

Evan Di Placido

evandiplacido@outlook.com

(639) 994-0348

Saskatoon, SK, Canada

Software developer with 7+ years of hands-on programming experience and strong foundation in C# .NET, web development, and complex system integration. Completed Software Development diploma at SAIT (December 2025). Proven ability to deliver large-scale applications and eager to contribute as a member of a professional development team.

PROJECTS

Argo Books

2024 – current

- **Financial management application** built in C# .NET 9 WinForms, migrating to Avalonia .NET 10 for cross-platform deployment (Windows, macOS, Linux, iOS, Android, Browser)
- **Core features:** Spreadsheet import, purchase/sales tracking, product management, returns and loss tracking, receipt storage, custom date filtering, and drag-and-drop report generation with PDF/image export
- **Analytics dashboard** with real-time LiveCharts visualization
- **Avalonia version adds:** AI receipt scanning, predictive analytics, invoicing, inventory management, rental management, customer management, and more
- **Security:** AES-256 encryption with Windows Hello biometric authentication support
- **Professional deployment:** Advanced Installer (Windows)
- **85,000+ lines** and 1,500+ commits demonstrating ability to architect and maintain large-scale applications
- **WinForms repo:** <https://github.com/ArgoRobots/Argo-Books-WinForms>
- **Avalonia repo:** <https://github.com/ArgoRobots/Argo-Books-Avalonia>

Argo Books Website

2021 – current

- **Full-stack web application** serving as the companion platform to Argo Books
- **Backend:** PHP with MySQL database, license key generation/validation, and webhook integrations for payment processing
- **Payment & subscription system:** Complete e-commerce flow for license purchases with secure transaction handling
- **Admin dashboard:** License management, user administration, analytics visualization (Chart.js), and two-factor authentication (TOTP)
- **Frontend:** Responsive HTML5/CSS3/JavaScript with jQuery for dynamic content
- **Additional features:** Documentation portal, community page for feature requests/bug reports, version management for software updates
- **65,000+ lines** of code, 750+ commits across PHP, JavaScript, and CSS
- **Live at** <https://argorobots.com/>
- **GitHub repo:** <https://github.com/ArgoRobots/Argo-Books-website>

6 Axis 3D printed robot arm prototype

2019 – current

- ~90% efficient 3D printed 30:1 cycloidal drives for NEMA 23 and NEMA 17 stepper motors
- Several sensors, including rotary position (accurate to 0.1 degrees), temperature, current, limit switches, and more
- ~1.2 meters tall

Argo Studio

2020 – current

- C# .NET 9 WinForms app to control and program the robot arm
- Has ~25,000 lines of code

Robot arm firmware

2021 – current

- Arduino program to control the robot arm
- Includes inverse trigonometry for X, Y, Z, TX, TY, TZ, and circular motions, sigmoidal accelerations, motor control, and more
- Has ~2,500 LOC

Several small Arduino projects

2019 – current

- RBG LED strip controllers
- Motor controllers
- Sensor testing

SKILLS

- **Programming:** Proficient with C#, HTML, CSS, JavaScript, PHP, TypeScript, SQL, Python, Visual Basic, Arduino, C++, Java, Next.js, and OpenGL
- **Software testing:** Experienced with unit testing, integration testing, debugging, and validating software functionality to ensure reliability, performance, and maintainability
- **User interface:** Responsive design, modern UI components, user flow optimization, layout design for desktop and web applications
- **Version control:** Familiar with GitHub
- **APIs:** Familiar with creating and working with APIs in JSON format
- **Payment Gateways:** Experience creating PayPal, Stripe, and Square gateways in PHP
- **AI-assisted development:** Skilled at leveraging AI tools such as Claude to accelerate coding, debug faster, and increase overall productivity several times over
- **Electronics:** Microcontrollers, motion control, PCB design and assembly, circuits
- **Design and manufacturing:** 3D modeling in Fusion 360, 3D printing, assembly of complex parts

EDUCATION

- | | |
|---|------------------------------|
| • Software Development Diploma, SAIT | January 2024 – December 2025 |
| • High school diploma, Centennial Collegiate, Honor roll | June 2022 |

EXPERIENCE

Bakery wrapper, Costco

APRIL 2023 – DECEMBER 2023

Wrapped food, cleaned bakery, restocked product and freezers, washed dishes

Key Holder, Bulk Barn

AUGUST 2022 – APRIL 2023

Team leader, did paperwork, customer service, restocked, worked at the till, cleaned, and broke down pallets

Other entry level jobs

Restocking shelves, working at tills, cleaning

ACHIEVEMENTS & AWARDS

- Bronze Medallion in the Lifesaving Society Swimming Program
- Costco outstanding performance award

VOLUNTEER EXPERIENCE

- Filled 33+ large garbage bags with trash from the streets in my neighborhood
