EDUCATION

Future University in Egypt

Cairo, Egypt

B.S. in Computer Science and Information Technology

Expected May 2026

- CGPA: 3.38/4.00, Dean's List
- **Relevant Coursework:** Data Structures & Algorithms, Distributed Processing, Big Data, Database Systems, Object Oriented Programming, Computer Networks, Backend Engineering

EMPLOYMENT

Full Stack Engineer

Elag Charity Foundation

Cairo, Egypt

July 2025 – present

- Implemented a user-friendly interface with accessibility in mind, increasing donations to the charity.
- Designed and built a backend integrated with National Bank of Egypt's payment gateway to ensure secure fund transfers.
- Created Hi-Fi components on Figma with consistent colors, fonts, and spacing.
- Website: <https://elagcharityfoundation.com/>

Frontend Engineer

Fitness Hub AI

Cairo, Egypt

June 2023 – April 2025

- Developed secure user authorization by designing a JSON-based schema on Firebase Realtime Database.
- Engineered a scalable system to provide Arabic nutritional consultations with **94% user satisfaction**, leveraging efficient prompt engineering on OpenAI APIs

Teaching Assistant

SpimeSenseLabs

New Capital, Egypt

June 2024 – Aug 2024

- Taught Internet of Things (IoT) with MQTT protocol through analogies and interactive JavaScript examples.
- Simplified programming concepts for students by endorsing readable and maintainable code.
-

SOFTWARE PROJECTS

Clustered Real-Time Mouse Tracker (<https://github.com/yousefmarey12/clustered-mouse-track>)

- Built a real-time activity graph system using **Node.js Clustering**, enabling full multi-core utilization for high-performance tracking.
- Implemented a dynamic real-time graph using **d3.js** and **Socket.io**, achieving accurate and fluent visualization.
- Technologies: d3.js, socket.io, Parallel Processing, Node.js Clustering

Finance Dashboard – FrontendMentor Challenge (<https://finance-fe-mentor.web.app/signup>)

- Built a full Angular application from a design mockup, including custom pipes, services, reusable UI components, and animations.
- Created a dynamic SVG doughnut chart using geometric algorithms to compute arc lengths.
- Implemented responsive state management using Angular Signals for mobile-ready layouts.
- Technologies: Angular, TypeScript, SVG Composition, Animations, Bootstrap

Personal Portfolio Website (yousefmarey.netlify.app)

- Designed and deployed a personal portfolio showcasing projects and research interests, following clean UI/UX principles.
- Implemented responsive views for mobile, tablet, and desktop, with a custom theme prototyped in Figma.
- Technologies: Figma, Angular, JavaScript / Typescript, Animations, Responsive Design

Skills

Programming: C++, JavaScript, TypeScript, Python, Angular, Git, WSL, HTML/CSS, Node.js

Tools: Docker, React, MySQL, MongoDB, Firebase, Socket.io, D3.js, VSCode, Chrome DevTools, Linux (Ubuntu)

Concepts: Data Structures & Algorithms, Distributed Systems, Parallel Processing, UI/UX
