OBJECTIVE

Third-year Honours Bachelor of Technology - Software Development student at Seneca Polytechnic with comprehensive experience in full-stack development, cloud computing, data science, and mobile app development. Seeking a challenging software developer co-op position to leverage my technical expertise in modern technologies including AWS cloud services, machine learning, and mobile development. Permanent resident, eligible to work in Canada without sponsorship.

EDUCATION

Honours Bachelor of Technology - Software Development | Jan 2023 - Jul 2026
Seneca Polytechnic • North York, Ontario
CGPA: 4.0

Comprehensive program covering advanced software development principles, including programming languages, operating systems, web applications, information security, cloud computing, databases, and system analysis and design. Strong emphasis on communication skills and technical presentation abilities.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Ruby, SQL, Kotlin, JavaScript, R
- **Database Technologies:** MongoDB, SQL Server, Firebase
- **Web Development:** HTML, CSS, JavaScript, Django, React, Angular
- **Mobile Development:** Kotlin (Android), React Native
- **Cloud Computing:** AWS (EC2, S3, Lambda, CloudFormation, API Gateway)
- **Data Science & Analytics:** Jupyter Notebooks, R, Python (Pandas, NumPy), LLMs (OpenAI API, LangChain, Llama 2)
- **Operating Systems:** Unix/Linux, macOS, Windows
- **Project Management:** Agile, Waterfall, Atlassian Jira, Scrum
- **Information Security:** Cybersecurity principles, secure coding practices
- **Development Tools:** Git, GitHub, Firebase, Ollama

- **Office Suite:** MS Office, Google Workspace

WORK EXPERIENCE

Supplemental Instruction Leader & Peer Tutor | May 2025 – Aug 2025 **Seneca Polytechnic • North York, Ontario (Hybrid)**

- Lead weekly collaborative learning sessions for 20+ students in C and Object-Oriented Programming (IPC144 - C, OOP244 - C++)
- Design comprehensive session plans and facilitate guided peer discussions to strengthen student understanding of programming fundamentals
- Implement active learning techniques to foster engagement and peer-to-peer interaction, resulting in improved student confidence and academic performance
- Adapt session content dynamically to match diverse student learning needs while reinforcing core course material
- Collaborate closely with faculty and SLG supervisors to align instructional support with course objectives and learning outcomes
- Mentor students in developing independent learning strategies and problem-solving approaches for complex programming concepts

MAJOR PROJECTS

Cloud Computing - Fragments Service using AWS | Jan 2025

- Developed a scalable microservices architecture on AWS cloud platform using EC2, S3, and Lambda functions
- Implemented RESTful API endpoints with proper authentication and authorization mechanisms
- Utilized CloudFormation for infrastructure as code, ensuring reproducible deployments

Solving Real-World Data Science Problems with LLMs | Sept 2025

- Developed comprehensive data analysis pipeline using Large Language Models to extract insights from historical documents
- Configured and integrated multiple LLM APIs including OpenAI API and open-source Llama 2 via Ollama
- Implemented LangChain framework for seamless model switching and enhanced natural language processing
- Created Python objects from unstructured text data and performed complex document parsing operations
- Analyzed apprenticeship agreements, calculated statistical insights (average age of apprentices), and identified patterns in historical contract documents
- Demonstrated proficiency in data preprocessing, feature extraction, and statistical analysis using Python and Jupyter Notebooks

Pet Adoption Mobile Application | Sept 2024

- Developed cross-platform mobile application using JavaScript and Firebase for real-time backend storage
- Implemented comprehensive user registration system with secure profile creation and authentication
- Designed advanced search and filtering algorithms for pet matching based on user preferences
- Built real-time chat functionality enabling communication between potential adopters and pet owners
- Created wishlist feature and adoption posting capabilities with image upload and management
- Integrated push notifications and user engagement features resulting in improved user retention

AWARDS AND HONOURS

Introduction to Cybersecurity Certification | 2024

Cisco Networking Academy

Comprehensive certification covering cybersecurity fundamentals, threat landscape, and security best practices

President's Honours List | 2023

Achieved President's Honours List recognition for three consecutive semesters with 4.0 CGPA in Honours Bachelor Technology - Software Development program, demonstrating consistent academic excellence and technical proficiency

Seneca Hackathon - Finalist | 2024

Achieved Finalist position in Seneca Hackathon - Housing 2024, demonstrating innovation, technical skills, and collaborative problem-solving abilities under time constraints
