Professional Summary

Self-motivated Computer Programming graduate with an entrepreneurial background and 1 year of hands-on experience in QA testing and full-stack web development. Strong problem-solving abilities, rapid learning aptitude, and proficiency across the development stack. Eager to contribute technical expertise and innovative mindset to a dynamic software engineering role.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, C#, SQL, HTML5, CSS3, XML (XSL, XSD, DTD), Object-Oriented Programming (OOP)

Frameworks & Libraries: React, Next.js, Node.js, Express, ASP.NET, .NET, JQuery

Frontend: Tailwind CSS, Framer Motion, Shadcn/ui, Responsive Design, UI/UX Principles, Figma

Backend & Databases: RESTful API Development, MongoDB (Mongoose), PostgreSQL, AWS S3, Database Management, API Integration

DevOps & Tools: Git & GitHub, VS Code, Postman, Vercel, Netlify, Vite, Lighthouse

Tools: Git/GitHub, VS Code, Postman, Vercel, Netlify, Lighthouse

Methodologies: Agile/Scrum, Waterfall, Software Development Lifecycle (SDLC)

Professional Experience

Alfonso Inc. QA Consultant Services

Web Developer & QA Analyst

Mississauga, ON

Oct 2024–Present

- Developed and maintained 15+ custom web features and scripts using JavaScript, React, HTML/CSS across multiple client projects, resulting in enhanced functionality and a 25% improvement in page load times for integrated solutions while bridging QA and development roles.
- Participated in Agile/Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, while adapting quickly to new tools, technologies, and project requirements.
- Performed comprehensive black-box, functional, regression, and integration testing on web and mobile applications for multiple clients, identifying critical defects and ensuring high-quality releases in fast-paced environments.
- Conducted API testing using Postman and executed UI/UX validation with a focus on edge cases, accessibility compliance (WCAG standards using tools like Wave, Axe, JAWS, and NVDA), and cross-browser compatibility.
- Collaborated with cross-functional development teams to reproduce and document 200+ bugs in detail, verify fixes, and implement preventive measures, improving overall product stability by 20% and enhancing user experience scores.

Projects

AI-Powered Resume Analyzer

React, TypeScript, Tailwind CSS, Puter.js

[View Project](#) | [Github Repo](#)

Full-stack web application for analyzing resumes against job descriptions using AI

- Developed a responsive, serverless Applicant Tracking System (ATS) that allows users to upload PDF resumes, input job details, and receive AI-generated feedback on match quality, improving job application optimization.
- Implemented drag-and-drop file uploading with validation (e.g., PDF only, max 20MB) using react-dropzone, and converted PDFs to images for preview using pdfjs-dist.
- Integrated Puter.js for authentication, cloud storage of resumes and metadata, and AI analysis (powered by Claude Sonnet) to evaluate resumes across categories like tone, content, structure, skills, and ATS compatibility.
- Built dynamic UI components including a homepage displaying resume cards, detailed feedback pages with collapsible sections, score gauges, and badges using Tailwind CSS and Zustand for state management.
- Deployed the production build to Netlify for static hosting while leveraging Puter.js for all backend functionalities (auth, AI, storage, KV), achieving zero server costs and seamless scalability.

Music Marketplace

React, TypeScript, Node.js, Express, Stripe & PayPal, AWS S3

[View Project](#) | [Github Repo](#)

Production-ready online store enabling the sale and automated delivery of premium type beats with tiered non-exclusive and exclusive licensing

- Built a full-stack e-commerce platform from scratch, enabling producers to sell digital instrumentals (type beats) with tiered licensing (Basic, Premium, Professional, Exclusive) and automated delivery of tracks and PDF contracts upon purchase.
- Integrated Stripe and PayPal payment gateways with secure checkout flows, webhooks for transaction verification, and support for coupons, BOGO discounts, and shopping cart management.
- Developed backend API with Node.js/Express and MongoDB for beat catalog management, user orders, license tracking, and secure file handling via AWS S3 presigned URLs.
- Implemented automated email system using Nodemailer for purchase confirmations, downloadable license agreements, and admin notifications, enhancing post-sale user experience.
- Deployed production site live, handling real transactions, digital downloads, and customer interactions with focus on security (CORS, environment variables) and scalability.

Education

Seneca Polytechnic

Toronto, ON

Ontario College Diploma in Computer Programming

2024

Honors: cum laude (GPA: 3.5/4.0)

Relevant Coursework: Data Structures and Algorithms, Advanced Database Services, AI for Programmers & Software Testing
