular.com
 - o Requests and formats data.
- **Python Reverse Shell:**
 - o Used Python's Sys, Subprocess, and Socket modules.

Dear CBZ Technologies Hiring Team,

Hello! My name is Dalice Dieckman, and I am excited to finally start my career within the field of tech. I have a degree in Business Technology Management (BTM) from one of the nation's finest business schools, the University of Alberta (UofA) School of Business.

I am certified with the AWS CCP, AWS SAA,Sec+, and the CCNA. I also have experience in development and I can code in python, and C/C++. Python is my strong suit, as I also have experience developing web applications using the Python based Django web development framework. Due to this I have also worked with Git, HTML, CSS, SQL, and JavaScript. Due to my degree in BTM/MIS, I have a holistic understanding of the field of software as a whole and coupled with an intense tenacity for learning, I intend to be one of the best in my field. Please help me get an interview where I can prove my skills!

In terms of personality, I am an open-minded, agreeable, and dedicated individual. In my time off I enjoy cardio, learning Spanish, and playing Destiny Rising. I am a bisexual male and proud to be so. I am a vegetarian, and a foodie.

Thank you for reading my cover letter and resume, I look forward to hearing your response.

- Dalice D.
