CAREER SUMMARY

Software Developer with 10+ years of professional experience designing, building, and maintaining web-based applications and systems. Most recently worked at 8am Solutions Inc., contributing to a large-scale construction management platform using SvelteKit, TypeScript, Python, and Azure. Proven ability to develop applications from scratch, define scalable architectures, and grow products to ~1,000 daily active users. Experienced in full lifecycle development, requirements gathering, system optimization, and mentoring junior developers in modern JavaScript ecosystems.

WORK EXPERIENCE

FULL STACK DEVELOPER (Svelte KIT, TypeScript, Redux, Python)

8am Solutions Inc. – Full time

October 2022 – February 2024

- Developed and maintained the overall website and application architecture, building the system from initial design to production deployment.
- Wrote, modified, and tested website-related and backend code using SvelteKit, TypeScript, and Python.
- Maintained existing programs by implementing enhancements, refactoring legacy logic, and resolving performance issues.
- Designed application layout, data flow, and UI structure, ensuring usability, scalability, and maintainability.
- Assisted in the collection and documentation of user requirements, translating business needs into technical solutions.
- Researched and evaluated interactive libraries, frameworks, and tooling to improve performance and developer efficiency.
- Integrated and tested Internet-based application features including authentication, data management, and PWA functionality.
- Produced technical documentation and enforced SOLID and DRY principles across the codebase.

FRONT-END DEVELOPER (React 18– Next JS, TypeScript, Redux, Material UI)

New Idea Machine – Part time (**Volunteering**)

September 2022 – December 2022

- Designed modular front-end architecture and maintained existing application code to improve scalability and reduce defects.
- Wrote, modified, and integrated front-end logic using React, Redux, and TypeScript.
- Organized application data flow and designed UI layout and interaction patterns using mobile-first principles.
- Assisted with gathering feature requirements and mentoring junior developers during implementation.
- Evaluated UI libraries and tooling to enhance development speed and consistency

FULL STACK DEVELOPER (React, Node.js, TypeScript, Redux-Saga, Material UI)

Telesens Global Solutions – Full time

March 2021 –October 2022

- Developed and maintained web applications by modifying backend and frontend codebases using React, Node.js, and TypeScript.
- Integrated and tested Internet-based business features including reporting, authentication, and time-sensitive workflows.
- Assisted in translating business rules into documented technical requirements.
- Designed responsive UI layouts and optimized application flow for performance and usability.
- Evaluated third-party libraries and frameworks to reduce complexity and improve maintainability.
- Established testing practices and code standards across the project.

FRONT-END DEVELOPER (React 16, Redux, Styled Components)

Freelance at Upwork, Full time

February 2018 – February 2021

- Developed and maintained SPA web stores and Internet applications.
- Wrote, modified, and tested website code for usability, performance, and responsiveness.
- Designed application layout, navigation flow, and component-based UI structures.
- Integrated APIs and third-party services into client-facing web applications.

GIS SPECIALIST (C#, ArcGIS)

National Aerospace University N.E. Zhukovsky, Part time

August 2013 – February 2018

- Image processing algorithms development using C#
- Work with ArcGIS software to vectorize paper maps photocopies
- Work with ArcGIS software for georeferencing satellite images and further analysis.

EDUCATION

Graduate Studies in Geo-Information Systems and Technologies

National Aerospace University N.E. Zhukovsky, Kharkiv, Ukraine

September 2010 – July 2013

Master of Science (Honors) in Geo-Information Systems and Technologies

National Aerospace University N.E. Zhukovsky, Kharkiv, Ukraine

September 2004 – July 2009

Bachelor of Science (Honors) in Microprocessor Systems Engineering

Radio Engineering Technical College, Kharkiv, Ukraine

September 1999 – July 2003

TECHNICAL SKILLS

Core Competencies: Website architecture, web application development, code integration and testing, application maintenance, UI/UX layout design, requirements analysis, interactive media evaluation, Internet and e-commerce application development. Material UI, MUI, Styled components, MERN, Webpack, Vite, RESTful API, Jest, RTL, JWT, hooks, context.

- HTML5, CSS3, Tailwind, Bootstrap, Flex, Grid, CSS module, CSS-in-JS, DOM manipulation

Additional stack: AXIOS, moment, pdf create, nodemailer, lodash, pie charts, OAuth, Git, Docker, Postman

Supporting stack: Jira, Confluence, Trello, Azure DevOps, Figma, Adobe XD, Unit testing, scenario writing, technical documentation writing, Debugging, Test Coverage, Kanban, Agile methodology, Scrum

- IT degree, technologies, AI, copilot AI, Chat GPT, Visual Design Specifications, Team management, Remote work, Hybrid work, On site work, Contract role, Permanent role, Web Developer, Front-end development, Back-end development, Web-based Solutions, Proactive Communication, Research Skills.

- Excellent attention to details and quality of a product, logical and creative problem solving, mentorship, code review, Strong knowledge of modern technology landscape, constantly learning and updating skillset.

Technologies and patterns stack: MFE, monolithic, Module, SPA, PWA, Web applications, MV-VM, MVC, Accessibility (a11y), Performance optimization, Data layers, UI UX design, responsive design, ARIA standards, Cross-browser compatibility, semantic markup, mobile first layout, Landing pages, Custom-built websites,

- SOLID, DRY, BEM, Code refactoring, Design patterns, Linting, Scalability, Design collaboration, Speed optimization, Analytics, Technical Architecture, Scalability, Prototype, Inheritance, Closures, Asynchronous programming, Object-oriented principles, Server-side technologies
