Portfolio: <https://mostafazamani.netlify.app>

PROFESSIONAL SUMMARY

Full Stack Developer skilled in building and deploying scalable, responsive web applications using the MERN stack (React, Node.js, Express.js, MongoDB). Experienced in integrating APIs, optimizing performance, and developing innovative AI-powered solutions using OpenAI's GPT API. Achieved a 30% reduction in load times for a SAIT research project. Eager to contribute to high-quality, maintainable products within an agile environment.

EDUCATION

Bow Valley College – Calgary, AB

Software Development Diploma — GPA: 3.85/4.00 (Graduated)

Sep 2023 – Apr 2025

EXPERIENCE

Web Developer — SubSphere Corporation — Calgary, AB

Aug 2025 – Present

- Designed and implemented responsive, user-friendly front-end features using **React.js**, **TailwindCSS**, and modern **JavaScript (ES6+)** as part of the **MERN stack** to support a real-time hazard detection platform.
- Built interactive dashboards for real-time data visualization, integrating secure authentication and RESTful API connections.
- Improved application performance by optimizing state management and reducing redundant API calls, resulting in significantly faster load times and smoother user interactions.

Research Assistant – Web Developer — Centre of Innovation and Research into Unmanned Systems (CIRUS), SAIT, Calgary, AB

Aug 2023 – Feb 2024

- Developed interactive web tools using **React, Node.js, MongoDB, SQL**, and **JavaScript** to support unmanned systems research.
- Improved application load time by **30%** by optimizing component structure and reducing redundant API calls.
- Contributed to AI-based object detection tools, enhancing research workflow efficiency.

Web Developer – Intern — TT Akam Pardazesh Aryana

Sep 2019 – May 2022

- Built and deployed client-facing web applications using HTML, CSS, JavaScript, and SQL, improving UI responsiveness.
- Optimized SQL queries and database structures, increasing internal data efficiency.
- Collaborated with senior developers to develop and maintain RESTful APIs with Node.js and Express.

Sales Associate — The Home Depot, Calgary, AB

Mar 2024 – Present

- Assisted customers with tailored DIY solutions, strengthening communication and interpersonal skills.
- Developed problem-solving skills through hands-on customer interactions.

SELECTED PROJECTS

AI-Powered Fitness Platform — MongoDB, Express.js, React, Node.js, JWT, OpenAI API

- Developed a responsive **MERN** web app for trainees and coaches to set goals, create workout and diet plans, and track progress.
- Designed to enhance coaching collaboration through AI-generated insights and real-time progress visualization.
- Integrated an AI chat assistant to generate personalized fitness and nutrition recommendations.
- Implemented secure **JWT authentication** and role-based access for trainees and coaches.
- Deployed front end on **Netlify** and back end on **Render** for seamless cloud hosting and scalability.
- **Live Demo:** <https://vectorfitness.netlify.app>

AI-Powered TravelBot — React, Node.js, OpenAI API, Framer Motion, Netlify

- Created a chatbot that generates personalized travel itineraries based on budget, location, and interests.
- Integrated OpenAI GPT API for conversational input and multiple output options.
- Built a responsive UI with animations for enhanced user experience.
- **Live Demo:** <https://travelbot-mz.netlify.app>

AV Construction Website — React, Bootstrap, Framer Motion, Netlify

- Developed a responsive, single-page website for a construction company.
- Implemented smooth animations for a polished UI and improved user engagement.
- **Live Demo:** <https://av-construction.netlify.app>

MERN Task Management Dashboard — React, Node.js, Express.js, MongoDB, Render

- Built a Kanban-style task management dashboard with authentication and CRUD functionality.
- Designed and deployed a secure RESTful API to manage tasks, projects, and user access.
- **Live Demo:** <https://mz-task-management.netlify.app>

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), TypeScript, Redux (learning), Bootstrap, TailwindCSS, Framer Motion, Responsive Design

Backend: Node.js, Express.js, MongoDB, MS SQL Server, MySQL, GraphQL

Dev Tools: Git, GitHub, Postman, VS Code, Azure DevOps

Languages: JavaScript, Python, C#, Java, SQL

Concepts: RESTful APIs, OOP, Agile/Scrum, CI/CD (basic), DevOps (basic), UX/UI Design, AI Integration

Familiar With: AWS, Machine Learning, C++, PHP, Jest, React Testing Library, Docker
