Summary

Highly experienced Full Stack Software Developer with a robust background in building scalable web applications. Skilled in Java, Spring Boot, Python, REST APIs, and modern front-end frameworks. Strong background in microservices, CI/CD, and cross-team collaboration, with proven success delivering efficient and maintainable solutions.

Technical Skills

- **Front-end:** React, AngularJS, JavaScript, jQuery, JSF, HTML, CSS, Bootstrap
- **Back-end:** Java, Spring Boot, Python, C#, JSON, Microservices, RESTful API
- **Database:** Relational Database (MySQL, Microsoft SQL Server, Oracle Database), NoSQL (MongoDB)
- **Tools & Platforms:** Docker, Git, CI/CD pipelines (GitLab), VS Code, IntelliJ, Postman, Jira, Confluence

Experience

Full Stack Software Developer, Bell Canada, Toronto March 2021-November 2024

(Contract full-time via CareerEdge, March 2021-August 2022)

- Developed and optimized robust full-stack web applications using Java, Spring Boot, JavaScript, jQuery, AngularJS, JSF, Python, HTML, and CSS, implementing efficient and scalable solutions that improved operational efficiency.
- Accelerated web application deployments by implementing a fully automated CI/CD pipeline with GitLab and Docker.
- Collaborated effectively within small teams to meet stakeholder requirements, ensuring successful project delivery and playing a key role in numerous internal application tasks.
- Successfully investigated and resolved complex technical issues and incidents affecting legacy applications, minimizing downtime and business impact.
- Performed comprehensive quality assurance testing to identify errors and optimize application usability.
- Supported and mentored interns, fostering a culture of continuous learning and technical skill improvement.

Software Developer (Part-time), Records of Early English Drama (REED) - UofT, Toronto 2021-2022

- Enhanced an existing website by adding filters and features, and refined UI design for improved user experience.
- Analyzed and leveraged existing codebase to implement new functionalities and optimize performance.
- Collaborated with stakeholders to ensure project requirements were met within specified timeframes.

Web Developer (Freelance), Cho Orthodontics, Richmond Hill January 2020

- Developed a fully responsive website using HTML, CSS, Bootstrap, JavaScript, and PHP.
- Gathered and analyzed stakeholder requirements, ensuring the website met specific business objectives.
- Provided timely and effective technical support, resolving issues and ensuring a positive user experience.

Programmer Co-op, Airway Interline, Mississauga August 2018-April 2019

- Executed detailed front-end and back-end development tasks for public and internal websites using JavaScript, jQuery, Ajax, HTML5, CSS, Bootstrap, and PHP/SQL.
- Collaborated with team members to create clean interfaces and simple, intuitive user experiences (UX).
- Contributed to project concept development and design phases.

Education

Seneca College, Computer Programming and Analysis (Advanced Diploma), Jan 2017-August 2019, Toronto

- Graduated with a 3.7 GPA (out of 4.0) and gained practical experience in object-oriented programming (Java, C, C++), web development (HTML5, JavaScript, TypeScript, SQL), and problem-solving.

Projects

Finding Location System, 2023-2024 (Internal)

- Developed an internal web application and backend microservices to retrieve location of a person in emergency using AngularJS and Java Spring Boot.
- Integrated third-party APIs for geographic information and carrier providers information retrieval.

Records of Early English Drama (REED), 2021-2022 (<https://ereed.library.utoronto.ca>)

- Implemented new filters and features, and adjusted UI design on the "Search the Records" page based on stakeholder requirements.
- Modified existing HTML, JavaScript, and CSS code to resolve issues and improve overall page functionality.

Cho Orthodontics Website, 2020 (<https://choyoursmile.com>)

- Planned, designed, and developed a responsive business website using HTML, JavaScript, CSS, Bootstrap, and PHP.
- Managed all aspects of website creation, including photography, graphic design, and user experience considerations.

Airway Interline Operation Web Application, 2019 (Internal)

- Planned, designed and developed front-end of the application that initiates, controls, deletes the operation due to airline cancellation/misconnection using HTML, JavaScript, and PHP.
- Created validation for all process for handling passenger's personal information.

Airway 2rs and Travel Website, 2018 (<https://www.airway2rs.com>)

- Designed and developed front-end of the website that introduces the list of tour packages using HTML, Bootstrap, CSS, JavaScript, jQuery and JSON.
- Contributed to an enhanced user experience by creating and retouching unique visuals for the website.

Interests / Activities

- Music | Traveling | Web savvy | Sports (basketball, baseball, table tennis, bowling, billiards)
- Volunteering: Haiti/Dominica mission (2013)
