EDUCATION

Algonquin College

Ottawa, Ontario

Ontario College Diploma, Computer Programming (Honours)

December 2025

- **Concentrations:** Software Development, Business Intelligence & Analysis, Modeling & Simulation
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (Java), Objects & Design, Database Management Systems, Operating Systems (Linux), Networking, System Analysis & Design (Agile), SOLID Principles, and Web Technologies (HTML, CSS, JavaScript, React, PHP).

SKILLS

Programming Languages: Java, XML, Python, HTML, CSS, JavaScript, TypeScript, C++, SQL

Frameworks/Libraries: React.js, Next.js, Node.js, Spring Boot, Bootstrap, FastAPI, MVC

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Supabase, Oracle23ai

Tools/Platforms: AWS, Git, NPM, Power BI, Salesforce, VS Code, IntelliJ IDEA, Eclipse, NetBeans, Android Studio

Soft Skills: Multilingual (English, French, Arabic), Teamwork, Communication, Time Management, Analytical Thinking.

CERTIFICATES

- **Related Certificates:** AWS – Solutions Architect, Data Management with Java and SQL (2025), Software Architecture: Patterns for Developers (2025), Software Testing Foundations: Testing throughout the SDLC (2025).

EXPERIENCE

Yakoyo African Delicacy

Ottawa, ON

Food Ordering Web App (Freelance Front-End Developer)

Aug 2024 – Dec 2024

- Designed and built a complete food ordering platform for Yakoyo, enabling users to browse menus, see pricing, and place online orders with real-time updates.
- Developed a responsive, mobile-first UI using **HTML, CSS (Bootstrap), JavaScript, and React** to deliver a smooth, interactive user experience, increasing mobile traffic engagement by **95%**.
- Built dynamic menu components in React with real-time pricing and availability, including filtering by food category.
- Implemented order submission and tracking flows, ensuring seamless communication between customers and kitchen staff.
- Integrated **SSMS, PostgreSQL and MS Access** for backend services, real-time data sync, and user authentication.
- Delivered a **scalable MVP** with a roadmap for future features (admin panel, promo codes, notification system), ensuring extensibility and maintainability.

Alorica (Best Buy)

Montreal, QC

Technical Support Agent

Sept 2023 – Feb 2024

- Diagnosed, debugged and resolved technical issues promptly during critical moments.
- Provided remote technical support & troubleshooting through online collaboration tools & communication channels.
- Documented solutions, workflows, and best practices for improved team efficiency.
- Efficiently managed and prioritised support tickets to ensure timely resolution.
- Resolved 30+ daily support tickets with a **95%** first-call resolution rate.

TmT Gallery

Montreal, QC

Web Developer

Mar 2020 – Jul 2023

- Translated client needs and branding strategies into functional, responsive web design solutions.
- Collaborated with cross-functional teams including designers, product managers, and other developers to deliver high-quality user interfaces.
- Built and maintained 10+ dynamic, user-centric websites using **HTML, CSS, JavaScript, SQL and modern frameworks**, enhancing client brand visibility and boosting user engagement by **40%+**.

PROJECTS (Not limited to)

Public Transit Fleet Management System (PTFMS) – *Team Project* | Java, JSP, Servlets, MySQL

- Designed and developed a large-scale **3-tier web application** enabling managers and operators to log vehicles, manage routes, monitor status, and generate reports.
- Implemented **design patterns** (Singleton, Builder, DAO, Front Controller, etc.) to ensure clean architecture and scalability.
- Applied MVC-based architecture to separate UI, business logic, and data access layers.
- Built role-based access control with different privilege levels (manager vs operator).
- Integrated a relational database (**MySQL**) for vehicle data, predictive maintenance, and reporting.
- Developed and executed **JUnit tests** to validate system functionality and reliability.
- Delivered a fully functional, production-like system with a structured and maintainable codebase.

SunnahFlix – Faith-Based Netflix Clone | HTML, CSS (Bootstrap), JavaScript, JSON

- Built a **full-stack** Islamic content platform **inspired by Netflix**, delivering categorized YouTube lectures, Qur'an recitations, and downloadable Islamic books.
- Spearheaded a **responsive UI** that mimics the user experience of streaming platforms, tailored for Islamic educational content.
- Implemented **dynamic content loading using JSON** and a custom script for modular, scalable updates.
- Structured and categorized authentic resources into lectures and books for seamless navigation.
- Designed with future features in mind: create account/login, watchlist system, and time integrations.

Hotel Management App (Full stack) | Next JS, React JS, Supabase, PostgreSQL

- Collaborated in creating an interactive dashboard with **real-time analytics**, enhancing decision-making for hotel management.
- Spearheaded the development of dynamic cabin and booking management tables with **CRUD functionalities**, enabling seamless updates, deletions, and real-time data filtering, reducing data retrieval times by **40%**.
